Discover TASK™
The Assessment of Sustainability Knowledge
THE WHY

Is 100% of your students sharing common sustainability knowledge and a basic understanding of the challenges?

How can you measure and demonstrate impact for your stakeholders (rankings, accreditations, recruitment, employer brand, etc.)?
INTRODUCING TASK™ is an online certification assessment of sustainability knowledge that will be launched in Spring 2023.

• A robust measurement tool that can be easily integrated into any program
• Composed of 112 questions (MCQ)
• Available in English and French
• Provides relevant, comparable metrics for monitoring and steering education for sustainability

By launching TASK, we aim to create a system change lever that will make sustainability a common language for all.
Task Enables

**Students** to understand and demonstrate their systemic sustainability knowledge

**Universities** to measure the level of sustainability knowledge to steer strategy and demonstrate impact

**Ranking & accreditation bodies** to have relevant, robust and comparable data of sustainability knowledge outcomes
WHAT IS TASK ABOUT?

The scope of TASK is informed by our model of sustainability knowledge, in which we state that all individuals should know and understand the planetary boundaries (Earth system), the main foundations of human welfare, and the multiple interlinkages existing between these dimensions.

All individuals should also know and understand the importance of systems made by humans that interact on all dimensions of sustainability and are potential levers for building a sustainable future.

WHAT TASK COVERS

Earth Systems

Core planetary boundaries
- Climate Change
- Biosphere Integrity

Regulating planetary boundaries
- Freshwater Use
- Land-system Change
- Ocean Acidification
- Novel Entities
- Biogeochemical Flows
- Atmospheric Aerosols Loading
- Stratospheric Ozone Depletion

Human Welfare
  - Safety and Basic Needs
  - Social Welfare
  - Human Flourishing

Levers of Opportunity
- Governance
- Economy and Finance
- Science and Technology
- Individual and Collective Action

Human Welfare

Safety & basic needs
- Nutrition
- Health
- Access to Water and Sanitation
- Housing and Human Settlements
- Access to Energy

Social welfare
- Basic Income
- Social Equity
- Gender Equality

Human Flourish – Emancipation
- Education and Culture
- Peace, Justice, and Political voice
- Access to Networks and Social Interaction

Levers of Opportunity
- Governance
- Economy and Finance
- Science and Technology
- Individual and Collective Action

Earth Systems
- Core Planetary Boundaries
- Regulating Planetary Boundaries

Levers of Opportunity

**Governance**
- Laws, Policies, and Institutions
- Infrastructure, Planning, and Natural Resource Management

**Economy and Finance**
- Macroeconomic Considerations and Finance
- Microeconomic Considerations, Business, and Industry

**Science and Technology**
- Sustainability Science
- Technology and Innovation

**Individual and Collective Action**
- Transformative Change
- Cognitive Capacity for Sustainable Development

The letters indicate in which order the sections appear in the assessment.
BECOME A CHANGE LEADER

We invite you to offer TASK across all your programs and drive forward the movement to mainstream sustainability literacy worldwide!

More than universities & schools have already committed to be change leaders, including:

![List of universities and schools](image-url)
TASK AT YOUR UNIVERSITY

PRICING OPTIONS

FOR A PROGRAM

50€
per voucher

FOR THE INSTITUTION

annual subscription based on university size

25€
per graduating student

This pricing applies when the client commits to offer TASK across the university (reaching most of its students) in 3 years, hence, becoming a Change Leader!

Provision of an unlimited number of vouchers *
"The power of higher education to change the world exists both in what it is, but also more importantly in how it affects the futures of all students. Nurturing enquiring minds has always been part of that mission – but now it is more important than ever that it also encourages an aware, sustainable mindset in every student. Sulitest will support this, providing a common framework against which teaching in this vital area can be assessed."
– Duncan Ross, Chief Data Officer at Times Higher Education

“I support the idea of seeking to identify key principles and insights around sustainability, track initial awareness and progress in business education and beyond to raise quality and ultimately action to tackle global warming. Sulitest is an important initiative to explore ways to meet these goals."
– Andrew Jack, Global Education Editor at Financial Times

“Sulitest is an innovative pedagogical tool that can be deployed in multiple ways to advance educational objectives in sustainability and global responsibility. I fully endorse this tool and encourage schools to contribute to the community working to ensure the Sulitest’s relevance for promoting action toward solving urgent global challenges and promoting transformation in sustainability education and beyond."
– Eric Cornuel, Director General & CEO at EFMD
