

ABex RM-DIGIO

ABex rear module with eight isolated outputs and five isolated inputs

Overview

The ABex RM-DIGIO is a rear module for the ABex System. It is designed to connect digital signals to the back of a ABex chassis for example for cabinet control. As all IOs are isolated it's possible to use different voltage levels for each IO.

Features

- 8x isolated Outputs
- Up to 60V per output
- Up to 1A per output
- 5x isolated Inputs
- Up to 30V per input
- Integrated in Konrad DigitalIO and NI TestStand
