ABOUT US

Shepherd Hospital Equipment Ltd is an independent family run business with over 40 years experience specialising in service and maintenance, offering bespoke contracts within the NHS and Private sectors nationwide.

We have strong working ethics firmly set in building working relationships based on trust and integrity with our clients, both large and small. Our aim is to give the best possible service by being punctual on-site, open and honest in our communications both verbal and written and being accountable for our actions. We pride ourselves on offering a personal, friendly service with a high degree of professionalism at a very reasonable cost.

SERVICING

Keeping your equipment monitored and tested is essential for sites both large and small, saving on asset downtime, and provides further peace of mind for patient safety.

Our engineers are trained to a very high standard and we have a policy of Continual Personal Development to enable them to keep up to date with legislation, methods of good practice on site, and new product innovation within the industry.

We know that annual contracts do not suit every client and with our flexible approach, we can accommodate “on-demand” and one-off service requests.

The Shepherd management team continually monitor and work with MHRA, ISO, manufacturers and other bodies for device alerts, safety information and general industry updates.

WHAT WE SERVICE

Trolleys**

**Medical
Record
Trolleys**

**Waste &
Linen Bin
Trolleys**

**Gas Bottle
& Canteen
Trolleys**

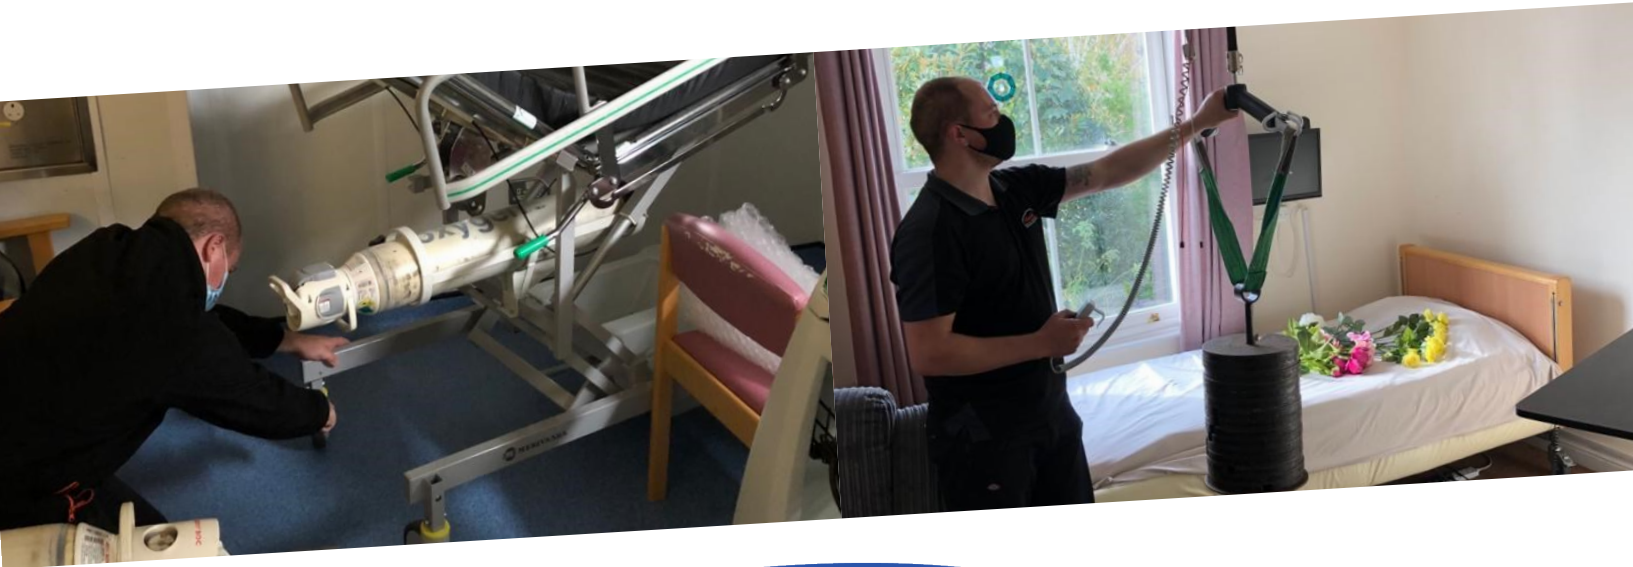

If your equipment is not listed please contact us for further information.

REPAIR

Our engineers carry an extensive range of spare parts in their vehicles allowing them to repair equipment on initial visit to site, even for unscheduled equipment.

As an independent company with contacts with major manufacturers of hospital equipment, we hold all the necessary technical manuals and have access to the most up-to-date part lists and information. With this resource we are able to fit authentic spare parts from a range of suppliers.

All staff employed by Shepherd (Hospital Equipment) Ltd carry identity cards, are DBS checked and wear our standard uniform.

ASSET TAGGING

We offer an asset tagging bar code system which allows the engineer to capture the unique details of each asset on the first visit. On subsequent visits they can scan the bar code and record service information and recommendations for repair for each item.

After each visit a full electronic report is generated and sent to the client, giving them a full and transparent audit history for each asset.

We also supply hospital equipment - turn the page to see a taste of what we can offer.

Eleganza 1

A fully adjustable electric bed. The Eleganza 1 hospital bed is designed for standard hospital wards and long term care units. The bed has a simple construction with a wide range of above-standard features and sophisticated functions delivered at low cost, thus providing customers with great value for money.
