ARBITRUM ONE SOON

# Pepe's Game:

**Experience the thrill of the trade in one click!**

Most traders work hard for 10% odds of success. Gladly. Few things are as thrilling as placing that trade and waiting for the outcome. Pepe's Game allows you to experience that unique rush with superior odds of success. And without the complexity.

The rules are simple: win BIG when the price moves in your direction and lose when it moves against you. The catch? You don't get to choose your direction - Pepe does!

**Just click SPIN and experience the thrill of the trade from the edge of your seat with Pepe's Game!**

**1 Select your size & click SPIN ...**

**2 Let the spinners reveal your trade! Is it going to be ...**

- BTC or ETH
- Higher or Lower?
- For 15s, 30s, 45s or 60s?

### 3 Get ready for the thrill!

 If the result of your spin is HIGHER, you want that shiny rocket to go UP.

 If it says LOWER, you want the rocket to go DOWN.

If price closes in your direction **once your time is up** – **even by a cent** – you win!

## Winning with Pepe

Pepe works 24/7 to give you this experience – and he loves it! He's the one rooting for you to win. All he asks for is a humble 10% tip to keep those spinners running smoothly. Don't worry, you won't feel it when your balance grows significantly in a matter of seconds!

On a **\$20** spin Pepe keeps a **\$2** tip.  
But if you win, you get back a grand total of... **\$34.4!**

# Winning even more with Pepe

Introducing \$PEG – the token that powers the entire Pepe Nation\*

FOR AS LONG AS YOU MAINTAIN YOUR \$PEG, YOU WILL RECEIVE:

- Income from \$VIPLS bribes
- Voting power on governance proposals
