Ibexlabs

Next-Generation AWS Managed Security and Support Services

Operate your cloud infrastructure efficiently and securely

Security is a shared responsibility between a cloud provider and its customers for their cloud-based deployments. Ibexlabs keeps your cloud endpoints safer with a combination of technology and cloud-security experts working together to remove threats through continuous detection and investigation. Ibexlabs provides customers a one-stop shop for performing risk-based assessments—an important attribute when choosing a cloud service provider to support security requirements.

Benefits of a robust security offering

Cost Reporting and Optimization

Pay only for what you use with tailored services that follow a flexible pricing model. Start small and easily scale as your business demands more resources.

Automated Security and Patching

Automatically scan your cloud infrastructure and endpoints to detect potential threats and deploy patches to repair any affected areas or security vulnerabilities—a hands off approach that saves time and gives peace of mind.

Monitoring and Alerting

With thorough security analysis and continuous monitoring, you are notified of security events and receive guidance from our team of cloud-certified experts for remediation.

Compliance with Industry Standards

It is important to stay abreast of industry trends and accepted protocols. We scan your cloud environment to make it compliant with the industry-recognized cloud security standards.

Cloud Best Practices

Ibexlabs follows cloud best practices as it scans and maintains your cloud environment. We align the deployed resources with the best security standards.

Why You Should Consider Managed Services and Managed Security Services with Ibexlabs

Ibexlabs analyzes your application portfolio and workloads to understand your business needs and together we plan accordingly. With a clearly defined roadmap, your organization can minimize cost and effort during the cloud transformation journey. With our competencies, we ensure that your organization is backed by reliable experts who can address stringent security requirements.

- Routine scanning for infrastructure vulnerabilities
- Respond to industry challenges with ease and agility
- Drive your business towards growth with advanced technologies
- Embrace DevOps principles and practices
- Optimize usage and performance
- Minimize cloud spend

"Ibexlabs' cloud expertise together with AWS technologies allows the platform to scale to any size and support a variety of CORT customers with a customizable and user-friendly frontend."

Himalesh Kumar
Executive Director, CORT

About Ibexlabs

Ibexlabs is an AWS Advanced Consulting Partner that provides startups and SMBs with custom cloud consulting, cloud migration, DevSecOps, and managed security services. With 100+ AWS certifications covering four Competencies and seven Service Delivery Programs, we deliver innovation, deep expertise, and an agile framework to meet the acute business and technical demands of our customers. As a Partner with competencies in AWS Security and AWS Level 1 Managed Security Services—and an AWS Well-Architected Partner—Ibexlabs applies AWS best practices to design and build cloud solutions that meet the highest standards of governance, security, and compliance, such as SOC2, PCI, HIPAA, and HiTrust. Ibexlabs can be contacted at engage@ibexlabs.com or www.ibexlabs.com.
