2023

# VISION AND PURPOSE

Our company has a singular focus on blockchain and Cryptocurrencies. Our goal is to bring businesses on to the blockchain. We intend to add value by using blockchain's innovative characteristics such as transparency, decentralization, immutability and automation. We also create products for the betterment of the blockchain ecosystems.

---

## APPLICATIONS IN BLOCKCHAIN

Blockchain Technology can be used in virtually all industries and has a vast array of use cases. Some of these use cases are listed below:

- Supply Chain
- Energy Management and Sustainability
- Government Transparency
- Healthcare
- International Trades
- Media and Entertainment
- Payments
- Real estate
- Tokenization
- Gaming and E-sports
- NFTs
- Defi Finance
- Digital Identity

# PORTFOLIO

## dappfactory.xyz NO-CODE PLATFORM

There are a few staples that all projects need when thinking about tokenomics, liquidity and circulating supply. Many projects create their own which means projects need to allocate resources away from their central mission. By creating a no-code platform for these projects we save them time and money. Examples: Staking, Farming, IDO, Liquidity Locker, vesting, etc.

## unifidefi.com LENDING PROTOCOL

Unifi Defi protocol is used to supply and borrow various ERC20 tokens to gain interest. We have also created an innovative burn/buy back smart contract which is designed to increase token price.

www.polyDEX.org

# GASLESS DEX

PolyDEX is a gasless DEX which does not require the User to have any MATIC to use. This is done by using Biconomy and delegating the gas fees to the project rather than the user paying.

www.polyDEX.org

# DEX AGGREGATOR

PolyDEX is a DEX aggregator which finds the best price for any token on chain by aggregating the liquidity of sushi, DFYN, and Quickswap.

www.polyDEX.org

# CROSSCHAIN YIELD FARM

We had created the first ever cross-chain yield farm which allows users to deposit a single asset on Ethereum, it would be bridged to polygon and then supplied to a farm all in a single transaction.

# Yugen Finance

## YIELD AGGREGATOR

As our in house product, we have created a Crypto Fund. This fund is a medium risk fund which invests into multiple crypto currencies. We also implement services such as Liquidity pools, Derivatives, Staking, running Nodes, Lending and other DeFi features to increase profits. We are in the process of tokenizing this funds so anyone can own a part of the fund by purchasing the token on an exchange.

# Cryption Wallet

## WEB3 MOBILE APP

The Cryption wallet is a multichain web3 wallet which can interact with any dapp in the supported wallet. It is also integrated with an on off ramp and is available on the play store.

**OPEN**

opendao.io

# OPENDAO

We have created the architecture for the lending and borrowing protocol for real world assets as well as the cashbox smart contract.

<https://medium.com/opendao/an-efficient-cash-box-for-liquidity-price-support-84ebfd00c3c0>

unifidefi.com

# LENDING PROTOCOL

Unifi Defi protocol is used to supply and borrow various ERC20 tokens to gain interest. We have also created an innovative burn/buy back smart contract which is designed to increase token price.

---

## Crypto Fund

# CRYPTION FUND

As our in house product, we have created a Crypto Fund. This fund is a medium risk fund which invests into multiple crypto currencies. We also implement services such as Liquidity pools, Derivatives, Staking, running Nodes, Lending and other DeFi features to increase profits. We are in the process of tokenizing this funds so anyone can own a part of the fund by purchasing the token on an exchange.

## Interest token

# DYDAI

The DyDai token is the product of smart contracts which interact with DAI and DYDX to create token which tokenizes the principle and interest given out by DYDX. This token can be used in liquidity pools, token baskets, set protocols and also to chase the highest interest rate in DeFi.

# Bitcoin & Ethereum Exchange BITSHOP

The Bitshop exchange is a marketplace where ambassadors of the exchange can start buying and selling crypto-currency for their clients. We have implemented security features such as SM verification, Google Authenticator, encryption, as well as a fully featured admin panel to observe all user, trade and internal data.

# Decentralized DeFi Hedge Fund DAO DAOVERSIFY

DAOvesify.com is a DAO where the crowd intelligence is leveraged in a form of democracy to make investment decisions. It uses 'Rage Quit' functionality to defend against any 51% attacks. Since it is entirely on the blockchain it cannot be shut down and has also been audited by Consensys Diligence.

The screenshot shows the DAOversify website. The header features the logo "DAOVERSIFY" and social media icons for Messenger, Twitter, Telegram, and Facebook. The main content area has a dark background with a light purple box containing the text "Diversify Your Portfolio with the Collective Intelligence." Below this text are two buttons: "Open DAO" and "View AUM". At the bottom, there is a section titled "What is DAO?" with a brief explanation of what a DAO is.

---

etherrush.in

# ETHER RUSH

Back in 2017 when Ethereum (ETH) was not traded anywhere in India and Zebpay was the only exchange available for Bitcoin (BTC) we created a crypto website based on wordpress. We are the top result when you google "Buy Ether in India". We had shut down this website after the RBI ban.

# Ether Rush

---

vajracoin.io

# VAJRA COIN (VJR)

Vajra is a Digital asset backed 1:1 by equivalent Indian rupee reserves in a Bank account. The Vajra token has complete mobility between the ETH and EOS blockchains and allows seamless transfer of value between our Exchange and DEX partners. The Vajra token is fully redeemable for Indian Rupees by direct Wire transfer to your INR bank account at the time of your choosing.

---

## VAJRA

Ethereum and EOS based Digital asset  
**backed by Indian Rupee**

Vajra is a Digital asset backed 1:1 by equivalent Indian rupee reserves in a Bank account. The Vajra token has complete mobility between the ETH and EOS blockchains and allows seamless transfer of value between our Exchange and DEX partners. Coming soon!

Enter your email\*

Get Early Access!

### WHY USE **VAJRA**?

Vajra is a secure, fast, portable and convenient **Digital asset** for traders and investors interested in maintaining **Indian Rupee** backed liquidity.

---

---

[www.airavat.cash](http://www.airavat.cash)  
**AIRAVAT  
WALLET**

Airavat is a non-custodial wallet for BTC, ETH, EOS and other Cryptocurrencies and is fully integrated with the IndraX exchange, the IndraDEX decentralized exchange. A non-custodial wallet means the funds are held by the user and not by the Admin. The embedded exchange allows P2P transactions in a trustless manner.

[www.dapp.com/dapp/  
boltt-coin](http://www.dapp.com/dapp/boltt-coin)  
**BOLTT COIN  
DAPP**

Boltt Coin DApp is a true decentralised Health & Entertainment Network. BolttCoin is the no. 1 ranked app on Klaytn. This dapp rewards users in BOLTT for providing their data (health and entertainment) willingly to advertisers. Hence keeping users in control of their data.

# IndraDex.io INDRA DECENTRALIZE EXCHANGE

A decentralized exchange (DEX) is a cryptocurrency exchange whose backend is entirely on the blockchain and the front end is loaded on the clients system. This particular exchange has its backend on the EOS and Ethereum blockchain. Using the blockchain allows the exchange to be trustless, transparent, and reliable.

# www.indrax.io INDRA X

Indra X is an Indian centralized exchange for trading BTC, ETH, EOS and other leading Cryptocurrencies against the Indian Rupee (INR) backed Vajra (VJR) digital asset and INR itself. A centralized exchange allows users to transact with crypto which are based on different exchanges.

---

## FlexUSD

# DEFLATION- ARY TOKEN

FlexUSD is a token which is deflationary in nature. FlexUSD is always worth \$1 it is backed by an interest generation model. This means the amount of FlexUSD increases quantity without any user intervention.

## Bondly.com

# MATIC NODE

We setup a validator node for our client where other users can stake their MATIC to earn rewards.

www.generosity.network

# CARDANO STAKING NODES

We have created the architecture and deployment of Cardano nodes for users to stake ADA trustlessly as well as providing the necessary metrics.

Inhouse product

# FLASHLOAN -ARB BOT

Using infinite leverage, we have created a bot that trades across multiple protocols such as, balancer, curve.fi, uniswap, DyDx, AAVE, and mooniswap.

---

The Seer

# PREDICTION MARKET

A prediction market where the user can bet on any future event such as politics, sports, stock prices, or even the weather.

Value Network

# PREDICTION MARKET

We have developed the token, farm, prediction market, vesting contract and a portal for stablecoin investors

---

## Backend API service

# FETCH.AI

A proxy backend service created in nest.js which polls and keeps the database of agents and their status updated. Currently being used in SOEF web explorer here: <https://soef-explorer.fetch.ai/>

---

The logo for fetch.ai, featuring a 3x3 grid of dots to the left of the text "fetch.ai".

---

## FET - MTLX Staking rewards program

# FETCH.AI

A program called Phoenix, which included a smart contract for submitting a proof of stake from FET staking contract. This proof of stake then was used to distribute the MTLX rewards.

---

The logo for fetch.ai, featuring a 3x3 grid of dots to the left of the text "fetch.ai".

---

## Core Smart Contracts and Token

# STACKOS.IO

We had developed the token contract, bridge configuration and deployment, core smart contracts for the beta version of the product.

# SERVICES

## TOKENIZING AN ASSET

### Our Outlook

We believe that tokenization of tangible real world assets such as Real Estate, Art, Natural Resources as well as financial instruments such as Equities, Bonds, Funds, Loans, etc is one of the primary use cases of Blockchain.

A new "Token Economy" offers the potential for a more efficient & a fair financial world by greatly reducing the friction involved in creation, buying & selling of securities.

We see 3 key advantages of tokenization:

- Higher Liquidity & Accessibility
- Increased Transparency
- Faster & Cheaper Transactions

### Our Expertise

- Whitepaper
- Tokenization Strategy
- Workflow, UI/UX Design
- Automated KYC and AML compliance
- Whitelisting
- Legal & Regulatory framework
- Setup/Registration of Legal Entity (Creating SPVs)
- Smart Contract Scripting
- Yield Distribution (Rent payments, dividends)
- Token Redemption
- Exchange Listing
- Marketing & Fundraising
- Due Diligence
- Financial Analysis

# SERVICES

---

## DAPP DEVELOPMENT

## SMART CONTRACT SCRIPTING

- We create DApps on various different blockchain such as Klaytn, Tezos, Ethereum, Cosmos.
- We also provide smart contract scripting services on private blockchain such as Hyperledger and Corda.
- Multiple Smart contracts which used to getther to form an application is called a Dapp whose backend is entirely on the blockchain and the front end is rendered directly on to the users device, creating a trustless system.
- We also perform inshouse manual audits of smart contracts as well as audits conducted by AI using applications such as MythX

## Our Expertise

- Developing Schematics
- Product Roadmap
- Data Flow & Workflow Diagrams
- Technical Architecture Designing
- Workflow Optimization
- Monetization Strategy
- Internal Metrics Dashboard
- Smart Contract Auditing
- Alpha, Beta Release
- Smart Contract Optimization
- Deploying on Mainnet
- Integration with other platforms
- Becoming a multichain platform

# SERVICES

---

## COMMUNITY GROWTH

- We will create a community that will do marketing for you and spread the good word about your product.
- Keeping up hype and holding anticipation are the key factors needed for any Web 3 project.
- We will keep the community with multiple contests, competitions and game.
- No one in Web3 makes it alone. With all the possibility of composability making partnership is extremely important and we use our network to facilitate that.
- We get the word of your project out there using KOLs, influencers, youtubers.
- We optimise your twitter, facebook and instagram ads.
- We also will setup and manage bots and channels on discord as well as telegram.

## PARTNERSHIPS, FUNDRAISING AND CONNECTIONS

### Our Expertise

- Creating engaging content
- Building a community
- Keeping hype about a project
- Engagement on social media
- Running competitions
- Internal Metrics Dashboard
- Designing campaigns
- Marketing & Advertising
- Identifying the best partners.
- Establishing your network.
- Connecting you with multiple VCs
- Integration with other platforms

# SERVICES

## DECENTRALIZED AUTONOMOUS ORGS

A decentralized autonomous organization (DAO), sometimes labeled a decentralized autonomous corporation (DAC), is an organization represented by rules encoded as a computer program that is transparent, controlled by shareholders and not influenced by a central government. A DAO's financial transaction record and program rules are maintained on a blockchain. The DAO can be created on Ethereum as well as your own blockchain.

DAOs can be created to organize communities towards a shared goal or even to create a decentralized for profit company.

DAOs that manage physical spaces, like co-working spaces, condominiums, or cafes.

### Features:

- Interaction with other Dapps.
- Non transferable membership tokens.
- KYC & AML for members.
- Ability to store or send cryptocurrencies.
- Minting new membership/equity tokens.
- Democracy or Holocracy systems
- Rage quit which stops the 51% attack on a DAO.
- UI/UX for DAO infrastructure
- Creating the community on social media and messaging apps.
- Create a Payroll
- Survey: Create polls to gauge community opinions.

# SERVICES

## BLOCKCHAIN CONSULTING

### Our Outlook

A total annual revenue of close to \$180 Billion is currently being generated across all the apps by monetizing privileged consumer data and risking single point of failures.

New "Decentralized Networks" offer a change in paradigm for industry's software business models with the use of blockchain & distributed ledger technologies.

We see 3 key advantages of Blockchain & DLT:

- Decentralization & Security
- Provenance & Transparency
- Efficient Ecosystem

### Our Expertise

- Research Reports
- Thought Leadership & Presentations
- Business Strategy Assessment
- Schematics & Ideation
- Workflow Diagrams
- Legal & Regulatory framework
- Proof Of Concept Development
- Prototyping
- Token Economics
- Dashboards
- Integration with existing processes
- Due Diligence
- Financial Analysis
- Liquidity Management
- Training
- Creating blockchains
- Migration of centralized system to a decentralized system

# SERVICES

---

## INITIAL DEX OFFERING

### Our Outlook

- Creating an ICO is a way of raising money to create a utility token.
- This Utility Token can be coded to have many different features such as access to a DApp, self burning mechanisms, profit sharing, discounts to users, payment methods, a decentralized loyalty system.
- There are different ways of doing a crowdsale (ICO) of the token.
  - Time based ICO where the price of the token increases after a certain time period creating an urgency to buy the coin.
  - Amount based discounts incentive's investors to buy the coins/tokens at larger amount to receive discounts.
  - A combination of this and private sales can be used to sell the token optimally.

### Our Expertise

- Whitepaper, Yellow Paper
- Marketing Presentations
- Workflow, UI/UX Design
- Website Development
- Marketing Campaigns
- Automated KYC and AML compliance
- Whitelisting
- Token Economics
- Setup/Registration of Legal Entity
- Smart Contract Scripting
- Token Creation
- Due Diligence & Smart Contract Audits
- Airdrops & Bounty Management
- Exchange Listing
- Submission of ICO to ICO listing websites.
- Creating markets for the token on Uniswap and other markets..

# SERVICES

## MARKETING AND NETWORKING

### Our Outlook

- Creating an IDO is a way of raising money to create a utility token.
- This Utility Token can be coded to have many different features such as access to a DApp, self burning mechanisms, profit sharing, discounts to users, payment methods, a decentralized loyalty system.
- There are different ways of doing a crowdsale (ICO) of the token.
  - Time based ICO where the price of the token increases after a certain time period creating an urgency to buy the coin.
  - Amount based discounts incentive's investors to buy the coins/tokens at larger amount to receive discounts.
  - A combination of this and private sales can be used to sell the token optimally.

### Our Expertise

- Submission of ICO to ICO listing websites.
- Creating markets for the token on Uniswap and other markets..

# TEAM

---

## **TEJAS CHITNIS, CO-FOUNDER**

Started out as a Android developer and moved to being an entrepreneur by founding Geek Crate. My love for emergent technology introduced me to blockchains and now there is no looking back.

## **ASHWIN YARDI, CO-FOUNDER**

Crypto volatility & arbitrage opportunities across different geographies got me into trading back in 2016. The continuous hunt to find long term valuable investments in this space delivers invaluable insights & ideas for us to explore.

## **AKSHIT CHOUDARY, BLOCKCHAIN DEVELOPER**

Self Learned Developer since 2018, starting out with JavaScript and then fell in love with Public Blockchains, on the path to a decentralised society.

## **PRASENJIT, FULLSTACK DEVELOPER**

Currently working as full Stack Developer in react and node having experience more than 2 years in MERN Stack. He works on the APIs and backend needed to talk to the blockchain.

## **SAMARTH GUGNANI, BLOCKCHAIN DEVELOPER**

Started out as an Android developer , tasted everything from backend to Machine learning but Then I came across blockchain technology and this love toward blockchain has landed me to this amazing decentralized society

# ABOUT US

---

Tejas Chitnis & Ashiwn Yardi are the founders of Cryption Digital Services. We believe in the promise of Decentralization as a natural evolution of the digital world we live in today.

We have now set out to launch Cryption Studios in order to analyze the feasibility of your idea and turn it into reality. We intend to bring immense value to your business by developing the most optimal solution and helping you step into the world of decentralization.

## **TECHNICAL EXPERTISE**

The importance of keeping up with cutting edge technology is crucial especially in a new emerging domain like blockchain. We keep ourselves informed on the latest updates and relevant news.

## **AFFORDABLE**

We follow the lean model and so we have trimmed down unnecessary costs. This allows us to price our services aggressively low.

## **AGILE**

Agility cannot be optional since it is an opportunity to obtain a strategic advantage in the market. We believe in the ability to react to change and deliver value faster than the competition. Our approach uses the best ideas of Agile delivery to make your product as well as your company more efficient, quality conscious and sustainable.
