Why to choose VIVAX?

VIVAX Air Conditioners started their path in the market 17 years ago, and their owe their success to a smart development policy, top quality air conditioners and perfect design, the value of which has been confirmed by various awards and recognitions. The group of professionals who chose VIVAX in the category of Air Conditioners, in their job highly appreciates the reliability and high-tech component of the product.

VIVAX Air Conditioners are adapted to each target group, and are characterized by superior design for the most modern spaces to classic models for those who are more inclined to traditional decoration. Special emphasis was placed on energy efficiency, and thus on high standards in environmental protection.

VIVAX brings other features such as quiet operation when cooling and heating the room, and clean air, which is taken care of by numerous filters, is among the most important conditions for a comfortable stay in the room.

The Bio filter and ionizer purify the air and activate oxygen, thus improving air quality.

WI-FI AIR CONDITIONING MANAGEMENT

Access your air conditioner anytime, anywhere with the built-in Wi-Fi module and Vivax's NetHome® Plus air conditioning control app. With one touch on your mobile device, select the desired temperature, and walk into your perfectly chilled home in the summer months. In addition to turning on and off, you can set a timer via the mobile app, find out in which mode it works or diagnose a potential malfunction.

STAY COOL WITH STYLE - CHOOSE COLOR

In addition to all the above benefits of using Vivax air conditioners, special attention is paid to the design itself. Simplicity fits into any interior. And a great specificity on the market are the color air conditioners, so that you can breathe a touch of specialness into your home. Be different and be surprised how the unit will emphasize the uniqueness of the interior and give it a timeless beauty. Choose the room temperature that suits your wishes. Top performance brings freshness in the summer months and ensures energy efficient heating in the winter months.

WARRANTY

Warranty period for VIVAX AC is **36 months** with obligatory annual service performed by authorised service centre. Detailed information regarding warranty and list of authorised service centres can be found on vivax.com

Vivax history

- 2021 Present in more than 40 countries
- 2020 Heat Pumps
- 2019 Popular R design in new colors
R32 gas in all Vivax air conditioners
R290 gas in all Vivax portable air conditioners
Golden fin in all outdoor units
Qudal QUality meDAL – Award 2019/2020
- 2018 Seventh generation of Multi Split AC
Fifth generation of light commercial AC
Best Buy Award 2018/2019
- 2017 Development of the first -32 °C heating and cooling Air Conditioner, 73 available devices
- 2016 Sixth generation of multi split air conditioners
Fifth generation of light commercial air conditioners
65 devices available
- 2015 Fifth generation of multi split devices
Fourth generation of light commercial air conditioners
First Wi-Fi devices, 61 devices available
- 2014 Presentation of first super free match system
59 devices available
- 2013 Fourth generation of multi split air conditioners
Third generation of light commercial air conditioners
- 2011 Third generation of Multi Split Air Conditioners
- 2008 Second generation of light commercial and Multi Split Air Conditioners
- 2007 First ceiling and floor Air Conditioners
- 2006 First generation of Multi Split Air Conditioners and accessories
- 2005 First Inverter, Portable Air Conditioners and Cassette Type AC
- 2004 First Vivax Air Conditioners on the market

Vivax Technology contribute to health

Density pre filter can effectively prevent large particles such as pet hair, dust and other airborne particles. Bio HEPA filter can capture micro dust of less than $0.3\mu\text{m}$; effectively remove fungi, pollen and other harmful substances providing with fresh, clean and healthy air.

The ionizer removes and eliminates bacteria and viruses from the air, increases blood oxygen capacity, improves metabolism, increases concentration and alertness, eliminates fatigue, increases resistance to disease, has an extremely good effect against headaches, insomnia, constipation, allergies, asthma, and many other ailments.

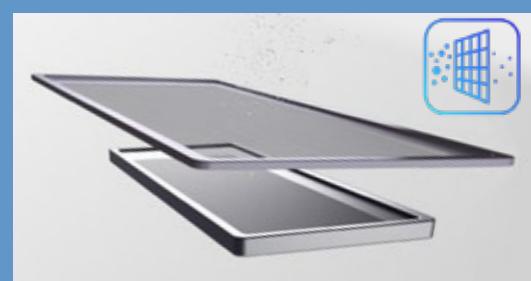

Bio filter

Dual filtration Tehnology

Bio HEPA filtration system removes airborne particles, like PM0.3 and other harmful substances, providing fresh, clean and healthy air for you. Density pre filter can effectively prevent large particles such as pet hair, dust and other airborne particles.

Silver Ion filter

Dual filtration Tehnology

Silver Ion filtration system effectively eliminates bacteria, fungi and other harmful substances from the air, effectively inhibits the further growth of these bacteria and other microbes. Density pre filter can effectively prevent large particles such as pet hair, dust and other airborne particles. The Silver ion effectively and continuously sterilizes bacteria and controls the growth of harmful microbes by destroying their inner-configuration and absorbing the cells elements. Ensure that the bacteria cell won't harm the air surrounding it.

Ionizer

Negatively charged ions bind to pollutants and allergens, which are positively charged. The newly formed larger particles fall to the ground and are removed from the air we breathe, and cannot reach your respiratory tract.

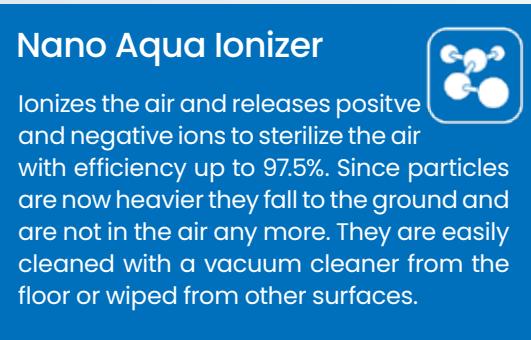

In short, negative ions destroy bacteria, vitalize our cells, increase blood oxygen capacity, improve metabolism, increase concentration and alertness, eliminate fatigue, increase resistance to disease, have an extremely good effect against headaches, insomnia, constipation, allergies, asthma, and many other ailments.

Catalist filter

Dual filtration Tehnology

ColdCatalystfiltration system thoroughly eliminates harmful substances and decomposes a variety of harmful gases, providing clean and healthy air for you.

Nano Aqua Ionizer

Ionizes the air and releases positve and negative ions to sterilize the air with efficiency up to 97.5%. Since particles are now heavier they fall to the ground and are not in the air any more. They are easily cleaned with a vacuum cleaner from the floor or wiped from other surfaces.

3D DC INVERTER
SUPERIOR PERFORMANCE
TO MEET INFINITE
CHALLENGES

Function description

3D Inverter

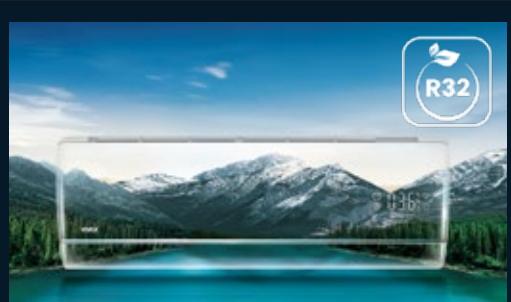

The exclusive inverter technology empowers Vivax inverter compressor to deliver best-in-class performance, operating powerfully, efficiently, speedily and steadily under all conditions and at all time.

A+++ in heating and cooling

ULTRA-HIGH ENERGY EFFICIENCY
VIVAX Y DESIGN

Y DESIGN series is equipped with ultra-high end energy efficiency technology. You can indulge in comfortable warmth/coolness while significantly reducing energy consumption. A+++ energy efficiency class confirms it.

R32 is an HFC refrigerant that many air conditioning manufacturers are adopting for its performance in regards to the environment, energy consumption, efficiency and safety. Compared to R410A, R32 has a GWP (Global Warming Potential) of 675 – about 30% lower. Both refrigerants have an ODP (Ozone Depletion Potential) of 0. R32 systems use up to 20% less refrigerant than R410A, making them more efficient and cost less to operate

Mute Operation

Want to turn off the AC beep and display? By pressing mute operation, VIVAX AC helps you to make a quiet atmosphere and comfortable environment.

WiFi Air Conditioner Control

Access your air conditioner anytime, anywhere with the built-in Wi-Fi module and Vivax's NetHome® Plus air conditioning control app. With one touch on your mobile device, select the desired temperature, and walk into your perfectly chilled home in the summer months. In addition to turning on and off, you can set a timer via the mobile app, find out in which mode it works or diagnose a potential malfunction.

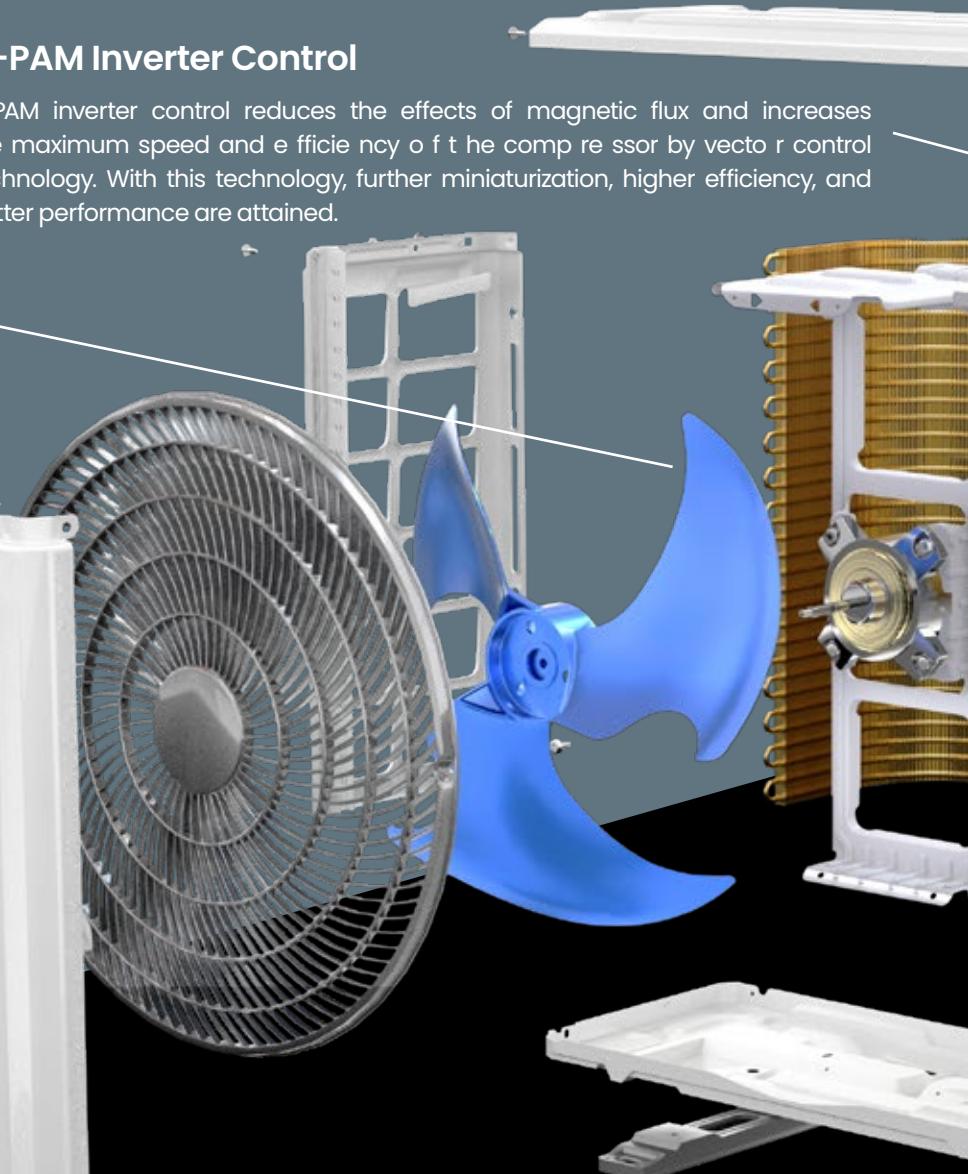

Bionic Blower Wheel and Improved Air Duct

Based on natural models and bionic principles, Vivax fan blade design can effectively reduce airflow resistance and noise. Together with the optimized air duct, it deliver the same air flow volume with 30% less energy consumption.

V-PAM Inverter Control

V-PAM inverter control reduces the effects of magnetic flux and increases the maximum speed and efficiency of the compressor by vector control technology. With this technology, further miniaturization, higher efficiency, and better performance are attained.

Twin-Rotary Compressor

A densely serrated shape has been applied to the copper to enlarge the heat exchange area. The latest heat exchanger has increased the tooth-count from 45 to 54, further improving the efficiency of heat transfer.

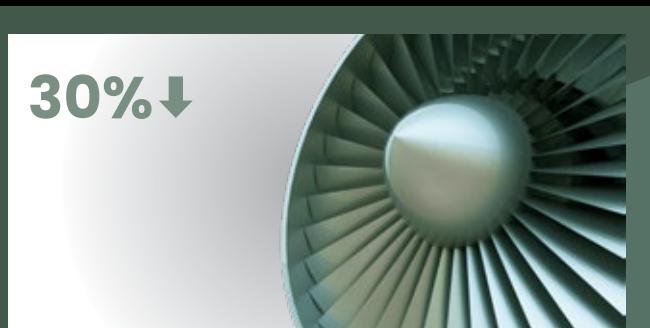

Twin-Rotary Compressor

The Twin-Rolling compressor system rotating with 180° symmetrical balance which ensure low vibration & noise due to the small torque.

The Golden Fin technology

The Golden Fin technology is more resistant to water rust, adherent grease, oxidation and other corrosive elements than ordinary blue fins for heat exchanger (one of the core components of the AC indoor unit) to furnish steadier cooling performance in a longer duration.

HIGH-EFFICIENCY FAN BLADES AND AIR PASSAGE

Less Energy Consumption Based on bionic principle, Midea's optimized fan blade design can effectively work against airflow resistance and reduce noise. Together with the optimized air passage, it delivers the same airflow volume with 30% less energy.

Heating and cooling down to -32°C

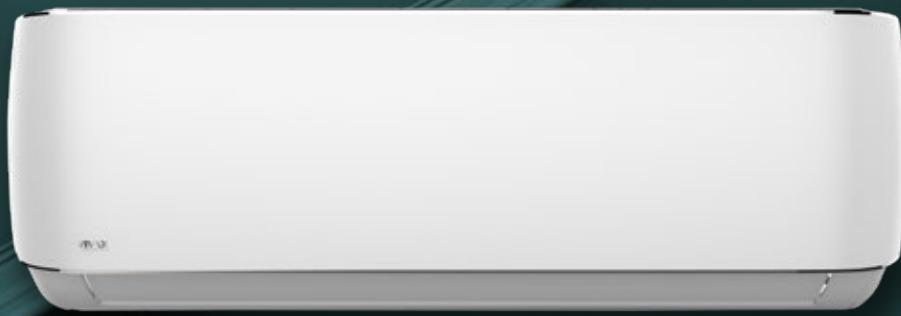

Advanced inverter technology has given this device an opportunity to function efficiently in very extreme weather conditions. You can warm up Your home even if the outside temperature is -32°C, working with 100% of declared capacity on -15°C. Device is also efficiently cooling on low outside temperatures, even down to -32 °C.

Movement detector

The motion sensor tracks your needs to create the atmosphere of your choice with a wireless connection.

Wi-Fi Ready

The I-design series allows you to control air conditioner wherever you are, with the addition of Wi-Fi module. V-Smart does not only focus on management, but delivers a complete solution with a view to the everyday needs of the average consumer

Whispering air

20 dB(A)

Quiet operation is equally important to have the inner peace of mind. Just enjoy both of them with Vivax whispering air quiet to 20 dB(A).

Heat Pump

Heating pump system is an excellent alternative for the traditional electrical heating system, as the former can provide more heating capacity and is more efficient. Moreover, thanks to the air circulating faster throughout the room, this heating system guarantees comfortable hot air much faster.

Air Guardian

Advanced Air Guardian technology keeps your family safe by releasing trillions of positive and negative ions to effectively kill bacteria, viruses and other harmful particles. Guard the air you breathe.

Higher Energy Efficiency

Intelligent on-off technology enables Vivax air conditioners to automatically enter energy-saving mode when on standby mode, lowering energy consumption from conventional 2W to 0.5W which counts for 75% of saving.

Multi split - DC Inverter Systems

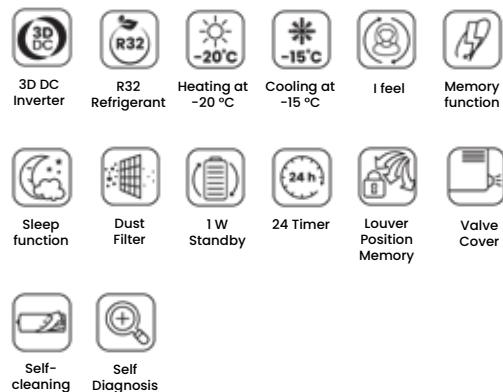

Ideal solution for conditioning of your business or residential premises. All devices are designed to please users and space requests regarding cooling and heating. New technological solutions enable high power efficiency of particular inverter system under all climate conditions, whether used for cooling or heating.

Wide capacity range of outdoor units (from 4.00 – 12.31 kW) and possibility to connect maximum 5 indoor units allows far-reaching of this devices, emphasizing commercial and residential premises. The maximum length of installation is 80 m which allows easy positioning of device regarding relation of outdoor unit and external object dimensions. Therefore, it is now very simple to position outdoor unit on the roof or on the backside of object without affecting the exterior appearance. Indoor units come in four different types: Wall Mounted, Cassette Floor-Ceiling and Floor IU. It is possible to choose between 11 different indoor units with capacity range: 2.22 – 7.03 kW. Attractive design and low noise level will provide comfortable atmosphere.

Apartments, flats, family houses, office space, shops, restaurants and special purpose facilities are just a part of spaces that Vivax multi split DC Inverter devices can heat or cool.

Durability of this device, acceptable price and A++ class of energy efficiency are guarantee of the best choice, which puts Vivax multi split DC Inverter among the leading air conditioners in this segment.

HEAT PUMPS

Total solution for heating, cooling
and domestic hot water

Introduction

How air source heat pump works

Heat pump units are capable of extracting heat from the surrounding air and transferring this heat indoors for space heating and domestic

Stage One

As the refrigerant passes through the expansion valve and expands, its temperature and pressure both drop.

Stage Two

With the temperature of the refrigerant being lower than the ambient temperature, heat passes from the air flowing over the air side heat exchanger to the refrigerant and the refrigerant evaporates.

Stage Three

When the refrigerant vapor passes through the compressor its pressure increases and its temperature rises above that of the water in hydronic system.

Stage Four

As the hot vapor refrigerant passes through the water side heat exchanger it heats the water in the hydronic system, which is then pumped indoors to the space heating terminals or hot water tank. The refrigerant cools and condenses and then ready to return to the expansion valve to start the cycle again.

Split system

Split system	<p>The diagram shows a cross-section of a two-story house. Inside, various rooms are shown with heating and cooling equipment. Labels point to different components: 'User interface (external, apply to SMK)' points to a control panel; 'Solar panel' points to a solar panel on the roof; 'Low temperature radiator' points to a radiator; 'Under-floor heating' points to a heating coil in the floor; 'Outdoor unit' points to the external unit on the ground; 'Hydronic box SMK' points to an indoor unit; 'Hydronic box SMKTT' points to another indoor unit; and 'Domestic hot water tank (external, apply to SMK)' points to a tank. Arrows indicate the flow of refrigerant and water through the system.</p>
Application	Heating + Cooling + Domestic hot water
Structure type	Split (Heat pump and hydronic box are independent)
Refrigerant piping	Between heat pump unit (outdoor) and hydronic box (indoors)
Water piping	Between hydronic box and indoor heating appliances
Installation	Refrigerant piping and water piping
Combinational parts (field supplied)	Under-floor heating loops Fan coil units Low temperature radiators Domestic hot water tank(external, apply to SMK) Auxiliary heat sources (such as water heaters and boilers)

Split type outdoor unit The outdoor unit absorbs heat from the outside air and transfers it inside through the refrigerant piping.

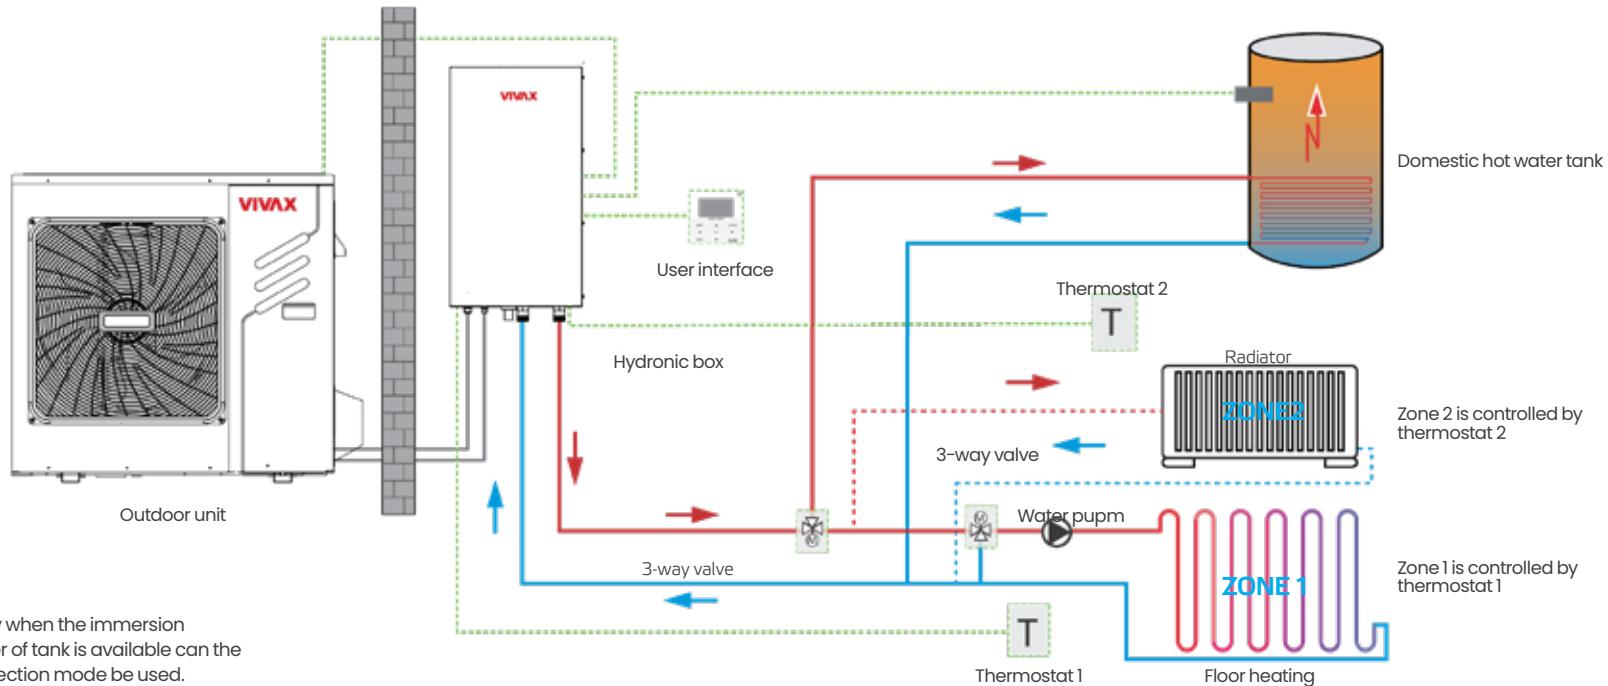

Hydronic box The hydronic box heats the water by refrigerant from outdoor unit. The heated water circulates through heating apparatus such as floor heating, radiators, fan coil units as well as inner coil of domestic hot water tank.

Domestic hot water tank Hot water from the Split unit is circulated around the domestic hot water tank's heating water coil, heating the domestic hot water inside the tank. Immersion heaters are often installed in domestic hot water tanks as a backup.

User interface User interface is connected to the Split unit through signal wire. It mainly uses for ON/OFF the unit, mode setting, temperature adjusting and timer setting.

User interface

- newly designed touch-key wiRed controller
- check running parameters in real time
- communication wire length up to 50m

- built-in temperature sensor
- built-in wifi module (For R32 series)
- multiple languages (For R32 series)
- modbus protocol and network flexibility

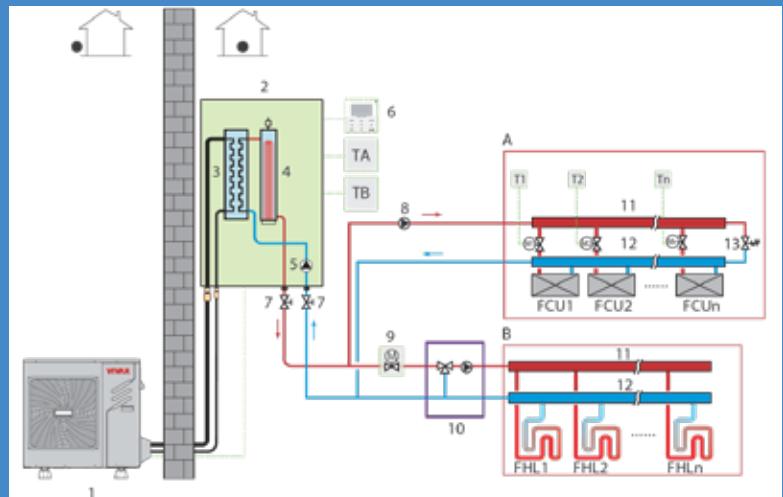

Total heat solution | Typical applications

Take an example as R32 Split combine with SMK

Application 1

Space Heating Through Floor Heating Loops and Fan Coil Units

The floor heating loops and fan coil units require different operating water temperatures. To achieve these two set points, a mixing station is required. Room thermostats for each zone are optional.

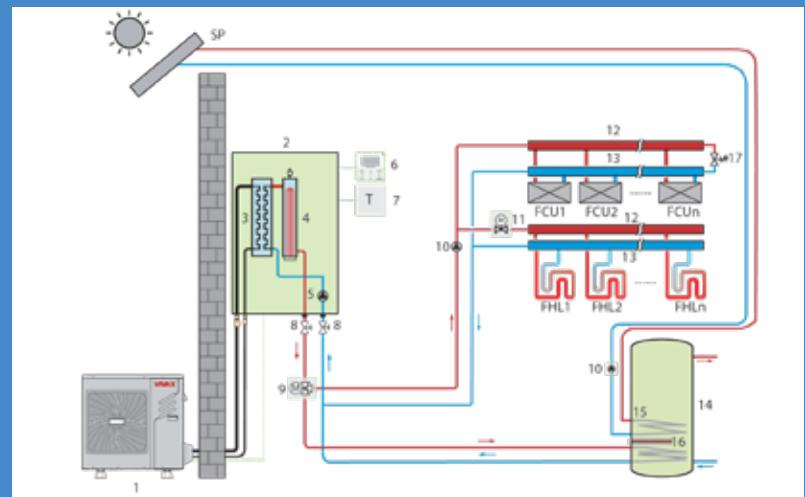

- 1 Outdoor unit
- 2 Hydronic box
- 3 Plate heat exchanger
- 4 Backup electric heater (optional)
- 5 Internal circulator pump
- 6 User interface
- 7 Stop valve (field supplied)
- 8 External circulator pump (field supplied)
- 9 Motorized 2-way valve (field supplied)
- 10 Mixing station (field supplied)
- 11 Distributor (field supplied)
- 12 Collector (field supplied)
- 13 Bypass valve (field supplied)
- FHL1...n Floor heating loops (field supplied)
- FCU1...n Fan coil units (field supplied)
- M1...n Motorized valves (field supplied)
- T1...n Room thermostats (field supplied)
- TA Zone A thermostat (field supplied)
- TB Zone B thermostat (field supplied)

Application 2

Space Heating, Space Cooling and Domestic Hot Water Compatible with Solar Water Heater

Floor heating loops and fan coil units are used for space heating and fan coil units are used for space cooling. Domestic hot water is supplied from the domestic hot water tank connected to both the hydronic box and solar water heater. The unit switches to heating or cooling mode according to the temperature detected by the room thermostat. In space cooling mode, the 2-way valve is closed to prevent cold water entering the floor heating loops.

- 1 Outdoor unit
- 2 Hydronic box
- 3 Plate heat exchanger
- 4 Backup electric heater (optional)
- 5 Internal circulator pump
- 6 User interface
- 7 Room thermostat
- 8 Stop valve (field supplied)
- 9 Motorized 3-way valve (field supplied)
- 10 External circulator pump (field supplied)
- 11 Motorized 2-way valve (field supplied)
- 12 Distributor (field supplied)
- 13 Collector (field supplied)
- 14 Domestic hot water tank (field supplied)
- 15 Heat exchanger coil
- 16 Immersion heater
- 17 Bypass valve (field)
- FHL1...n Floor heating loops (field supplied)
- FCU1...n Fan coil units (field supplied)
- SP Solar panel

	Water outlet at 55°C	Class	A++							Capacity steps	1/3	1/3	1/3			
									Power supply	3 kW	V/Ph/Hz	220-240/1/50				
										9 kW		380-415/3/50				
Room temperature range									DHW(tank)		°C	5-35				
									Cooling		°C	5-25				
									Heating		°C	25-65				
									DHW(tank)		°C	30-60				

Notes:

1. Evaporator air in 7°C, 85% R.H., Condenser water in/out 30/35°C

2. Evaporator air in 7°C, 85% R.H., Condenser water in/out 40/45°C

3. Evaporator air in 7°C, 85% R.H., Condenser water in/out 47/55°C

4. Condenser air in 35°C, Evaporator water in/out 23/18°C

5. Condenser air in 35°C, Evaporator water in/out 12/7°C

6. Seasonal space heating energy efficiency class testes in average climate general conditions.

7. Relevant EU standards and legislation: EN14511; EN14825; EN50564; EN12102; (EU) No 811/2013; (EU) No 813/2013; OJ 2014/C 207/02/2014.

Notes:

1. Testing standard: EN12102-1.

2. For three phase type backup electric heater, 3/6kW can be achieved by changing DIP switch when hydronic box is equipped with 9kW.
