Developing innovative solutions catering to the health and wellness space with well-researched and effective healthcare supplements.

Innovating in the nutraceuticals segment.

In line with our aim to provide a holistic healthcare approach, we grew ZimUNat - our nutraceutical products brand that caters to this market segment with well-researched and effective healthcare supplements. The supplements are produced with patented innovative and disruptive pharmaceutical technologies.

- Focus on Vitamins, Healthcare and Dietary Supplements
- Novel Drug delivery Technologies
- Well-researched and science backed actives
- Strong R&D team
- State-of-the-art manufacturing facilities
- Innovative technology & processes

With ZimUNat, we aim to be a technology partner to healthcare brands providing quality solutions backed by innovative technology and processes.

Visit www.zimlab.in today to know more.

Dear Valued Partner,

Bringing you our nutraceuticals and healthcare supplements catalog under the ZimUnat Brand. Our growing portfolio of leading products and developing technologies is bringing more innovations to life for the nutraceuticals and healthcare supplements segment.

We are expanding our nutraceutical business vertical to develop unique vitamins and dietary supplement products that align with our pharmaceutical therapy area strategy thus creating a holistic treatment approach to ensure a healthier life for the patient.

For nutraceuticals, Novel drug delivery technologies such as Oral Thin Film (OTF) are being developed on Orodispersible film technologies. Many of our OTF products of the nutraceutical business have also been sourced by leading Online/ E-commerce Healthcare Brands for distribution through their Ecommerce and Online channels resulting in stellar growth for the business segment.

We look forward to your Partnership.

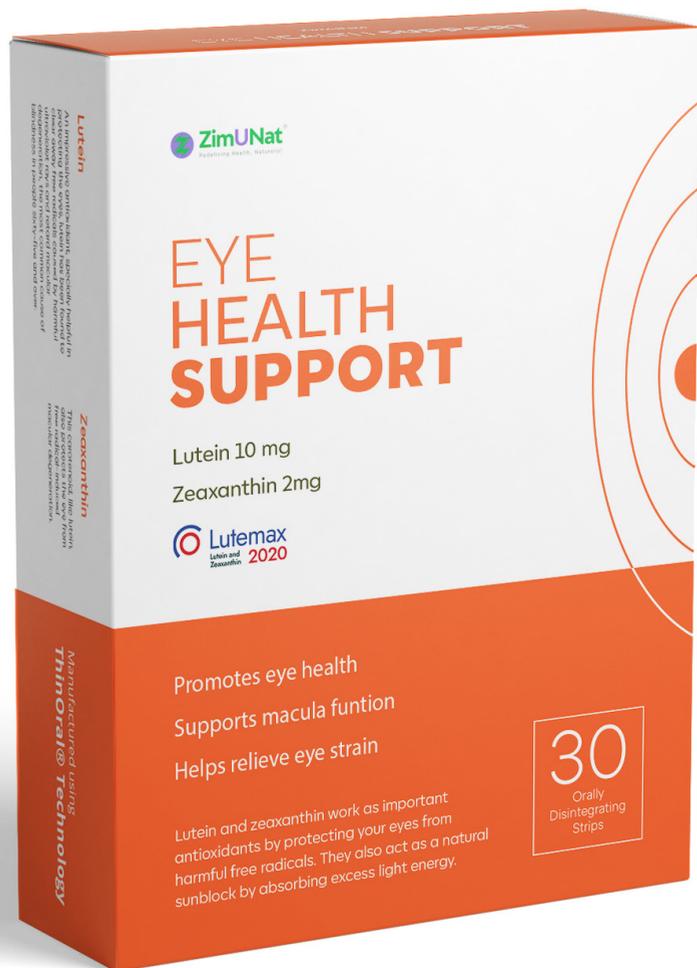

Sincerely,

Product Line

Eye Health Support (Lutemax)

Eye Health Support

Description

Our Eye Health Support nutraceutical product has important antioxidants by protecting your eyes from harmful free radicals that impair eye health over a period of time.

Flavour

Orange

Dosage Form

Orally Disintegrating Strips
using Thinoral® Technology

Ingredients

Lutemax2020 Free L/ZOS 20%/ SF/IN, Hydroxypropyl methylcellulose (15 cps), Hydroxy propyl methyl cellulose 5 cps, Glycerin, Sunflower oil, Vitamin E acetate, Stevia Extract(Steviol Glycoside), Orange Booster Flavour, Menthol.

Available in

30 Orally Disintegrating Strips

Highlight

Lutein and Zeaxanthin are carotenoids. A carotenoid is an impressive antioxidant. Especially helpful in protecting the eyes, lutein has been found to clear away free radicals caused by harmful ultraviolet rays and retard macular degeneration, the most common cause of blindness in people sixty-five and over.

Hair Health Support

Description

Our Hair Health Support nutraceutical product promotes hair growth, adds volume, reduces hair shedding and even reduces the rate of premature greying.

Flavour

Raspberry

Dosage Form

Orally Disintegrating Strips
using Thinoral® Technology

Ingredients

Biotin (40mcg)

Zinc (4mg)

Folic acid (300mcg)

Available in

30 Orally Disintegrating Strips

Highlight

Biotin is a required cofactor for carboxylase enzymes and Biotin's function in protein synthesis and more specifically, in keratin production, explains its contribution to healthy nail and hair growth. Folic acid promotes hair health by amping up the body's cell production processes. Zinc supplements may help to treat hair shedding if you have a zinc deficiency.

Hair Health Support

Nausea & Motion Sickness Support

Description

Our Nausea and Motion Sickness Support nutraceutical product is an effective and inexpensive treatment for nausea and vomiting. It contains Ginger, an ancient herb used widely in history for its many natural medicinal properties and particularly as an antiemetic.

Flavour

Peppermint

Dosage Form

Orally Disintegrating Strips
using Thinoral ® Technology

Ingredients

Ginger Oleoresin 40%, Hydroxypropyl Methylcellulose 5 cps, Glycerin, Vitamin E Acetate 98%(DL-alpha tocopherolacetate), Sucralose, Peppermint Oil

Available in

30 Orally Disintegrating Strips

Highlight

In relation to its antiemetic properties, ginger (and its constituents) acts peripherally, within the gastrointestinal tract, by increasing the gastric tone and motility due to anticholinergic and antiserotonergic actions. It is also reported to increase gastric emptying.

Instant Focus

Description

Our Instant Focus support nutraceutical product containing ingredients that enhances the effects of caffeine, reduces jitters and helps you focus.

Flavour

Mint

Dosage Form

Orally Disintegrating Strips
using Thinoral® Technology

Ingredients

Caffeine, L-Theanine: Hydroxypropyl Methylcellulose 15 cps, Sucralose, Peppermint Oil, Xanthan Gum, Vitamin E acetate 98%, Glycerine

Available in

30 Orally Disintegrating Strips

Highlight

Caffeine and L-theanine, a unique amino acid, work synergistically improving effect profiles for both, delivering instant focus.

Instant Focus

Sugar Cravings Reduction

Sugar Cravings Reduction

Description

Our Sugar Cravings Reduction product contains ingredients that helps reduce sugar cravings thus controlling blood sugar.

Flavour

Neutral

Dosage Form

Orally Disintegrating Strips
using Thinoral® Technology

Ingredients

Gymnema sylvestre 15 mg

Available in

30 Orally disintegrating Strips

Highlight

The Hindi term for G. sylvestre is gurmar, which is translated as "sugar destroyer." This is because gymnema leaves contains substances that decrease the absorption of sugar from the intestine. Gymnema sylvestre is said to lower sugar cravings while reducing the rate at which sugar and fat are absorbed into the body.

Healthy Cognitive Function

Description

Our Healthy Cognitive Function support nutraceutical product contains Ginkgo biloba extract that researchers believe, promotes good blood circulation in the brain and protects the brain and other parts from neuronal damage, improving cognitive function and slowing down cognitive decline.

Flavour

Peppermint

Dosage Form

Orally Disintegrating Strips
using Thinoral® Technology

Ingredients

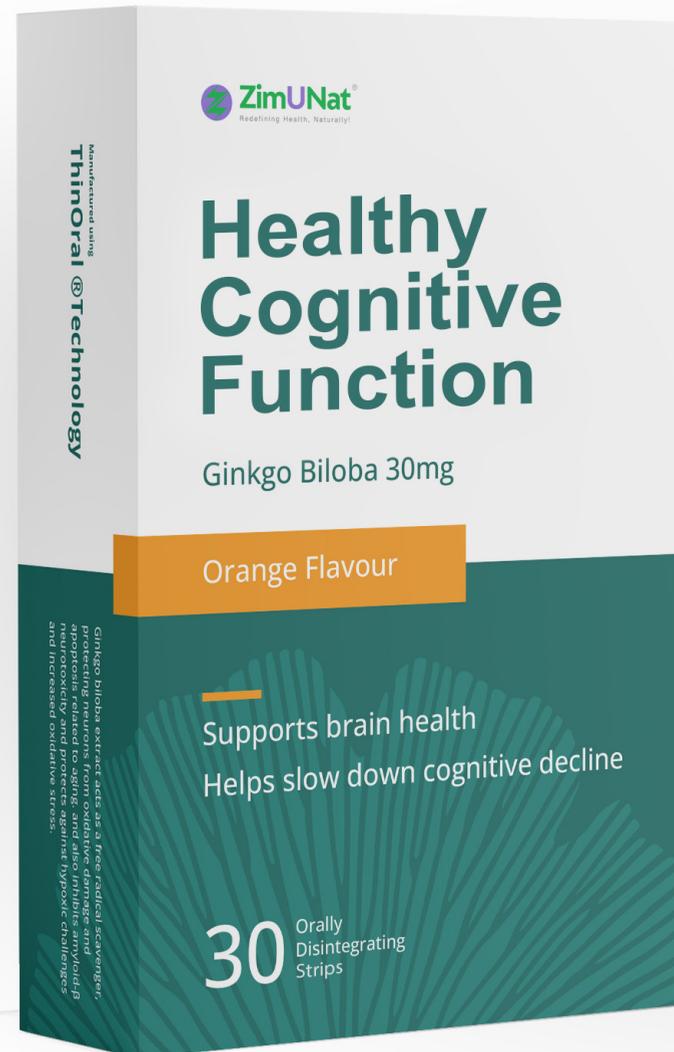

Ginkgo Biloba extract, Hydroxypropyl Methylcellulose 15 cps
Glycerin, Vitamin E Acetate 98% (DL-alpha tocopherol acetate)
Sucralose, Orange booster, FD&C yellow 6

Available in

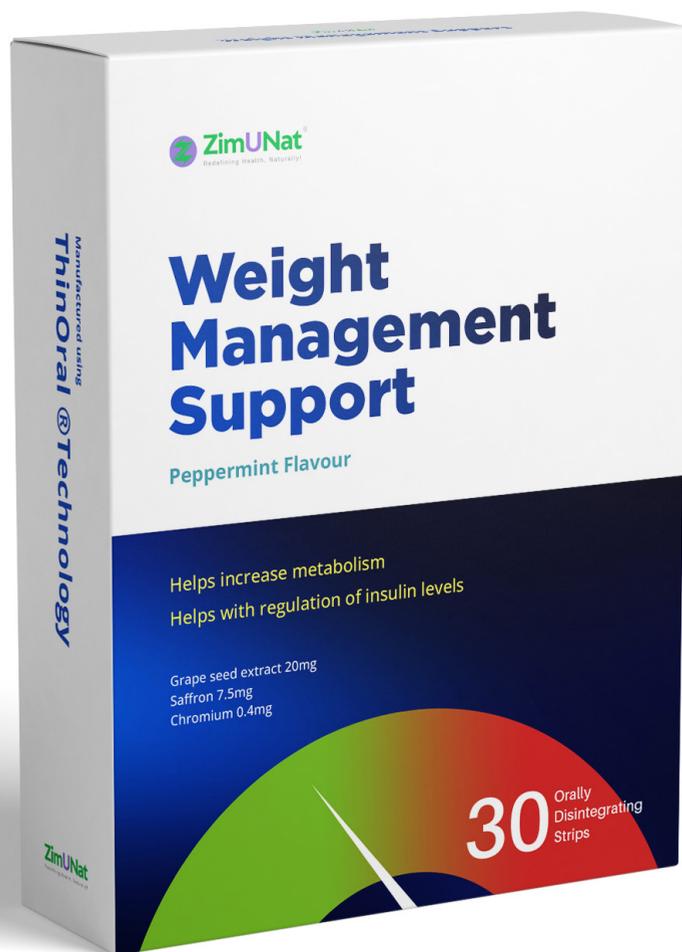

30 Orally disintegrating Strips

Highlight

Ginkgo biloba extract acts as a free radical scavenger, protecting neurons from oxidative damage and apoptosis related to aging, cerebral ischemia, and neurodegenerative disorders. Ginkgo biloba also inhibits amyloid- β neurotoxicity and protects against hypoxic challenges and increased oxidative stress.

Healthy Cognitive Function

Weight Management Support

Description

Our Weight Management Support nutraceutical product inhibits fat deposits, increases metabolic rates and increase lean body mass thereby decreasing percentage of body fat and leading to weight loss.

Flavour

Peppermint

Dosage Form

Orally Disintegrating Strips
using Thinoral® Technology

Ingredients

Grape Seed Extract, Saffron, Chromium, Hydroxypropyl Methylcellulose 15 cps Glycerin, Vitamin E Acetate 98% (DL-alpha tocopherol acetate), Sucralose, Peppermint Oil, FD&C red 3

Available in

30 Orally Disintegrating Strips

Highlight

Grape seed extract has antioxidant properties and with the energy boost it provides, the extract can pump up your metabolic rate, which helps you burn more calories. Saffron increases your metabolism, which burns through calories and fat cells more efficiently for weight loss. Chromium effects on glucose, insulin, and lipid metabolism, have been reported to lead to weight loss in humans

Melatonin

Description

This nutraceutical product helps with better sleep cycles. It contains Melatonin as its main ingredient, a hormone that your brain produces in response to darkness. It helps with the timing of the body's circadian rhythms (24-hour internal clock) helping your sleep better.

Flavour

Banana

Dosage Form

Orally Disintegrating Strips
using Thinoral ® Technology

Ingredients

Melatonin 3mg/5mg

Available in

30 Orally Disintegrating Strips

Melatonin

PMS Support

Description

Our PMS Support nutraceutical product helps reduce PMS symptoms by rebalancing hormones, regulating menstrual cycle and by reducing irritability and mood swings associated with premenstrual syndrome (PMS).

Flavour

Strawberry

Dosage Form

Orally Disintegrating Strips
using Thinoral ® Technology

Ingredients

Chasteberry (30mg), Zinc (7.5mg), Vit B6 (2mg)

Available in

30 Orally Disintegrating Strips

Highlight

Researchers believe that vitex works by decreasing levels of the hormone prolactin. This helps rebalance other hormones, including estrogen and progesterone. Zinc helps to regulate the menstrual cycle by nourishing healthy ovarian follicles and therefore promoting ovulation. Vitamin B6 is part of the process involved in making neurotransmitters like serotonin and GABA and a B6 deficiency can cause mood drops and changes. A B6 supplement can help reduce and regulate mood swings.

Stress & Anxiety Support

Description

Our Stress & Anxiety Support nutraceutical product helps in reducing anxiety and in building increased resilience against stress by lowering stress hormones levels and inflammation.

Flavour

Mint

Dosage Form

Orally Disintegrating Strips
using Thinoral® Technology

Ingredients

Saffron (30mg), Lavender (10mg),
Ashwagandha (10mg)

Available in

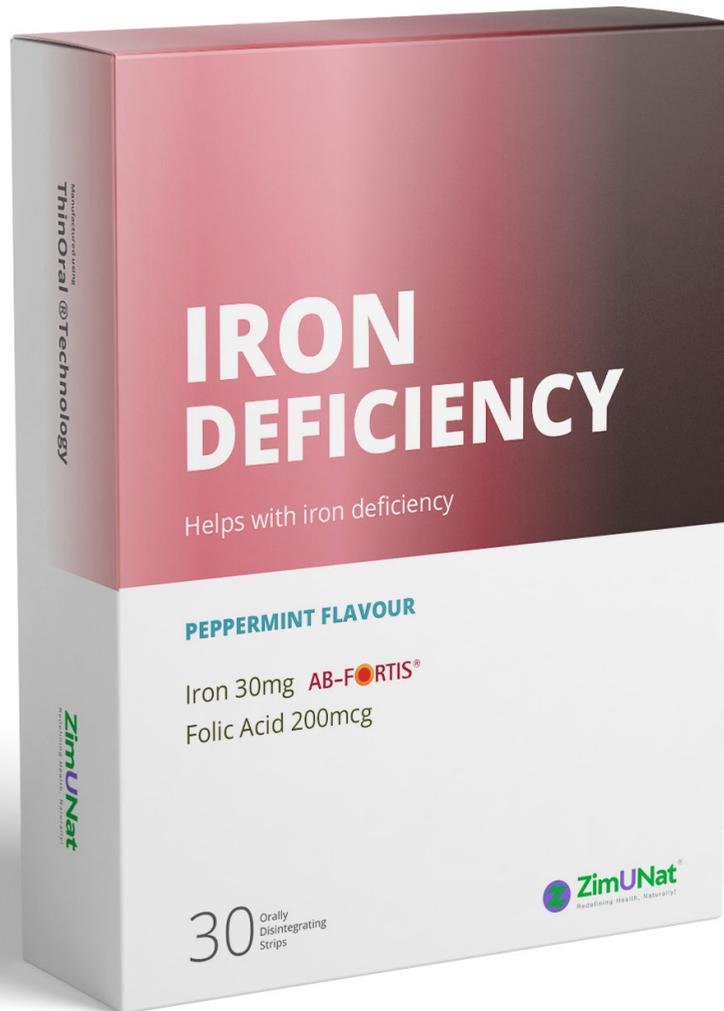

30 Orally Disintegrating Strips

Highlight

Saffron extract appears to improve subclinical depressive symptoms in healthy individuals. Lavender's ability to calm without sedating and generating a serene state of mind can reduce anxiety by affecting the body's fight-or-flight response. Ashwagandha supplements are among a supplement class called adaptogens that work to counteract the harmful effects of stress in the body. Adaptogens have a wide variety of other benefits, including anti-inflammatory properties, all of which can add up to less stress.

Stress & Anxiety Support

Iron Deficiency

Description

Our Iron Deficiency support nutraceutical product with micro encapsulated ABfortis® ensures high bioavailability.

Flavour

Peppermint

Dosage Form

Orally Disintegrating Strips
using Thinoral ® Technology

Ingredients

Iron 30mg
Folic Acid (200mcg)

AB-FORTIS®

Available in

30 Orally Disintegrating Strips

Highlight

AB-Fortis® remains stable in high pressures and temperatures, therefore staying intact during processing. In addition, the encapsulation protects oxidation-sensitive ingredients such as vitamins and fatty acids from oxidation. AB-Fortis® is highly bioavailable as shown by a human clinical study on bioavailability.

Iron Deficiency

Description

Our Iron Deficiency support nutraceutical product with Carbonyl Iron is an effective combatant for iron deficiency anemia. Iron is an important mineral that the body needs to produce red blood cells and keep you in good health.

Flavour

Mint

Dosage Form

Orally Disintegrating Strips
using Thinoral® Technology

Ingredients

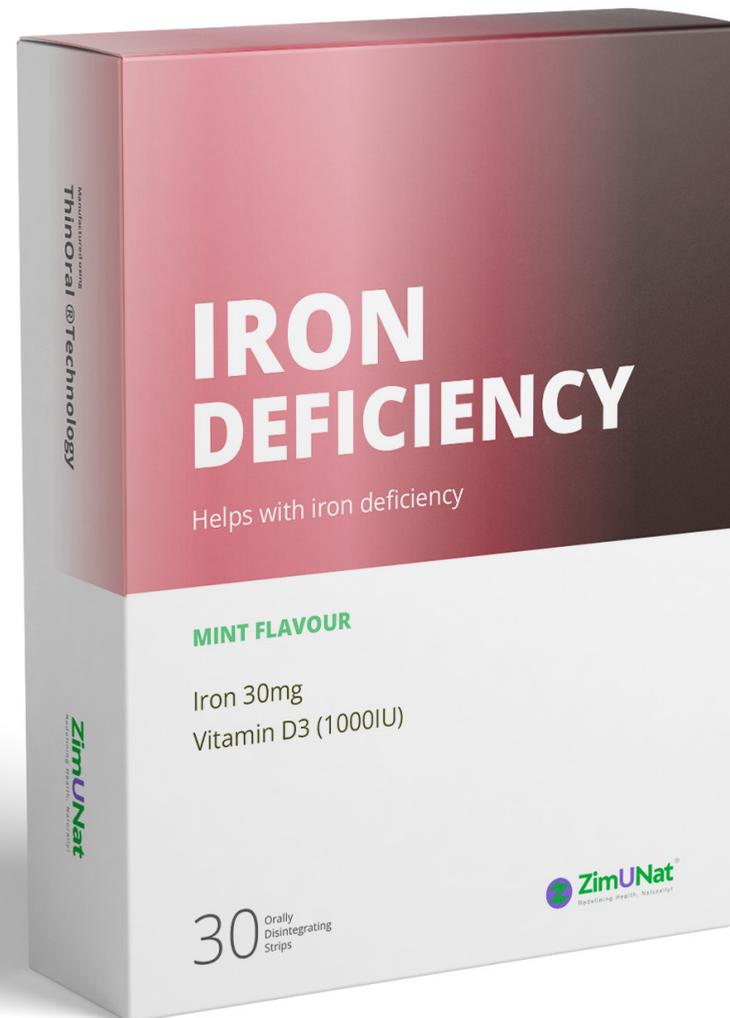

Iron 30mg
Vitamin D3 (1000IU)

Available in

30 Orally Disintegrating Strips

Highlight

Carbonyl iron is a highly pure (97.5% for grade S, 99.5+% for grade R) iron, prepared by chemical decomposition of purified iron pentacarbonyl. It usually has the appearance of grey powder, composed of spherical microparticles

Iron Deficiency

Vitamin D3+ Selenium + Iodine

Description

Dietary supplement to help with Vitamin D, Selenium and Iodine deficiency.

Flavour

Orange
Peppermint

Dosage Form

Orally Disintegrating Strips
using Thinoral® Technology

Ingredients

Cholecalciferol (Vitamin D3), Selenomethionin (L-selenomethionin)
Potassium Iodide, Hydroxypropyl methylcellulose 5 cps
Glycerin, Medium chain triglycerides (MCT-70), Orange Booster
Flavour, Vitamin E acetate 98%, Peppermint oil, Neotame
Red Oxide of Iron.

Available in

30 Orally Disintegrating Strips

Vitamin D3+ Selenium + Iodine

Orange + Peppermint

30 Orally
Disintegrating
Strips

Vitamin D3 + Folic acid

Description

Having the right amount of vitamin D, calcium, and phosphorus is important for building and keeping strong bones.

Flavour

Peppermint

Dosage Form

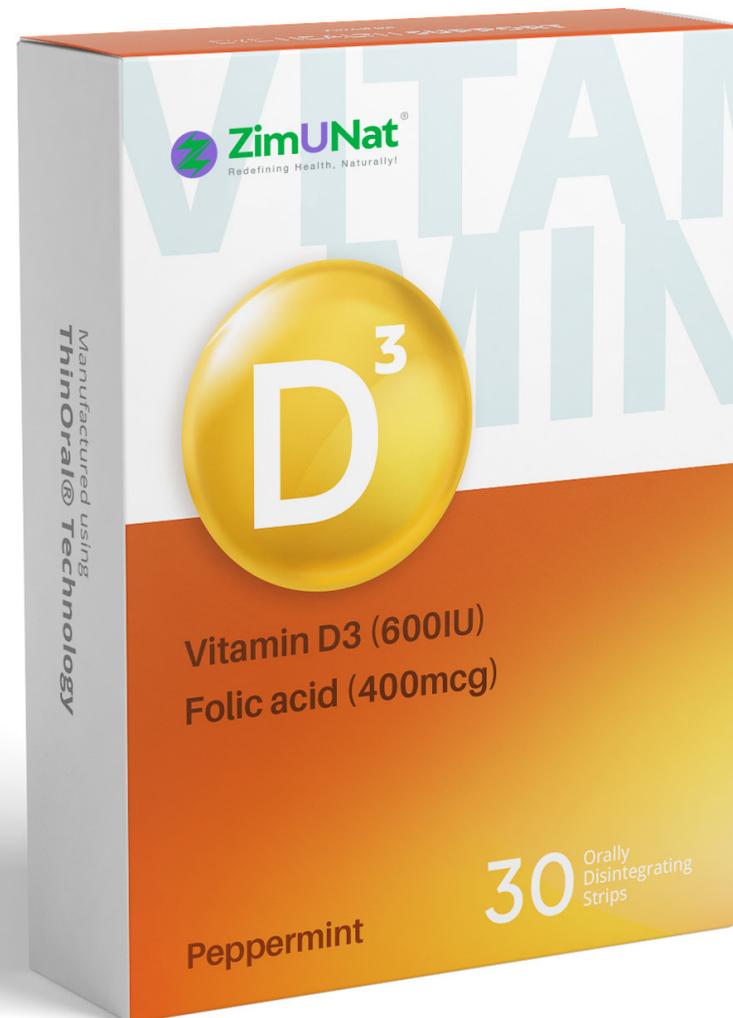

Orally Disintegrating Strips
using Thinoral® Technology

Ingredients

Cholecalciferol (Vitamin D3), Folic acid
Hydroxypropyl methylcellulose 5 cps
Glycerin, Medium chain triglycerides (MCT-70)
Peppermint oil, Vitamin E acetate 98%, Neotame
Butylated Hydroxy Anisole, Butylated Hydroxy Toluene

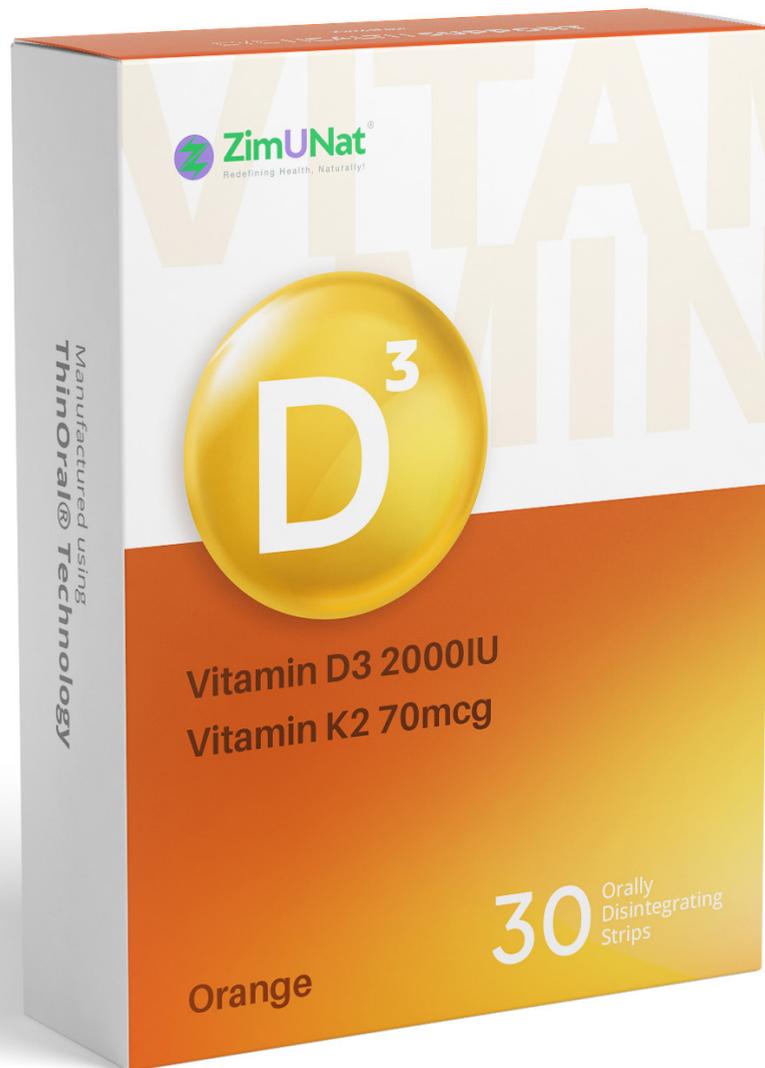

Available in

30 Orally Disintegrating Strips

Vitamin D3 + Folic acid

Vitamin D3 + Vitamin K2

Vitamin D3 + Vitamin K2

Description

Vitamin D3 and K2 make a perfect pair for your health. These vitamins work best in the presence of each other. They provide a synergistic effect in balancing your blood calcium level that regulates your blood vessels and bones' health

Flavour

Orange

Dosage Form

Orally Disintegrating Strips
using Thinoral® Technology

Ingredients

Cholecalciferol (Vitamin D3), K2 Vital 5% MCT oil, Hydroxypropyl methylcellulose 5 cps, Glycerin, Medium chain triglycerides (MCT-70), Orange Booster Flavour Vitamin E acetate 98% Sodium Copper Chlorophyllin, Neotame

Available in

30 Orally Disintegrating Strips

Regulate Blood Sugar

Description

Our Regulate Blood Sugar nutraceutical product helps form Glucose Tolerance factor (GTF) which physiologically enhances insulin activity by binding to insulin, binding to the cell and is able to potentiate its action by three-folds

Flavour

Neutral

Dosage Form

Pellets in capsule

Ingredients

N-acetyl cystine 135mg
Glutamine 120mg
Glycine 60mg
Niacin 10mg
Chromium 0.05 mg

Available in

60 Capsules

Highlight

In the human body, Chromium is used to synthesize a complex known as Glucose Tolerance Factor (GTF): The biologically active form of trivalent Chromium or Cr III. The body's ability to convert simple Cr III compounds into GTF declines with advancing age, and is impaired in persons with diabetes and possibly in hyperlipidemic and atherosclerotic patients as well Chromium GTF is necessary for the elderly and insulin-requiring diabetics, because they have difficulties converting Chromium to GTF on their own.

Blood Sugar Control

Anti Aging

Anti Aging (Liposomal Formulation)

Description

Our Anti aging nutraceutical product contains important anti-oxidant nutrients, providing protection against free radicals and other toxins and influencing biomarkers associated to most aspects of aging.

Flavour

Neutral

Dosage Form

Pellets in capsule

Ingredients

Liposomal Curcumin eq. to Curcumin 95% - 100 mg
Liposomal Resveratrol eq. to Resveratrol - 37.5 mg

Available in

60 Capsules

Highlight

Curcumin positively influences biomarkers associated to most aspects of aging. Curcumin exhibits potent antioxidant, anti-inflammatory properties and can delay cellular senescence to promote longevity by reducing the risk of cognitive decline and skin aging. The antiaging mechanisms of resveratrol are mainly in ameliorating oxidative stress, relieving inflammatory reaction, improving mitochondrial function, and regulating apoptosis.

Nootropic

Description

We have formulated Extended-release L-Theanine and Caffeine pellets which ensure effects for longer hours thus reducing dosage frequency

Flavour

Neutral

Dosage Form

Extended-release Pellets in capsules

Ingredients

L- Theanine (50mg) XR
Caffeine(75mg) XR

Available in

60 Capsules

Liposomal Sleep Aid

Liposomal Sleep Aid

Description

Our Liposomal Sleep Aid capsules nutraceutical product carries ingredients such as melatonin, GABA and Magnesium. Melatonin contributes to the reduction of time taken to fall asleep. The liposomal formulation allows for the higher absorption of its active substances

Flavour

Neutral

Dosage Form

Liposomal Pellets in capsule

Ingredients

GABA 28 mg
Melatonin 0.7 mg
Magnesium 8.4 mg

Available in

60 Capsules

Highlight

Liposomes are microscopic spheres made of natural phospholipids such as phosphatidylcholine, the same building blocks as our cell membranes. Liposomes carry ingredients such as Melatonin, GABA and Magnesium in their center protecting them from the digestive processes and enhancing their absorption

Hangover Support

Description

Our Hangover support nutraceutical product carries ingredients B. subtilis and B. coagulans that naturally break down alcohol into water and carbon dioxide. Theoretically, the sooner your blood alcohol level reaches zero, the more quickly your hangover can pass.

Flavour	Dosage Form
Neutral	Pellets in capsule

Ingredients

- B. Subtilis- 1.25 BSP
- B. Coagulans- 1.5BSP
- Pyritinol- 50mg
- Dihydromyricetin- 50mg

Available in

60 Capsules

Highlight

Our acid-resistant capsule protects the Bacillus subtilis and Bacillus coagulans bacteria from the stomach's natural acids so they can reach the intestine, where most alcohol is absorbed into the bloodstream. Studies suggest that Dihydromyricetin increases the activity of 2 enzymes alcohol dehydrogenase (ADH) and acetaldehyde dehydrogenase (ALDH) — thereby helping your body break down alcohol and reducing hangover effects. Pyritinol with its prostaglandin inhibitory effects results in a prevention of methanol and formaldehyde induced inflammation.

Hangover Support

Liver Protectant

Description

Our Liver protectant support nutraceutical product carries ingredients that effectively protects against liver damage by detoxifying some of the harmful compounds in alcohol & supports the activity of oxidation and reduction of various alcohols and aldehydes in the body.

Flavour

Neutral

Dosage Form

Liposomal Pellets in capsule

Ingredients

Pancreatin- 10000

Curcumin(THC) -100mg

Milk Thistle-50mg

Available in

60 Capsules

Highlight

Curcumin -Alcohol dehydrogenase is responsible for catalyzing the oxidation and reduction of various alcohols and aldehydes. Emerging research suggests that curcumin, the active compound in turmeric, may effectively support the activity of alcohol dehydrogenase in a way that protects against liver damage.

Milk Thistle - Studies on Milk Thistle (silymarin) suggest that it may detoxify some of the harmful compounds in alcohol, thus protecting your liver. Plus, it acts as an antioxidant, neutralizing harmful free radicals that are produced as your body metabolizes alcohol. Additionally, silymarin may turn off the inflammatory signals activated by alcohol.

With a Vision of Making Quality Healthcare Affordable Through Drug Delivery Solutions Focusing On Patient Convenience and Adherence, ZIM Labs' value proposition is its ability to provide a range of technology-based drug delivery solutions and non-infringing proprietary manufacturing processes for development, manufacture and supply of innovative and differentiated generic pharmaceutical products to its customers globally.
