SPARROW® | ASCENT

Transcutaneous Auricular Neurostimulation (tAN®)

Safe, Comfortable, Drug-Free Opioid Withdrawal Treatment

Imagine an opioid withdrawal treatment option that integrates seamlessly with your current clinical workflow, making it easier for you and your staff to deliver high-quality treatment to more patients. Having a less complex and more flexible way of ensuring patients successfully overcome opioid with less burden on you or your staff means a smoother and more consistent transition to the next phase of recovery. That's a win for everyone involved.

Introducing Sparrow Ascent, the only FDA-cleared, drug-free, non-addictive, non-invasive, wearable treatment for the relief of opioid withdrawal symptoms. This next-generation product has been reimagined for more versatile patient use, including — in-patient, out-patient, or in the comfort of their homes. What's more, the Sparrow Ascent starter kit includes 28 lightweight, flexible earpieces to address the prolonged withdrawal experience now seen with the prevalence of fentanyl.

Sparrow Ascent is available in the U.S. by prescription only.

Indication for Use

The Sparrow Ascent is a transcutaneous nerve field stimulator that is intended to be used in patients experiencing opioid withdrawal in conjunction with standard symptomatic medications and other therapies for opioid symptoms under the supervision of trained clinical personnel.

SPARROW® | ASCENT

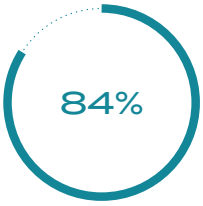

Transcutaneous Auricular Neurostimulation (tAN®)

No Pills, No Needles, Just Results.

Sparrow Ascent is the first and only FDA-cleared, non-invasive wearable neurostimulation device for opioid withdrawal relief backed by a Level 1 clinical trial. More importantly, our studies have shown Sparrow Ascent begins to provide significant opioid withdrawal symptom relief in as little as 30 minutes.

Here's what we discovered in the 31 patients suffering from opioid withdrawal symptoms with a Clinical Opiate Withdrawal Scale (COWS) score >15:

84%of participants experienced mild or no withdrawal symptoms after 60 minutes of therapy.

100% of participants sustained a clinically meaningful reduction in withdrawal symptoms by day 3.

9 out of 10 participants who completed detox accepted a referral to continue opioid use disorder treatment.
