Execution Types

Market, 100% without Dealing Desk". No re-quotes or delays. Straight Through Processing "STP".

Daily Trading Break

There is a daily 5 minute break in trading from 23:58-00:03 server time. Clients are able to see the prices streaming during this break. No orders can be placed, nor any pre-existing orders can be executed during this time. This is done to protect the Stop Loss positions from getting hit by the potential spread spike, in which; may occur over rollover time when Liquidity Providers reset their pricing for the new trading day at 00:00 server time (which is 17:00 New York City).

Trading Hours

From 00:05 on Sunday till 23:55 GMT on Friday according to our **server time**

Please note that our server Time is subject to Daylight Savings Time (DST), which begins on the last Sunday of March and ends on the last Sunday of October.

- Winter: GMT+2
- Summer: GMT+3 (DST)

Margin Call

The margin level is the percentage value based on the amount of accessible usable margin versus used margin. Technically, a 100% margin call level means that when your account margin level reaches 100%, you can still close your positions, but you cannot just take any new positions.

When you're about to hit a margin call, there will be a 'Red Alert' in your MT4 platform. The margin call level is set to **100%** for all account types.

Stop Out

A stop out level is a specific point at which some or all of your active trade positions will be closed automatically (starting from the biggest loser) because of a decrease in your margin levels, meaning we can no longer support those open positions. Currently, the stop out level is set to **30%** for all account types.

Hedging

Hedging is allowed and margin-free. Please note that the spread may affect your big size hedged positions especially when it goes higher around news, daily trading break or weekends, you must avoid big size hedged positions if you don't have sufficient money in your trading accounts.

Automated Trading

Automated Trading is allowed for all account types. For more details, check our [Expert Advisors](#)

Mobile Trading

Mobile Trading is allowed and free of charge. More details, visit [Mobile Trading](#)

Internal Transfer

Internal Transfer is allowed for the same account holder. You can easily transfer funds from your landing accounts to your MT4 trading accounts and vice versa. You can also transfer funds between your MT4 trading accounts.

Swap (Interest Rate)

Free for all account types exce. Swap free trading only for all **active** traders without exceptions.

Withdrawal

The amount deposited can be withdrawn to the source account; while trading profits shall be withdrawn to bank account via Wire Transfer. For instance, if the trader deposits \$1000 through Credit Card and gained \$500 by trading, he can only withdraw up to \$1000 to the same Credit Card. The \$500 profit shall be withdrawn through Wire Transfer.

- **Demo accounts:** IMMFX-Demo – IMMFX GROUP Ltd.
- **Live accounts:** IMMFX-Real – IMMFX GROUP Ltd.

High/Low and Stops

High and Low are recorded from BID price on charts, your stop loss on buying positions will be executed at bid price in addition to around -12 points for Micro Account, -6 point for Standard account and -3 points for Pro Account. Please note that there are lower points being recorded on some other pairs.

And your stop on selling positions will be executed at ASK price in addition to around + 12 point for Micro account, +6 point for Standard account and +3 point for Pro account. Please note that there are higher points being recorded on some other pairs.

Please note that Spreads may vary depending on the account type whether it is Micro, Standard or Pro as well as the currency pairs and existing market conditions. For that reason you may not see your stop level on chart.

Scalping

You will not enter into any transactions which fall within the definition of Scalping or Sniper trading strategy or automated data entry system. Accordingly, Client transactions with short duration and with a win/loss ratio significantly in client favor may be deemed as abusive trading and will not be allowed; in such circumstances IMMFX reserves the rights to void/cancel part/all your abusive trading transactions, close all and any of your Trading Accounts and terminate the Trader Agreement.

Arbitrage

Price arbitrage strategies are prohibited and IMMFX determines, at its sole discretion, what determines a price arbitrage trading strategy.

Market Watch

All orders are executed according to the prices quoted on Market Watch, not from the charts which don't match the prices on Market Watch. For more details visit [Orders Execution Mechanism](#)

Gap trading

Stop, buy stop, sell stop or take profits are executed at the next available price. For example, if you have BUY position on GER30 at 11000 with SL at 10050 and TP at 11050, if the market opened (after weekend or holiday) at 11070, then your Take Profit will be triggered at the next available price which may be around 11070. but if the market opened (after weekend or holiday) at 10000, then your Stop Loss will be triggered at the next available price which may around 10000.
