A Virtual Project Manager

A self-service portal developed to assist customers monitor and track their projects in real-time with interactive charts and downloadable reports.

Monitor and track projects. DataStream portal provides a comprehensive insight into all aspects of your projects, from status to billing and budget spend, whenever you need it and wherever you are located.

Each client portal is securely segregated and customized. Users are designated by project or client.

The platform is designed to provide secure access to real-time project information from any device, whenever you need it.

We have simplified Project Management with task automation and the ability to monitor status of projects as needed.
