

Fellows Program

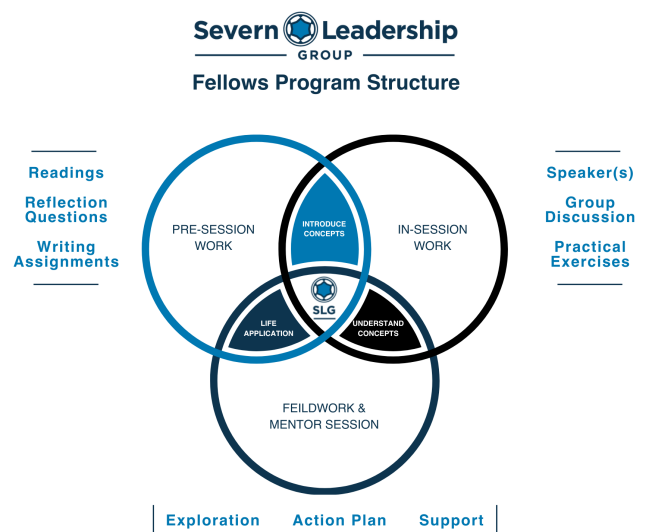

The Fellows Program enables mid-career professionals to take a holistic view of the purpose of their leadership, sharpen their emotional intelligence, and develop the skills needed to lead change. Candidates must be willing to self-reflect, grow, and change.

Our leadership perspective is a systems-based approach grounded in three basic precepts that set the foundation for cultivating emotionally healthy and courageous leaders who serve their teams and the greater good:

- Leadership and followership are defined by character and are relational in nature.
- Character is shaped by a timeless and transcendent set of core virtues.
- Selfless courage and service to others is not a style of leadership, but learned behavior.

The Fellowship includes:

- A copy of [Swing: Elite Leadership for High Performing Teams](#)
- Difference Makers Program Guidebook
- Pre-work Assignments
- Emotional Intelligence (EQ-i) Assessment
- EQ-i Coaching Session
- Large Group Cohort Sessions
- Fieldwork (Life Application)
- One-on-one Mentorship

"I immediately incorporated changes recommended based on the EQ-i test and recommendations by my mentors, and have seen a great transformation in my leadership style and personal well being. The program was truly life transforming!"
- Josephine N., SLG '22 Alumni
