Letter from the CEO

"End of an Era, Beginning of a New"

Year 2016 marked the ending of our, Copenhagen Contractors, support to the armed forces in Afghanistan as we had to handover our forensic facility at Kandahar Airfield, operating under the auspices of NATO, to the US Army.

We have been part of the NATO-led missions in Afghanistan since 2008, so it is with some degree of sadness that we now say goodbye to supporting peacekeeping efforts in this region. However, we hope and trust that we will be able to support both Host Nations and NATO-led missions in other countries in the future with military camp services and equipment.

Despite a slightly lower annual turnover for 2016 compared to last year, I am satisfied with our efforts in Copenhagen Group, especially since we managed to improve on our operating profit substantially from the year before due to an increase in the sale of vehicles, equipment and wash-down services during 2016.

Our vehicle fleet solutions business, Copenhagen Global, continues to grow and now forms the backbone of our overall business in terms of financial turnover. We keep adding partnerships to our portfolio of products and services in order to offer our customers a one-stop shop for their land, sea and air fleet solutions. Our motto is "cradle to grave", meaning that we not only sell or lease a vehicle or boat, but that we also maintain, repair and dispose of it.

In 2016, we secured yet another framework agreement with the Danish Defence for the supply of snowmobiles together with BRP Lynx. Obtaining more work for the Danish Defence and other Danish customers is a top priority for us in the years to come. By 2018, we expect 30% of our annual turnover to originate from Danish customers.

In 2016, we invested heavily in the acquisition of mobile wash racks and equipment, manufactured by our business partner, Riveer, in order to undertake wash-down and disinfection of 500+ combat vehicles for the Danish Defence in Lithuania within just 10 days. We hope to be able to offer similar services to other nations in the near future.

In 2017, we expect to make our first sale of high-speed performance boats and related equipment, such as marine engines by our new strategic partner, FPT Industrial. FPT Industrial is part of CNH Industrial and a global leader in the manufacturing of powertrains for on-road, off-road, marine and power generation applications. We are very proud of this appointment to become a dealer for FPT Industrial in Denmark and look forward to serving Danish customers in due course.

Concluding our engagements in Afghanistan allows us to rethink and refocus our efforts for Copenhagen Contractors. The growing threat of terror and increasing occurrence of natural disasters lead us to focus on surveillance and emergency preparedness and response. To this end, we are adding unmanned aerial vehicles and systems to our portfolio to enable customers to survey large areas for a prolonged period. Our unmanned aerial systems are classified as dual-use, meaning that they are intended for both military and commercial usage, such as monitoring of the environment and wildlife.

Our emergency response products and service portfolio also include MAGIRUS firefighting trucks and equipment. We expect to expand our business with MAGIRUS by offering products and services to municipal emergency response capabilities and national airports in Denmark.

Our business model for both Copenhagen Global and Copenhagen Contractors is and always will be that of a facilitator and broker – bridging the gap between reputable manufacturers and customers. By being able and skilled to work in remote and hostile locations we add value to both our business partners and customers. We go where others are unable to in order to best support our customers – from Somalia in the south to Iraq in the East.

Our electoral support business, Copenhagen Election, continues to struggle a bit given low overall activity worldwide. However, in 2016, we managed to obtain a long-term agreement for the supply of both indelible ink products and ballot boxes to an international organisation supporting elections worldwide. Under this new long-term agreement, we supplied indelible ink for elections intended in Haiti in early 2017.

Given that the procurement of electoral materials has been decentralised during the past few years, it requires a slightly new marketing model to sell our products for national elections. To support this new reality, initiatives to proactively market and sell our electoral materials directly to national election commissions are under way.

2016 marked the end of an era, but the beginning of a new for Copenhagen Group, as we now need to reinvent Copenhagen Contractors and refocus our energy and resources towards new products, markets and customers.

Supporting international organisations and national governmental bodies worldwide with products and services from cradle to grave remains our core business focus, but during the coming year we will rewrite the overall strategy for our company, denoted "Copenhagen Group 4.0".

I would like to thank all our stakeholders - from employees and business partners to customers - that contributed to our successes this past year. I look forward to exciting and prosperous times in the year to come.

Jeppe Handwerk
CEO

About Copenhagen Group

Copenhagen Group manages projects and contracts awarded through direct tendering for the supply of products and services to international organisations, national governments and agencies.

Copenhagen Group's business model is based on recognising and realising opportunities in the difficult – be it urgent or long-term requirements for humanitarian missions worldwide or critical infrastructure support to deployed international forces in conflict or post-conflict countries and/or regions.

Copenhagen Group has offices in Denmark and Kuwait.

Copenhagen Group currently employs 45 people on a permanent contract basis but makes extensive use of project-based employments to fit the scale and scope of work undertaken for customers.

Copenhagen Group is solely owned by Handwerk Holding A/S, a family-owned company.

Textron Aerosonde Hybrid Quad (HQ)
The Aerosonde HQ is a runway-independent configuration that uses Hybrid Quadrotor technology to achieve vertical take-off and landing (VTOL), which brings unparalleled levels of mission capability and flexibility.

Management's Review

Despite a scaled down set-up in Afghanistan, following demobilisation of troops and handover of various facilities to the US Army, our consolidated revenue for Copenhagen Group was at par with the previous year, namely DKK 212 million. This is primarily due to the continued and strong growth of Copenhagen Global, which supplies vehicles, boats, engines, spare parts and after sales services to international organisations and national governments under long-term agreements. During the past three years, Copenhagen Global has grown from a company specialising in armoured vehicles and heavy-duty trucks to a company that offers the entire palette of products from CNH Industrial – from engines to fire trucks – and various special purpose boats and related equipment from reputable global manufacturers.

In late 2015, we secured a number of additional long-term agreements for the provision of field motor vehicles, agriculture and construction equipment, large trucks and buses, and armoured vehicles for an international organisation supporting humanitarian efforts worldwide. In June 2016, we delivered 36 water tank trucks, manufactured by IVECO, to Ethiopia's Ministry of Health under one of these long-term agreements.

Support to national and international forces on training exercises has also proven both successful and profitable this past year. Copenhagen Contractors undertook wash-down and disinfection of 500+ combat vehicles and tanks within just 10 days for the Danish Defence in connection with the White Sword Exercise in Lithuania in June 2016.

Irrespective of few and small deliveries of electoral materials this past year, 2016 marked a milestone for Copenhagen Election as we managed to obtain a long-term agreement for the supply of indelible ink products to an international organisation supporting elections worldwide. This agreement is in addition to our existing long-term agreement for the supply of ballot boxes and plastic security seals.

Having spent close to two years and a vast amount of money in pursuing the contract for the operation and maintenance of the Thule Air Base in Greenland for the US Air Force in the US court system, the court case was finally settled in June 2016 by the United States Court of Appeals for the Federal Circuit. Unfortunately, Copenhagen Arctic lost the case with the Court of Appeals despite winning it a year prior with the United States Court of Federal Claims.

Due to poor performance of our Horizontal Directional Drilling business in Jordan, we decided to liquidate the company and only focus on our operations in Kuwait going forward. The latter continues to generate modest, yet satisfactory revenue.

Financial Development

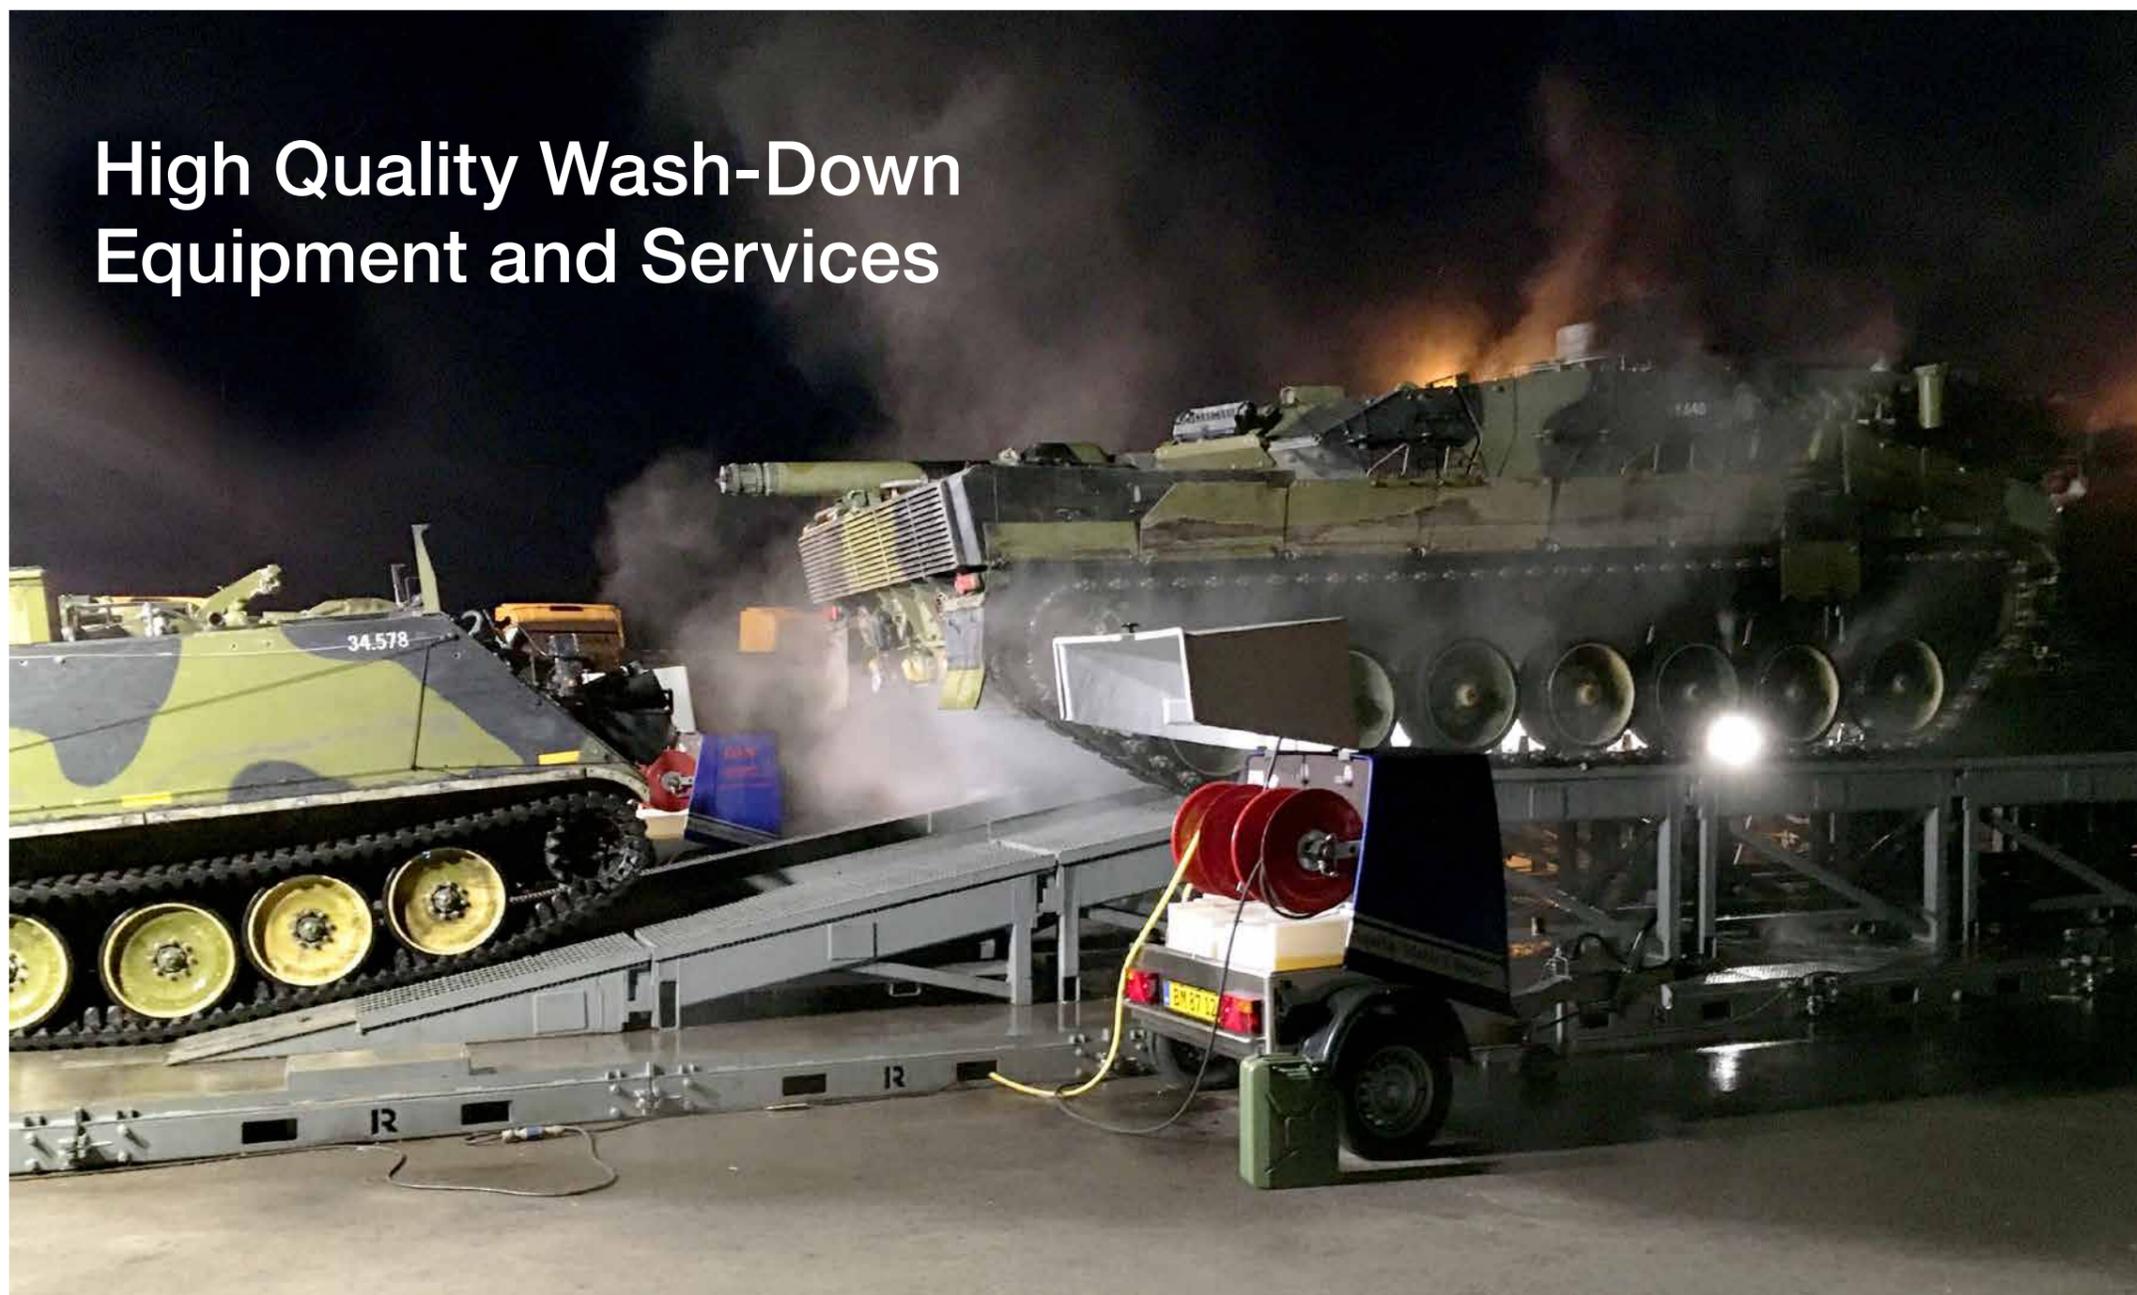

In 2016, revenue decreased by 2.1% from DKK 217 million to DKK 212 million. The decrease in revenue is a result of a lower activity level in Afghanistan and fewer elections worldwide funded by international organisations in 2016 compared to 2015.

In 2016, revenue from Danish customers represented 7.5% of total revenue. We expect this share to increase in the coming years with the addition of new contracts for the Danish Defence, among other.

Gross profit increased by 35% to DKK 37 million from DKK 27 million. This higher gross profit was a result of increased sales of vehicles, equipment and wash-down services during the past year compared to the year before.

Operating profit increased by 236% to DKK 9.8 million, constituting a profit margin of 4.6%. The increase in operating profit was lower than gross profit due to an increase in depreciations, from DKK 2.9 million to DKK 4.7 million, following a write-down of wash-down racks procured for wash-down services provided in Lithuania for the Danish Defence and an increase in financial costs to DKK 2.8 million due to

High Quality Wash-Down Equipment and Services

2016 White Sword Exercise in Lithuania

Copenhagen Contractors undertook wash-down and disinfection of 500+ combat vehicles for the Danish Defence in Lithuania using wash racks and equipment manufactured by Riveer.

non-favourable fluctuations in the USD exchange rate for our USD debt obligations.

Total balance was reduced by 51% to DKK 38.5 million from DKK 78.3 million. The unusual high number in both year 2015 and 2014 was due to large orders for vehicles placed by our customers at the very end of the annual year, resulting in an inflated balance sheet at year-end for Copenhagen Global and thereby also Copenhagen Group.

Cash and inventory management were both improved in 2016. Networking capital was reduced by 26% from DKK 23 million to DKK 17 million. Similarly, inventories were reduced by 37.5% from DKK 13.8 million to DKK 8.6 million.

With a net profit of DKK 5.4 million for 2016, total equity ultimo 2016 amounts to DKK 9.2 million and translates into an equity share of 24%, which is an improvement from 19.5% last year, despite an extraordinary dividend of DKK 7 million paid out to shareholders during 2016. Due

to this extraordinary dividend, no ordinary dividend is paid out to shareholders for the fiscal year 2016.

Expectations for the Future

During 2016, we invested heavily in Copenhagen Global by employing additional staff and expanding our in-house skills set. Providing high-quality after sales services is a cornerstone of our business model for Copenhagen Global. We go where others are unable to in order to best support our customers – from Somalia in the south to Iraq in the East.

With the addition of new staff with the required expertise and experience from the maritime sector coupled with our strong and long-standing partnerships with manufacturers of boats and related equipment, we expect the boat segment to constitute a growing share of our revenue in the years to come. Our aim is to be the leading supplier of special purpose boats – from search-and-rescue to combat boats – to both governmental and commercial entities in the Nordics.

To further expand our partnership with CNH Industrial, we entered into an agreement with FPT Industrial, which is a leading manufacturer and seller of powertrains (engines and generators) for industrial vehicles and boats. Becoming a distributor for FPT industrial for Denmark and Greenland has been a long-term goal for us and we are thrilled to include engines and generators to our list of products for both our vehicles and boats.

Utilising new technology for various purposes is important to us, which is why we have teamed up with Textron Systems to provide unmanned aerial systems capabilities to customers worldwide. Textron Systems offers reliable and high-quality unmanned aerial vehicles – be it for military, civil or commercial purposes.

Given the current political climate with geopolitical tensions, particularly between the Western World and Russia, we expect heighten military presence in the Baltic countries by NATO forces. Copenhagen Contractors will spearhead our entry into these countries by offering

support (products and services) to national and international armed forces operating on the border to Russia.

Given that the procurement of electoral materials has been decentralised during the past few years, it requires a slightly new marketing model to sell our products for national elections. To support this new reality, initiatives to proactively market and sell our electoral materials directly to national election commissions are under way. We expect these new sales initiatives to generate revenue and also seek comfort in the number of larger upcoming elections in predominantly Africa in 2017 and 2018.

Risk Management

Proper management of risks is extremely important to us, since our corporate set-up and customer database do not lend us much room for manoeuvring with respect to social acceptability and financial credibility.

Supporting Free and Fair Elections Worldwide

2016 Elections in Jordan
Copenhagen Election supplied and delivered bottles of indelible ink for the 2016 elections in Jordan.

Before bidding for a new potential contract we conduct an internal assessment of the customer and scope of work to ensure it meets our obligations to UN Global Compact to which we are a long-standing signatory.

Our suppliers undergo the same level of scrutiny, particularly with respect to ISO 9001 on quality, ISO 14001 on environment and OHSAS 18001 on occupational health and safety.

To hedge our financial risks, we aim to quote customers in the same currency as that quoted to us by our suppliers. Our business transactions are, for the most part, also restricted to DKK, EUR and USD; hence, the biggest risk relates to fluctuations in the USD exchange rate towards EUR and DKK.

The vast majority of our contracts are with stable national governments and reputable international organisations; hence, a loss on debtors or a long delay in payments by a customer is rarely a problem for us.

Employees

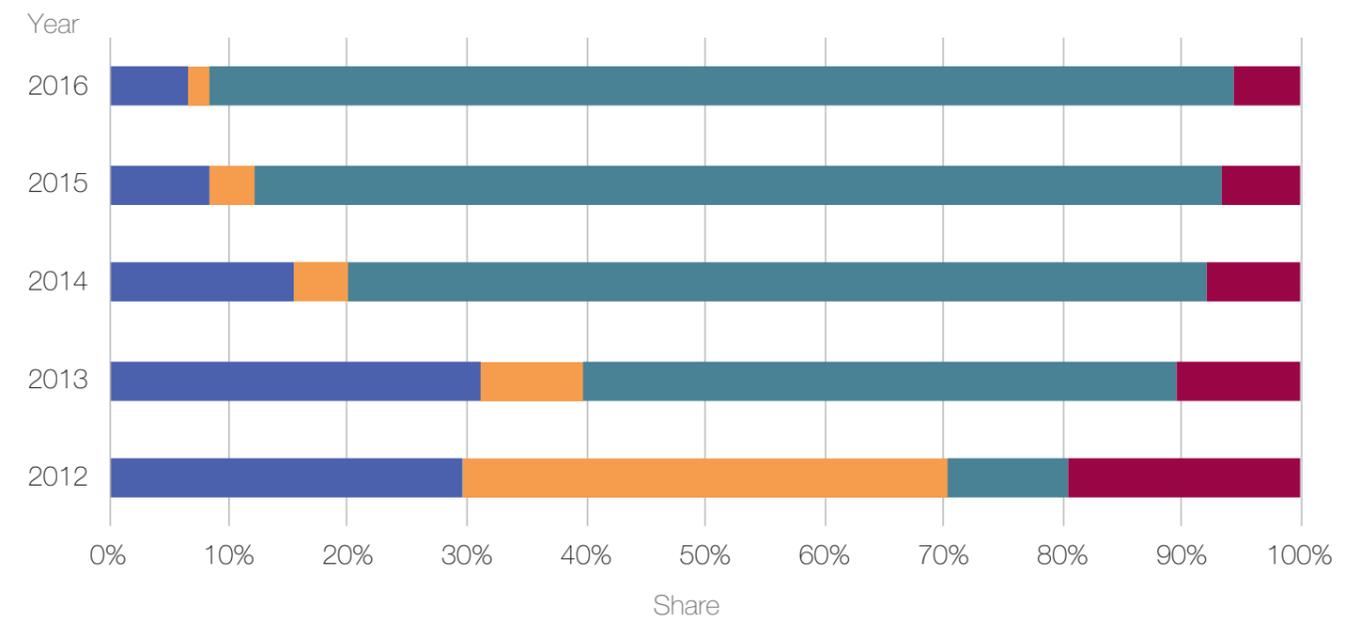

Dedicated and motivated employees are paramount to the success of our company.

Offering employees the chance to further develop their skills set and taking on new responsibilities is important to us.

Our employees are also strongly encouraged to propose new products and services to market and ideas on how to further improve our internal processes.

Each year, all of our employees are asked to participate in the employee satisfaction survey with the aim to improve employee engagement, satisfaction, work processes, and management practices.

Corporate Responsibility

We publish an independent Communication on Progress (COP), disclosing our corporate responsibility policies, key actions and performance.

Throughout all aspects of our operations – from tendering to buy-back and disposal of products – we are committed to conduct our business in a responsible and lawful manner with respect for the wider economic, social and environmental impacts of our activities.

We strive to promote the same principles and values underlying our business in our relationships with customers, suppliers and business partners.

We are fully committed to reducing the impacts of our operations and business activities on the environment through the mitigation of natural resource depletion and pollution.

We respect internationally recognised human rights and work to ensure that we do not contribute to human rights violations as a result of our global business activities.

We work against all forms of corruption in accordance with the law and the fundamental values of our company. We are committed to working effectively towards the elimination of facilitation payments in line with relevant international standards.

As a major supplier of products and services to various UN agencies, the UN's Sustainable Development Goals (SDGs) are very important to us and we do our best to contribute to the fulfilment of the SDGs most relevant to our businesses. Of the 17 SDGs established and agreed upon globally, we currently aim to help fulfil the following SDGs through our business conduct:

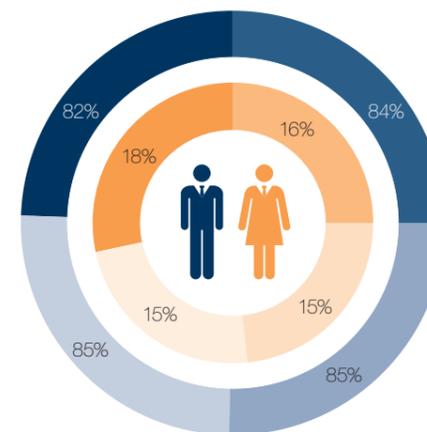

By supporting national election commissions worldwide with our electoral products, we aim to promote democracy through free and fair elections.

By optimising our own operations and working closely with our partners we aim to ship the vast majority of our goods by sea to reduce our carbon footprint.

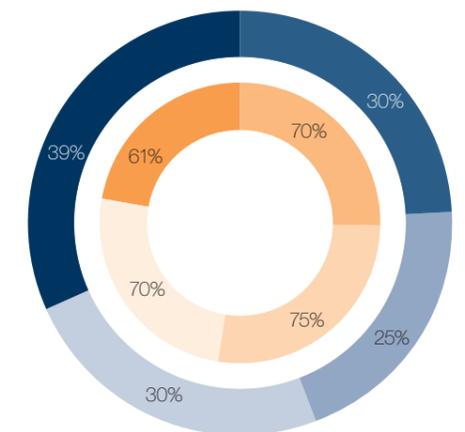

By collaborating with partners on the correct management, transport and disposal of hazardous material, such as our indelible ink products, we help our customers protect the environment.

Statement by the Management

Today, the Board of Directors and the Executive Board presented the Annual Report for 2016 of Copenhagen Group A/S.

The Annual Report has been presented in accordance with the Danish Financial Statements Act.

We find the accounting policies applied appropriate, and the Annual Report therefore gives a true and fair view of the Company's assets, liabilities and equity, financial position and results.

In our opinion, the Management's Review includes a true and fair description of the matters mentioned in the review.

We recommend that the Annual Report be approved at the Annual General Meeting.

Independent Auditor's Report

To the Shareholders of Copenhagen Group A/S

Opinion

We have audited the consolidated annual accounts and the annual accounts of Copenhagen Group A/S for the financial year 1 January to 31 December 2016, which comprise accounting policies used, profit and loss account, balance sheet, statement of changes in equity, cash flow statement and notes, consolidated and for the company respectively. The consolidated annual accounts and the annual accounts are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated annual accounts and the annual accounts give a true and fair view of the assets, liabilities and financial position, consolidated and for the company respectively at 31 December 2016 and of the results of the company's operations and cash flows, consolidated and for the company respectively for the financial year 1 January to 31 December 2016 in accordance with the Danish Financial Statements Act.

Basis for Opinion

We conducted our audit in accordance with international standards on auditing and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the below section "Auditor's responsibilities for the audit of the consolidated annual accounts and the annual accounts". We are independent of

the company in accordance with international ethics standards for accountants (IESBA's Code of Ethics) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these standards and requirements. We believe that the audit evidence obtained is sufficient and appropriate to provide a basis for our opinion.

The Management's Responsibilities for the Consolidated Annual Accounts and the Annual Accounts

The management is responsible for the preparation of consolidated annual accounts and annual accounts that give a true and fair view in accordance with the Danish Financial Statements Act. The management is also responsible for such internal control as the management determines is necessary to enable the preparation of consolidated annual accounts and annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated annual accounts and the annual accounts, the management is responsible for evaluating the group's and the company's ability to continue as a going concern, and, when relevant, disclosing matters related to going concern and using the going concern basis of accounting when preparing the consolidated annual accounts and the annual accounts, unless the manage-

ment either intends to liquidate the group or the company or to cease operations, or if it has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated Annual Accounts and the Annual Accounts

Our objectives are to obtain reasonable assurance about whether the consolidated annual accounts and the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report including an opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with international standards on auditing and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements may arise due to fraud or error and may be considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions made by users on the basis of the consolidated annual accounts and the annual accounts.

As part of an audit conducted in accordance with international standards on auditing and the additional requirements applicable in Denmark, we exercise professional evaluations and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement in the consolidated annual accounts and the annual accounts, whether due to fraud or error, design and perform audit procedures in response to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than the risk of not detecting a misstatement resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of the internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group's and the company's internal control.
- Evaluate the appropriateness of accounting policies used by the management and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of the management's preparation of the consolidated annual accounts and the annual accounts being based on the going concern principle and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may raise significant doubt about the group's and the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated annual accounts and the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the group and the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the consolidated annual accounts and the annual accounts, including the disclosures in the notes, and whether the consolidated annual accounts

and the annual accounts reflect the underlying transactions and events in a manner that gives a true and fair view.

- Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or the business activities within the group to express an opinion on the consolidated annual accounts. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in the internal control that we identify during our audit.

Statement on the Management's Review

The management is responsible for the management's review.

Our opinion on the consolidated annual accounts and the annual accounts does not cover the management's review, and we do not express any kind of assurance opinion on the management's review.

In connection with our audit of the consolidated annual accounts and the annual accounts, our responsibility is to read the management's review and in that connection consider whether the management's review is materially inconsistent with the consolidated annual accounts and the annual accounts or our knowledge obtained during the audit, or whether it otherwise appears to contain material misstatement.

Furthermore, it is our responsibility to consider whether the management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we believe that the management's review is in accordance with the consolidated annual accounts or the annual accounts and that it has been prepared in accordance with the requirements of the Danish Financial Statement Acts. We did not find any material misstatement in the management's review. Copenhagen, 20 April 2017

19. Mortgage and securities

As security for mortgage debts, tDKK 1,140, mortgage has been granted on land and buildings representing a book value of tDKK 1,748 at 31 December 2016

For bank debts, tDKK 14.774, the company has provided security in company assets representing a nominal value of tDKK 18.500. This security comprises the below assets, stating the book values:

| | |
|------------------------------------|-------------|
| Inventories | tDKK 8,634 |
| Receivable from sales and services | tDKK 17,868 |
| Other plants | tDKK 4,280 |

20. Contingencies

Contingent assets

Copenhagen Group A/S has a negative basis for tax calculation of tDKK 8,766, which represents a tax value of tDKK 1.929 at the 2016 Danish corporate tax rate 22%. This basis stems from past losses as well as postponed tax depreciations and tax amortizations. This deferred tax asset is booked with a value of tDKK 397, which is the minimum value that is expected to be realized within the next three fiscal years profit.

Contingent liabilities

Recourse guarantee commitments.

The company has provided guarantees for the bank debts of the group enterprises. On 31 December 2016 the total bank debts of the group enterprises were DKK 14,774.

All amounts in DKK.

Notes

Contingencies (continued)

Joint taxation

Handwerk Holding A/S, company reg. no 33055889 being the administration company, the company is subject to the Danish scheme of joint taxation and unlimited jointly and severally liable with the other jointly taxed companies for the total corporation tax.

The company is unlimited jointly and severally liable with the other jointly taxed companies for any obligation to withhold tax on interest, royalties and dividends.

Any subsequent adjustments of corporate taxes or withheld taxes etc. may cause changes in the company's liabilities.

Accounting Policies

The annual report for Copenhagen Group A/S is presented in accordance with those regulations of the Danish Financial Statements Act concerning companies identified as class C enterprises (medium sized enterprises).

The accounting policies used are unchanged compared to last year, and the annual accounts are presented in Danish kroner (DKK).

Recognition and Measurement in General

Income is recognised in the profit and loss account concurrently with its realisation, including the recognition of value adjustments of financial assets and liabilities. Likewise, all costs, these including depreciation, amortisation, writedown, provisions, and reversals which are due to changes in estimated amounts previously recognised in the profit and loss account are recognised in the profit and loss account.

Assets are recognised in the balance sheet when the group is liable to achieve future, financial benefits and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when the group is liable to lose future, financial benefits and the value of the liability can be measured reliably.

At the first recognition, assets and liabilities are measured at cost. Later, assets and liabilities are measured as described below for each individual accounting item.

Certain fixed asset investments and liabilities are measured at amortised cost, by which method a fixed, effective interest is recognised

during the useful life of the asset or the liability. Amortised cost is recognised as the original cost with deduction of any payments and additions/deductions of the accrued amortisation of the difference between cost and nominal amount. In this way capital losses and capital profits are spread over the useful life.

At recognition and measurement, such predictable losses and risks are taken into consideration, which may appear before the annual report is presented, and which concerns matters existing on the balance sheet date.

The Consolidated Annual Accounts

The consolidated annual accounts comprise the parent company Copenhagen Group A/S and those group enterprises of which Copenhagen Group A/S directly or indirectly owns more than 50 % of the voting rights or in other ways has controlling interest. As it appears from the group chart, enterprises of which the group owns between 20 and 50 % of the voting rights and exercises considerable, but not controlling interest are considered associated enterprises.

By the consolidation, elimination of intercompany income and costs, shareholding, intercompany balances and dividends and realised and unrealised gains and losses from transactions among the consolidated enterprises takes place.

Equity interests in group enterprises are settled by the proportional share of the group enterprises' trade value of net assets and liabilities at the date of acquisition.

Newly acquired or newly established enterprises are recognised in the consolidated annual accounts as of the date of acquisition. Disposed or terminated enterprises are recognised in the consolidated annual accounts until the date of disposal. In relation to newly acquired, disposed or terminated enterprises, comparative figures are not adjusted.

In connection with the acquisition of new enterprises, the acquisition method is applied, by which the acquirees' identifiable assets and liabilities are measured at fair value at the time of acquisition. Costs for restructuring which are recognised in the acquiree before the acquisition date and which have not been agreed upon as part of the acquisition, are recognised in the pre-acquisition balance sheet and thereby forms part of the measurement of goodwill. Restructuring decided by the acquiree is recognised in the profit and loss account. The tax effect of the revaluations carried out is taken into consideration.

Positive balances (goodwill) between cost and fair value of the acquired, identifiable assets and liabilities, including provisions for restructuring, are recognised under intangible fixed assets and in accordance with an individual evaluation allocated on a systematic basis over their useful lives in the profit and loss account. Negative balances (negative goodwill) is recognised as income in the profit and loss account at the date of acquisition when the general requirements for recognition of income are met.

Goodwill and negative goodwill from acquirees may be adjusted until 12 months after the acquisition

Gains or losses from the disposal or termination of group enterprises or associated enterprises are recognised as the difference between the sales price or the termination sum and the book value of the net assets at the sales date and expected costs of sale or termination.

In case of business combinations such as acquisition and sale of equity investments, mergers, demergers, addition of assets and exchange of shares etc. with participation of enterprises under the control of the parent company, the merger method is applied, in which case the merger is considered implemented on the first day of the financial year, and restatement of comparative figures is made.

Minority Interests

The items of the group enterprises are recognised by 100 % in the consolidated annual accounts. The minority interests' proportionate share of the profit or loss and the equity of the group enterprises are adjusted annually, and they are recognised as a separate item below the profit and loss account and as a separate item in the balance sheet respectively.

THE PROFIT AND LOSS ACCOUNT

Net turnover

The net turnover is recognised in the profit and loss account if delivery and risk transfer to the buyer have taken place before the end of the year, and if the income can be determined reliably and is expected to be received. The net turnover is recognised exclusive of VAT and taxes and with the deduction of any discounts granted in connection with the sale.

Contract work in progress concerning construction contracts is recognised concurrently in the net turnover with the progress of the production. Thus the net turnover corresponds to the sales value of the completed productions of the year (the production method). The net turnover is recognised when the total income and costs of the contract and the scope of completion on the balance sheet date can be determined reliably, and when it is likely that the financial benefits will be received by the company.

When the results of a contract can not be determined reliably, the net turnover is only recognised on a cost basis, however, to the extent that it is probable that the costs will be recovered.

Cost of Sales

Costs of sales includes costs for the purchase of raw materials and consumables less discounts and changes in inventories.

Other External Costs

Other external costs comprise costs for distribution, sales, advertisement, administration, premises, loss on debtors, and operational leasing costs.

Staff Costs

Staff costs include salaries and wages including holiday allowances, pensions and other costs for social security etc. for staff members. Staff costs are less public reimbursements.

Depreciation, Amortisation and Writedown

Depreciation, amortisation and writedown comprise depreciation on, amortisation of and writedown relating to intangible and tangible fixed assets respectively.

Net Financials

Net financials comprise interest, realised and unrealised capital gains and losses concerning financial assets and liabilities, amortisation of financial assets and liabilities, additions and reimbursements under the Danish tax prepayment scheme, etc. Financial income and expenses are recognised in the profit and loss account with the amounts that concerns the financial year.

Interest and other costs concerning loans for financing the production of intangible and tangible fixed assets and concerning the production period are not recognised in the cost of the fixed asset.

Results from Equity Investments in Group Enterprises

After full elimination of intercompany profit or loss and deduction of amortisation of consolidated goodwill, the equity investment in the individual group enterprises are recognised in the profit and loss account at a proportional share of the group enterprises' results after tax.

Tax of the Results for the Year

The tax for the year comprises the current tax for the year and the changes in deferred tax, and it is recognised in the profit and loss account with the share referring to the results for the year and directly in the equity with the share referring to entries directly on the equity. The parent enterprise and the Danish group

enterprises are subject to the Danish rules on compulsory joint taxation of the consolidated Danish enterprises.

The current Danish corporate tax is allocated among the jointly taxed companies in proportion to their respective taxable income (full allocation with reimbursement of tax losses).

THE BALANCE SHEET

Intangible Fixed Assets Intellectual Property

Acquired software and intellectual property is measured at cost price less accumulated amortization and is amortized by the straight-line method over the expected useful life estimated to three to five years.

Tangible Fixed Assets

Tangible fixed assets are measured at cost with deduction of accrued depreciation and writedown. Land is not depreciated.

The basis of depreciation is cost with deduction of any expected residual value after the end of the useful life of the asset. The amortisation period and the residual value are determined at the acquisition date and reassessed annually. If the residual value exceeds the book value, the amortisation discontinues.

If the amortisation period or the residual value is changed, the effect on amortisation will in the future be recognised as a change in the accounting estimates.

The cost comprises the acquisition cost and costs directly attached to the acquisition until the time when the asset is ready for use. The cost of a total asset is divided into separate components. These components are depreciated separately, the useful lives of each individual components differing.

Depreciation takes place on a straight line basis and based on an evaluation of the expected useful life:

| | |
|--|-----------|
| Buildings, Denmark | 75 years |
| Technical plants and machinery | 3-5 years |
| Other plants, operating assets, fixtures and furniture | 3-5 years |

Minor assets with an expected useful life of less than 1 year are recognised as costs in the profit and loss account in the year of acquisition.

Profit or loss deriving from the sales of tangible fixed assets is measured as the difference between the sales price reduced by the selling costs and the book value at the time of the sale. Profit or losses are recognised in the profit and loss account as other operating income or other operating expenses.

As regards assets of own production, the cost comprises direct and indirect costs for materials, components, deliveries from sub-suppliers, payroll costs, and borrowing costs form specific and general borrowing concerning the construction of each individual asset.

FINANCIAL FIXED ASSETS

Equity Investments in Group Enterprises

Equity investments in group enterprises are recognised in the balance sheet at a proportional share under the equity method, the value being calculated on the basis of the accounting policies of the parent company by the deduction or addition of unrealised intercompany profits and losses, and with the addition or deduction of residual value of positive or negative goodwill measured by applying the acquisition method.

Group enterprises and associated enterprises with negative equity are recognised without any value, and to the extent they are considered irrevocable, amounts owed by these companies are written down by the parent's share of the equity. If the negative equity exceeds the debtors, the residual amount is recognised under liability provisions to the extent the parent has a legal or actual liability to cover the negative equity of the subsidiary.

To the extent the equity exceeds the cost, the net revaluation of equity investments in group enterprises are transferred to the reserves under the equity for net revaluation as per the equity method. Dividends from group enterprises expected to be decided before the approval of this annual report are not subject to a limitation of the revaluation reserves. The reserves are adjusted by other equity movements in group enterprises.

Newly taken over or newly established companies are recognised in the annual accounts as of the time of acquisition. Sold or liquidated companies are recognised at the time of cession.

Profit or loss in connection with the sale of group enterprises are measured as the

difference between the sales amount and the book value of net assets at the time of the sale, inclusive of remaining consolidated goodwill and expected costs for sale and cession. Profit and loss are recognised in the profit and loss account under net financials.

In connection with the acquisition of new group enterprises and associated enterprises, the acquisition method is applied, by which the acquirees' assets and liabilities are measured at fair value at the time of acquisition. Provisions for payment of costs for decided restructuring activities in the acquirees in relation to the acquisition are recognised. The tax effect of the revaluations carried out is taken into consideration.

Positive differences (goodwill) between cost and fair value of identifiable, acquired assets and liabilities, inclusive of liability provisions for restructuring, are recognised under equity investments in group enterprises, and they are amortised over their estimated useful life. The useful life is determined on the basis of the management's experience with the individual business areas. The amortisation period is maximum 20 years, being the longer for strategical acquirees with a strong market position and a long-range earnings potential. The book value of goodwill is evaluated currently and written down in the profit and loss account in those cases where the book value exceeds the expected future net income from the enterprise or the activity, to which the goodwill is attached.

Inventories

Inventories are measured at cost on basis of the FIFO method. In case the net realisable value of the inventories is lower than the cost, writedown takes place to this lower value.

The cost for trade goods, raw materials, and consumables comprises the acquisition cost with the addition of the delivery costs.

The cost for manufactured goods and works in progress comprises the cost for raw materials, consumables, direct wages, and indirect production costs. Indirect production costs comprise indirect materials and wages, maintenance of and depreciation on machinery, factory buildings and equipment applied during the production process, and costs for factory administration and factory management. Borrowing costs are not recognised in cost.

The net realisable value for inventories is recognised as the market price with deduction of completion costs and selling costs. The net realisable value is determined taking into consideration the negotiability, obsolescence, and development of the expected market price.

Debtors

Debtors are measured at amortised cost which usually corresponds to face value. In order to meet expected losses, writedown takes place at the net realisable value.

Work in Progress for the Account of Others

Contract work in progress is measured at the selling price of the work performed, however with deduction of invoicing on account and expected losses. Contract work in progress is characterised by the manufactured goods featuring a high level of individualisation in the design. Furthermore, it is a requirement that before work is commenced, a binding contract is to be entered into, implying penalty or damages in case of subsequent cancellation.

The selling price is measured on the basis of the stage of completion on the balance sheet date and the total expected income from the individual contracts. The stage of completion is determined on the basis of an evaluation of the work performed, usually determined as the ratio of the costs incurred to the total expected cost of the contract in question.

When it is probable that the total contract costs will exceed the total contract revenue, the expected contract loss is immediately recognised as costs and provisions.

If the results of a contract can not be estimated reliably, the selling price is only recognised on a cost basis, however, to the extent that it is probable that the costs will be recovered.

Contracts for which the selling price of the work performed exceeds invoicing on account and expected losses are recognised as trade debtors. Contracts for which invoicing on account and expected losses exceed the selling price are recognised as liabilities.

Prepayments from customers are recognised under liabilities.

Costs in connection with sales work and the achievement of contracts are recognised in the profit and loss account when incurred.

FPT Industrial Distributor
Copenhagen Global has entered into an agreement for Denmark and Greenland for the supply and maintenance of FPT Industrial powertrains for on-road, off-road, marine and power generation applications, including spare parts.

FPT One-Engine Concept for Marine Segment

Accrued Income and Deferred Expenses

Accrued income and deferred expenses recognised under assets comprise incurred costs concerning the next financial year.

Available Funds

Available funds comprise cash at bank and in hand.

EQUITY**Dividend**

Dividend expected to be distributed for the year is recognised as a separate item under the equity. Proposed dividend is recognised as a liability at the time of approval by the general meeting (the time of declaration).

Corporate Tax and Deferred Tax

Current tax receivable and tax liabilities are recognised in the balance sheet at the amount calculated on the basis of the expected taxable income for the year adjusted for tax on previous years' taxable income and prepaid taxes. Tax receivable and tax liabilities are set off to the extent that legal right of set-off exists and if the items are expected to be settled net or simultaneously

According to the rules of joint taxation, Copenhagen Group A/S is unlimited, jointly and severally liable towards the Danish tax authorities for the total corporation tax, including withholding tax on interest, royalties and dividends, arising within the jointly taxed group of companies.

Deferred tax is measured on the basis of all temporary differences in assets and liabilities with a balance sheet focus.

Deferred tax is measured based on the tax rules and tax rates applying under the legislation on the balance sheet date and prevailing when the deferred tax is expected to be released as current tax.

Other Provisions

Provisions comprise expected costs for guarantee liabilities, loss on work in progress, restructuring, etc. Provisions are recognised when the group has a legal or actual liability which is due to a previous event and when it is likely that the settlement of the liability will result in expenditure of the financial resources of the group.

If the settlement of the liability is expected to take place in some remote future, provisions are measured at the net realisable value or at fair value.

Guarantee liabilities comprise liabilities for repairs within the guarantee period of 1-5 years. The provisions are measured at the net realisable value and recognised on basis of the obtained experience with guarantee work. If provisions have an expected due date later than 1 year from the balance sheet date, they are discounted at the average bond interest.

On the acquisition of enterprises, provisions for restructuring within the acquired enterprise is included in the acquisition cost, and thereby in the goodwill or the consolidated goodwill, to the extent that they have been approved and announced on the date of acquisition at the latest.

When it is likely that the total costs will exceed the total income of work in progress for the account of others, provisions are made for the total loss expected on the contract. Provisions are recognised as costs under production costs.

Liabilities

Financial liabilities related to borrowings are recognised at the received proceeds with the deduction of transaction costs incurred. In following periods, the financial liabilities are recognised at amortised cost, corresponding to the capitalised value by use of the effective interest. The difference between the proceeds and the nominal value is recognised in the profit and loss account during the term of the loan.

Mortgage debt and bank debt are for instance measured at amortised cost. As to cash loans, this corresponds to the outstanding debt of the loan. For bond loans, the amortised cost corresponds to an outstanding debt calculated as the underlying cash value at the date of borrowing adjusted by amortisation of the market value adjustment on the date of the borrowing carried out over the repayment period.

Also capitalised residual leasing liabilities in connection with financial leasing contracts are recognised in the financial liabilities.

Liabilities relating to investment properties are measured at amortised cost.

Other liabilities are measured at amortised cost which usually corresponds to the nominal value.

THE CASH FLOW STATEMENT

The cash flow statement shows the cash flow of the group and the parent enterprise for the year, divided in cash flows deriving from operating activities, investment activities, and financing activities respectively, the changes in the liabilities, and the available funds at the beginning and the end of the year respectively.

The effect of cash flow deriving from purchase and sale of enterprises appears separately under cash flow from investment activities. In the cash flow statement, cash flow deriving from purchased enterprises is recognised as of the date of acquisition, and cash flow deriving from sold enterprises is recognised until the sales date.

Cash Flow from Operating Activities

Cash flow from operating activities are calculated as the results for the year adjusted for non-cash operating items, the change in the working capital, and corporate tax paid.

Cash Flow from Investment Activities

Cash flow from investment activities comprises payments in connection with the acquisition and sale of enterprises and activities as well as the acquisition and sale of intangible and tangible fixed assets and fixed asset investments respectively.

Cash Flow from Financing Activities

Cash flow from financing activities comprises changes in the size or the composition of the share capital and the costs in this connection. Furthermore, these activities comprise borrowings, instalments on interestbearing debt, and payment of dividend to the shareholders.

Available Funds

Available funds comprise cash funds and short-term securities with a term of less than 3 months which can easily be converted into cash funds and on which only an insignificant risk of value changes exists.
