WHAT IS APTOPAD?

Aptopad is the best decentralized launchpad on the Aptos Network. With Aptos building the safest and most scalable Layer 1 blockchain for the million users, Aptopad is engineered from the ground up to empower Aptos project owners, by offering a strategized token launch experience with customized launch model, time period, accepted token types and auction algorithms. Aptopad only succeeds if our launchpad projects succeed.

WHAT IS APTOPAD?

Aptopad is a Startup Incubator and Launchpad platform. Super Launch will help Startups with the funding and support to launch their project in the most efficient and secure way possible. Aptopad team will provide quality, security and trust investment ways to blockchain projects and Investors. Filling the gap that exist between project ideas and needed funding.

We provide project creators with an All-In-One solution right from development to fundraise stage. who investors with effective solutions for investments in early stage ventures while ensuring a risk-free system via our Anti-Rug mechanism set up. Our ultimate goal is making Fundraise and Investing an amazing adventure.

WHY APTOPAD?

We have an ecosystem that produces solutions to common dilemmas occurring in a rapidly evolving industry. Unpleasant experiences in the sector can play a negative role in the development of the sector from time to time and hamper the current growth. At this point, Aptopad aims to adapt to change, support, and contribute by developing. Our main goal in this protocol developed with these principles; With its fast transaction, low transaction fee, and secured transaction, it offers users a unique experience with the insurance protocol that we now call Extended Insurance Protocol (EIP).

WHAT IS APTOS?

Aptos is a Layer 1 Proof-of-Stake (PoS) blockchain that employs a novel smart contract programming language called Move, a Rust-based programming language that was independently developed by Meta (formerly Facebook)'s Diem blockchain engineers.

Aptos's vision is a blockchain that brings mainstream adoption to web3 and empowers an ecosystem of DApps to solve real-world user problems.

The PoS blockchain can achieve a theoretical transaction throughput of over 150,000 transactions per second (tps) through parallel execution.

In March 2022, Aptos raised \$200 million in a seed round led by the venture capital firm Andreessen Horowitz (a16z). Other crypto heavyweights like Tiger Global and Multicoin Capital took part in the funding round. Fast forward to July, the startup raised another \$150 million in a Series A round led by Sam Bankman-Fried's FTX Ventures and Jump Crypto. Two months later, Binance Labs made a strategic investment of an undisclosed amount in Aptos, bringing its valuation to \$4 billion in September.

On Oct. 18, 2022, Aptos announced the mainnet launch, while the Aptos genesis occurred on Oct. 12, 2022.

WHAT IS APTOPAD PLATFORM?

IDO launchpads are designed for decentralized fundraising. Conventional launchpads tend to rely on the first come and first users. Unlike traditional launchpads, our launchpad is fair and equitable for all and yet it will still reward token holders just as a centralized exchange would. The Aptopad launchpad doesn't have high financial barriers to be able to enter the market.

Aptopad also does not have whitelist spots based on first form fillers. The Aptopad fundraising will follow the trilogy system marked in three rounds. The system ensures guaranteed fund allocation to the participants based on the quantity of Aptopad tokens they own. Look at our trilogy system for fund allocation:

WHAT IS APTOPAD PLATFORM?

Round 1: This round will include

All token holders in the pool fulfilling the base requirements of staked(their wallet irrespective of staking) APD tokens. APD Token Holders can contribute based on the staked quantity of APD tokens or the size of their Tiers they are providing liquidity for.

Whitelisting: All users will be allotted 1 hour to buy tokens. It is the same time frame when they can contribute to the given IDO projects. All users will get confirmed allocation based on their eligibility criteria they purchased.

Round 2: The third round will only take place if IDO projects have any unsold/spare tokens via FCFS

Round 3: The round is open for everyone and no criteria of staked APD token applies here. The only criteria the users need to meet is social network criteria. (member of TG,Discord,Twitter and Crew3xyz.)

APTOPAD AUCTION CONTRACT

Aptopad is using a self-running automated contract for the sale of APD tokens and the contract is deployed on the APTOS blockchain. The auction contract follows the reverse Dutch-Auction methodology having round time as defined by the user. The auction is settled once the round is ended either on the completion of the time cycle defined or the whole pool is sold out and is then restarted again after the automatic in-built final price discovery, pool discount settlement and then the distribution of the tokens accordingly to the investors.

Aptopad auction contract provides many useful features and options to the users who will be using the contract for decentralized fundraising of their project.

APTOPAD AUCTION CONTRACT

Users can easily define and set multiple factors and enter the values for their auction rounds at the time of the initial deployment of their auction contract. These rules of conduct include but are not bound to, are opening price, maximum pool supply, settlement algorithm, combined discount percentage, price change interval, the change percentage and much more. Adding more value to that, Aptopad Launchpad also enables the users to change and redefine their auction round configuration and values at any later stage in the future even after the initial deployment of the contract.

TOKENOMICS

APD TOKEN RELEASE DETAILS

Percentage	Description	Price	Vestings
10%	Private Round	\$ 0,010	TGE %0 - 2 Months Cliff, Vesting 12 Months
10%	Seed Round	\$ 0,012	TGE %4 - 1 Months Cliff, Vesting 8 Months
4%	Public Round	\$ 0,015	TGE %25 - Vesting 3 Months

TIER LEVELS

APD TOKEN	INVEST ALLOCATION	TIER LEVEL
1.000	\$ 20	Tier 1
5.000	\$ 50	Tier 2
10.000	\$ 100	Tier 3
50.000	\$ 500	Tier 4
100.000	\$ 1000	Tier 5

ROADMAP

Q1 2023

- ✓ Social Media Launch
- ✓ Token Launch
- ✓ Public Sale
- ✓ Contract Audit

Q2 2023

New Staking Tiers
CEX Listing

Q3 2023

Auction System Integration
Mobile App For IOS and Android
Website with MVP release
