

Easy to see measuring jug with easy grip handle

Model TDSJUG

Description

The jug has a large base to make it stable and is designed to fit on the Thoughtfully Designed talking kitchen scale.

It is printed on the outside with large easy to see markings in ml, pints & UK fl oz.

The handle has an easy to grip shaped foam sleeve.

The pourer has a locating groove on the underside that can rest on the edge of other containers when pouring.

Warning !

Always use the jug on a flat level surface.

Take extra care when using the jug with hot contents and be aware that the contents and jug may become very hot after use in a microwave.

The jug can be washed in a dishwasher, however it is recommended to hand wash in warm soapy water as dishwashers will gradually erode the markings and the surface may become scratched.

Dishwashing at high temperature may also reduce the elasticity of the foam grip

Important: Clean the jug in warm soapy water and rinse before first use.

Please note that the jug could be very heavy when full.

Measurements:

The jug has been carefully calibrated but due to possible discrepancies in print alignment we specify a tolerance of 5% in the measurement markings.

Guarantee

For Hygiene reasons the jug is not returnable unless faulty.

This product is guaranteed from manufacturing faults for 12 months from date of purchase. If you have any problems with the product firstly contact your retailer or supplier.
