

Wireless Charging That's Built for the Way We Live

You've seen wireless charging for smartphones and other electronics — but never like this. With Resonant Link, the world's fastest wireless charging is at your fingertips, as fast as wired and effortless to align.

Reliable Charging Every Time

Wow your customers with 3x faster wireless charging for the devices they depend on and 2x greater room for misalignment. They'll have confidence in their charge, every time.

Drop-In Replacement

Our coils are Qi-compatible with the same size and electrical characteristics as existing coils. It's as easy as swapping a SIM card.

Same Cost

Our technology is built on standard PCB manufacturing lines, making our chargers available at the same cost as other solutions.

3x

Faster charging

vs. conventional wireless for charge speed that's on par with wired

2.5x

More charging

before power throttling to maximize battery life

2x

Greater misalignment

to charge without needing to place devices on one exact spot

1:1

Same cost and size

as existing chargers to make the switch to wireless seamless

"Resonant Link's wireless power expertise combines the fastest recharging with manufacturing simplicity."

– Sunny Webb, Chief Technology Officer, Veris Health

"After 35 years, I'm more impressed with [Resonant Link] than any other partner."

– Fortune 100 Company
