

ExoShield Windshield Protection Film

Stops Rock Chips

Stone chips can happen almost anywhere and anytime. ExoShield is designed to absorb 6X more impact than a windshield alone, significantly reducing the potential for costly and annoying stone chips.

Superior Durability

ExoShield's cutting-edge nano-ceramic hardcoat protects against abrasion while also reducing UV damage. It's the longest lasting windshield protection film available.

Unmatched Clarity

ExoShield is razor-thin and has the highest optical quality on the market. It won't obstruct your vision, impact sensor functionality, or interfere with your heads-up-display.

Saves Time and Money

Your time is valuable. Avoid insurance claim hassles, costly deductibles, lost resale value, and malfunctioning ADAS systems by preventing windshield damage and sensor miscalibration.

Best-in-Class Warranty

ExoShield is backed by a 2-year/30,000 mile (50,000 km) warranty against manufacturer's defects.

We've got you covered.

We offer extra care and coverage options to help you maximize the life of your ExoShield. Visit www.getexoshield.com for more information.

Innovative protection for today's high-tech windshields.

EXOSHIELD

NANOCERAMIC WINDSHIELD PROTECTION FILM

Your windshield is more expensive than you think.

The price of the average windshield replacement has increased to more than \$1600 for vehicles equipped with new technology behind the windshield (Source: AAA 2018).

Advanced Driver Assistance Systems (or ADAS) are high-tech safety and convenience features that are built into most new vehicles and rely on sensors mounted on the inside of your windshield. The sensor systems that enable these features are expensive to recalibrate when your windshield needs to be replaced.

- Lane-Keeping Assist
- Lane Departure Warning
- Pedestrian Collision Avoidance
- Rain-Sensing Wipers
- Automatic High-Beam Assist
- Heads-Up Display

It's never the same again.

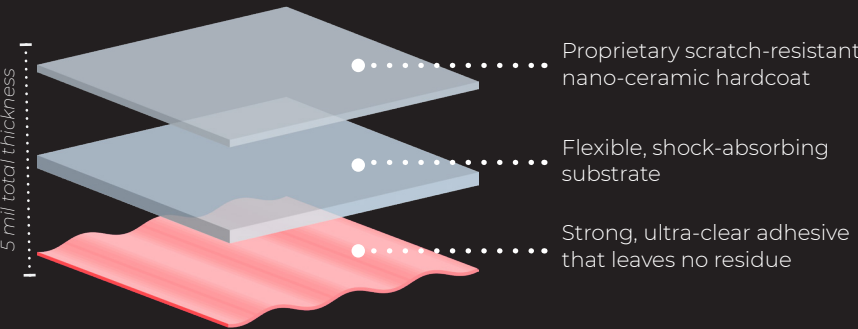

Many car makers today require OEM windshields for ADAS equipped vehicles, as aftermarket options may not meet certain quality or compatibility requirements. Preserve your factory glass and sensor calibration by protecting your vehicle with ExoShield.

- ✓ Factory Glass
- ✓ Factory Calibration
- ✓ Factory Seal

It's time to protect your windshield.

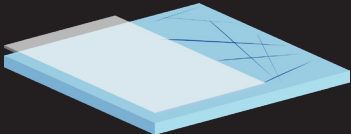

ExoShield is an ultra-thin and transparent film installed on your windshield to reduce the risk of damage from stone chips. Driving can be stressful enough. Rest easy knowing your vehicle is better protected and your ride is safer, all while avoiding the burden of having to replace your windshield unexpectedly.

Engineered with advanced nano-technology.

Longer Lasting

ExoShield includes an innovative nano-ceramic hardcoat designed to prevent abrasion from dirt or sand to maximize product life.

Total Transparency

ExoShield transmits more than 90% of visible light, which is higher than your windshield alone. When installed, it's completely undetectable without compromising protection.

Superior Weatherability

ExoShield is formulated to resist degradation from UV and temperature, making it the best protection for all environments.
