

The author attempts to draw out with words the reality that affects the unfortunate of our society who are chosen to be “aborted”. With frank candidness the finger of accusation is pointed at the responsible parties.

# THE NEGLECTED GENERATION

Or

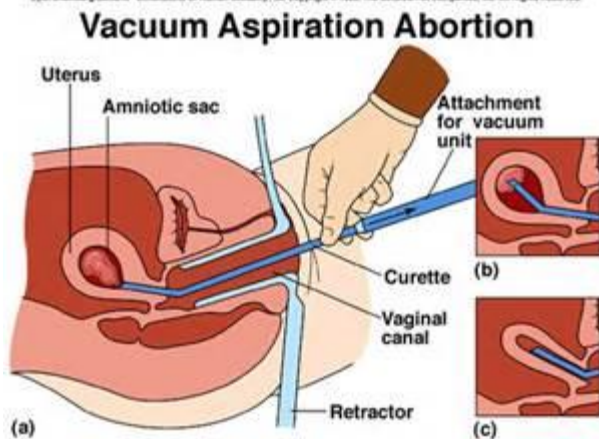

## The Great American Genocide

**Hey America:**

Here's a bit of verse I wrote. I suppose some will say amen, and those who vote for murder will be angered. But nonetheless, here it is.

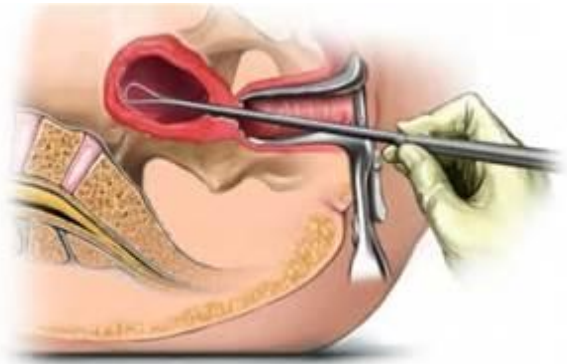

**Father and mother alike hate one out of every three of them.** Their chance of survival, to experience a breath of air, to see a sunrise or the splendor of the night's stars is about thirty percent. They are a people who have few friends who will speak for them or even shed a tear concerning their plight. Rare is a prayer meeting held to their benefit, nor would numerous preachers ever consider taking up their cause. Many politicians are afraid to fight for their wellbeing, thinking that to do so would make them unpopular, and therefore they believe they would lose their chance at a long, lucrative, and popular career. For some reason they haven't related to foreign aide, and their extinction is one of our president's most earnest endeavors. In fact, the American Supreme Court ruled them, **“Worthy of death”!**

From *Illustrations of Human Anatomy*, by Copyright © 1988, The McGraw-Hill Companies, Inc. All Rights Reserved.

And that they are...butchered in the worst ways. Many of the most newly detected and youngest of these, our American enemies, being yet fourteen weeks of age are attacked with suction machines. The aggressor (*The terrorist*) invades their homes and literally uses a suction device to rip them apart and then extract all traces of them. All that remains is a small pile of fleshy mush, which the aggressor can then conveniently flush down the toilet, in no different manner than if he were flushing away his/her own dung. (A)

Others are attacked with the sword--a loop-shaped knife that the aggressor (*who happens to be a medical doctor who in his/her hypocrisy forgets that he/she had sworn to save life, not destroy it*)--uses to chop the wee one into manageable, extractable pieces, to be discarded in perhaps a trash can or a city dumpster. (*The which, in reality have become graves for the many who are slaughtered each day in death clinic all across this land*). It is very rare that one of these innocents is given a funeral or memorial service, or a decent burial, and still less common is it for a tombstone or even a wooden cross to be placed over the final resting place of their bodies. For truly it would be thought impossible to build a tombstone over an entire city sewage system, or a city or county garbage facility, for in reality most of these innocents find their final place of burial as that of being either flushed down a toilet or thrown in a dumpster. (B)

If the innocents can manage to survive until sixteen weeks, the aggressors begin to use chemicals from their arsenal of weapons. The innocents are flooded with a salt solution until they are burned to death. Then the innocent's dead body is ejected from his home in a manner very similar to what would naturally occur some short time later. Of course, in the latter event the infant would be issued forth unto life and honor, if of course the innocent would by chance of fortune be loved, and therefore wanted and allowed to live. (C)

However, occasionally the aggressor is not successful in killing the innocent with the chemical weapon. In that case, the innocent is allowed to come forth into the world and almost always is laid down on the table and left to die without care, medical aide, or nourishment.

There are other unfortunates who have grown larger still. The door of their home is again craftily enlarged, after which they are grabbed with pliers and pulled alive from their supposed place of safety, until only the innocent's head is not though the door. A challenge arises in that the innocent's head is larger than the door in which it must pass through. But "hey no problem!" The technician simply cuts a hole in the back of the innocent's head and sucks out his/her brains. The head, now being imploded, can easily be withdrawn from its home. (D)

Still other aggressors would favor the "pill that kills." Less messy, and no surgical procedure is involved--that is if all goes as planned. (E)

Who are these people, these innocents? Who are their aggressors, (*These aggressors are home grown domestic terrorists—no they are not Muslim extremists, just the ungodly of our own land who have received the blessing of our society to work their terrorist's acts against the most defenseless and innocent of all our citizens*) and where is the place of the continual murder? The innocents are America's unborn children. The murderers are the American public which allows and promotes such destruction. The place of murder is of course what should be the safest of all places, the mother's womb. Our president-and our Supreme Court, and many other leaders are chief in promoting the massacre...over 60 million "legal" murders to date. **Yeshua will come to you, America, as Savior, or as destroyer...**

**you make the choice.** If you will but humble yourself, cry out to Him, turn from wickedness and seek good, He will come to you as a healer and a forgiver. **If you do not, He will surely destroy you.**

*"Come now, let us reason together, says the LORD.(YeHoVah). Though your sins are like scarlet, they shall be as white as snow; though they are red as crimson, they shall be like wool. If you are willing and obedient, you will eat the best from the land; but if you resist and rebel, the sword will devour you."* (Is. 1:18-20 KJV)

An American Watchman,  
Gregory A. DeHart

Consider:

PS.82:3-4, Pr. 24:11-12, 1Chr. 21:1-30, Mt. 10:22, Is. 10:1-4, Ps. 94:16, Is. 10:1-4

- A-The Technical term for this murder procedure is suction aspiration.
- B-This form of murder is called dilation and curettage.
- C-The saline and prostaglandin method of death.
- D-Dilation and evacuation, this being the method of late term abortions.
- F-The "pill that kills", RU 486
