

Today's Providers Offer Ethos Care.

Ethos Care is the modern physician's choice for mental and behavioral health solutions for their patients.

It's a Simple Process:

- 1** Provide your patients a simple 3 minute screening that identifies common behavioral health challenges and conditions. The screen and tests are diagnostic tools and qualify for you to receive payment from the insurance provider.
- 2** Based on the results of the screening, a follow-up test which takes approximately 20 minutes will be provided. A detailed assessment is provided to you following the test.
- 3** Once we receive the assessment, we'll connect your patient with the types of care giver they need; including, psychiatrists, therapists or coaches that are trained to help with their condition.

To get started, please call us at **(513) 443-1700** for clinicians. One of our expert specialists will help you get your patients started.
