

# EMPLOYEE / WORKER BENEFITS:

---

## ~FAMILY & FRIENDS

A lot of employees don't think or care much about their own safety.  
Here are some reasons to start caring:

1. You have loved ones who would be devastated emotionally and financially if you were killed in a fatal accident in the workplace.
2. You might not be lucky enough to die. Usually, a serious injury results in severe disabilities, pain killer addiction, and financial distress or ruin.
3. Even if you do not like your co-worker. He or she has a family who would suffer should he or she get killed at work.

OSHIFY can increase safety awareness and safety literacy throughout the entire workforce; helping employees and families avoid the suffering that comes with a serious workplace accident or fatality.
