

Accelerate your time to value

Confidently build immersive VR training solutions your employees will love in just 4 to 8 weeks with a little help from experts in instructional design, media production and implementation.

Continuous support

Get started quickly and stay on track with free support.

Do it yourself

Build immersive training experiences with your own team.

Outsource

Get help with script writing, filming and implementation.

Our story-based approach to immersive learning

People learn better by doing. With VR training, learners are fully immersed in a virtual, safe and distraction-free environment where they can practice for complex situations in a consistent, repeatable way. Storytelling adds emotion to trainings and improves retention, as emotional events are likely to be recalled more often and with more clarity and detail.

Our story-based approach to training combines advanced learning theory, behavioral and cognitive science, and spatial design into an interactive and highly effective learning experience. Learners are in control of their own story and are free to make their own choices in a hands-on way. This way, they can learn by experiencing the consequences from their choices.

“Learning from a well-told story is remembered more accurately, and for far longer, than learning from facts and figures.”

Peg Neuhauser, Organizational Psychologist

Guidance at every step of your journey

We'll help you every step of the journey to implement VR training in your company. Get up and running quickly with product onboarding and workshops. Stay on track with a joint impact plan and regular health check-ins.

Questions? Get answers by phone, email, live chat, a help center, instructional video library and practical how-to guides.

- Introduction to story-based immersive learning
- Introduction to VR hardware
- Create your first VR training scenario
- How to write story-based immersive scenarios
- Film and post-produce immersive scenarios
- Implement VR training into your business

Introduction to story-based immersive learning

Learn the basics of story-based immersive learning, including what it is and how it works.

We will discuss the power of emotion, show research and a lot of examples, explain the relationship with gaming and gamification and tell you why storytelling should be a crucial part of any learning process.

Introduction to virtual reality hardware

Learn the fundamentals of hardware to create and play immersive learning scenarios.

We will show you the different types of 360° video cameras you can use, discuss hardware trends and tell you about all other required equipment when you prefer to film yourself. Next we will discuss VR headsets, device management, and safety and hygiene aspects of VR training.

Create your first VR training scenario

Warp Studio is built with great usability in mind, yet creating your first scenario can still be difficult. Where do you start? Which scene types do you use?

In this workshop we will answer all of these questions, including topics like working with 360° video files, scenario distribution, LMS integration and analytics. During this workshop you will create your first simple immersive scenarios. After a week we will come back together to review.

How to write story-based immersive scenarios

In this workshop we will teach the skills required to write high-quality story-based immersive training scenarios.

During this workshop you will learn about storytelling, presence, setting the right challenges, how to write dialogues for actors, and how to ask the right questions.

Film and post-produce immersive scenarios

In this workshop we will teach you to actually film and produce a training scenario with a 360° video camera.

Learn how to set up your camera, tripod and microphone. Get all the ins and outs on pre- and post-production, including scenario export, script breakdown, production schedules, and 360° video editing. We will roleplay filming with an actor and you will film a scenario yourself.

Implement VR training into your business

In this workshop we will teach you how to implement and integrate VR training into your business.

You will learn which devices to use and how to manage them, how to scale VR training in your organization using LMS integrations, how to create more scenarios, how to budget for VR training and how to convince management of its benefits.

Warp VR workshop bundle

Our train-the-trainer creator bundle combines different workshops as a fast-track to learn how to create & produce story-based VR training scenarios.

Learn how to ask questions in VR that boost learning, create engagement and boost training completion rates. Get a deep dive into Warp Studio, learn more about presence, challenge and storytelling, and create a ready-to-use immersive scenario.

“Warp VR’s support team did a terrific job!”

”I just finished my 2nd homework for review tomorrow with the support team. This helps me to imagine how trainees would respond and what questions we can best ask them. Warp VR’s support team did a terrific job in explaining this to us. Much appreciated!”

Adinin Talip, Head of HSSE/SP Learning at Brunei Shell Petroleum

Speed up with help from experts

Build immersive learning experiences your employees will love with a little help from our community of experts in instructional design, media production & implementation.

Contact us for detailed information and prices.

- **Script writing** - create story-based immersive scenarios with expert advice on writing & storytelling
- **Filming & production** - improve the filming process from pre- to post-production
- **Review sessions** - improve your scenarios and ensure a smooth rollout & adoption of VR training in your company
- **Other services** - casting, video effects & CGI, lighting, makeup, styling, location scouting for filming, hardware

Script writing

Create story-based immersive scenarios with expert advice on writing & storytelling.

Collaborate with one of our scenario experts and write story-based immersive scenarios according to the needs of your business.

The scenarios will be created using a multidisciplinary approach which includes the topic of interest, why it is important, who it will be made for and how it will affect your business. You'll also learn more about storytelling, asking the right questions, creating dialogues for actors and setting the right challenges for the best learning impact.

Filming & production

Learn everything you need to know about filming, including hiring & preparing actors, finding locations, working with actors, editing, adding visual effects and stitching.

Our experts can help you film the perfect immersive scenario for your business.

In the pre-production phase, we can assist you in finding, hiring and preparing actors for their roles, as well as discovering and booking the right locations.

During filming, we bring an experienced 360° filming crew to ensure a high quality result.

In the post-production phase, we help you edit, stitch and upload all media to Warp Studio.

Review sessions

Ensure a smooth rollout & adoption of VR training in your company, expand to other business units or departments, and learn how to convince management.

If you've created a scenario but feel like you could use an extra pair of eyes and feedback before continuing, our immersive and story-based scenario experts can give you a hand.

During a review session, one of our immersive learning experts will review your scenario and provide you with feedback to help you improve it.

- If not filmed yet - give you handy tips and tricks to get it ready for filming.
- If already filmed - review the recordings and point out what might need updating.

“A great success story.”

“The collaboration with Warp VR was really great, because we worked together as a team. We knew exactly what we wanted to achieve and it was clear who was doing what. For me as Head of Learning & Development, it's important to get really good support from the very beginning until the end. So far it's been a great success story regarding collaboration and most important the outcome.”

David Gezzele, Head of Learning & Development at Erste Bank
