THE RISE OF THE YACHTVERSE

With the growth of Non Fungible Tokens (NFT) and cryptocurrencies, the world has realized the value of gathering a strong community around projects.

The Bored Yachts is bringing **luxury yachting utility** into the NFT space whilst **incentivizing** yacht owners (the Bored Fleet) to provide access to their boats.

The **Yachting-for-Good model** combines a unique match in the yachting industry, between thousands of available yachts and their fans, to fund long-term sustainable solutions for enjoying the seas.

Using resources to target strategic partnerships and grow the presence of yachts in national and international waters, Yachtcoin and its DAO play a role of a **game-changer in crypto-tokenomics**.

THE RISE OF THE YACHTVERSE

Bored Yachts rolls with the epic token Yachtcoin. It envisions becoming a **decentralized currency** for yacht operators, participants, tourists, merchants, job seekers, NFT holders, and members of the DAO community.

There is a total of **10,000,000,000** Yachtcoins. **25%** of the Yachtcoin supply will be airdropped to NFT Pass Holders, **25%** will be used to reward the ecosystem partners and service providers, and the remaining coins will be a **Treasury Reserve** for the DAO, to be distributed for projects promoting sustainable development.

Yachtcoin has a variety of use cases allowing holders to use it for leisure or **to participate in the DAO token economy**. Yachtcoins can be accepted as a form of payment for yachting experiences and events, and will represent **your vote** in the DAO decisions on governance.

As the project's success grows, an economy of scale can be observed because of increased adoption, which can lead to common goals of living at sea using a **theme based currency** that allows for **enhanced governance and funding models** to support life at sea.
