

### Reptile Questionnaire

Please complete this questionnaire and email in to [info@breladesvets.com](mailto:info@breladesvets.com) FAO Jemma, **before** your appointment. If you do not know temperatures / humidity then please find them out (this may require purchasing a thermometer / hydrometer). Read temperatures with a thermometer or temperature gun – do not rely on setting on thermostat. You may need to look at your equipment to ascertain UV percentage / brand / type (this is usually printed on the bulb / tube / thermostat). A photo of the enclosure can also be useful.

Common species name:

Latin name:

Sex:

Age:

Where purchased from:

Time in your possession:

Cage mates:

Has this animal mated / bred / laid eggs / given birth in the past:

Has this animal hibernated / brumated in the past:

Enclosure type:

Enclosure dimensions:

Heating type:

Thermostat: Yes / No                      If yes: Dimming / Pulse proportional / On/off

Temperature gradient \*C/\*F – Hot end:                      Cool end:

Heating on per day in hours:

Lighting type:

UV percentage (ie 2.0, 5.0, 10.0):

Light on per day in hours:

Date UV light last replaced:

Humidity %:

Any use of humidifiers:

Substrate type:

Diet:

Frequency of feeding:

If feeding insects are you gut loading them and if so what with:

Any supplements used:

Supplement use by date / best before:

Any previous medical history / medication:

Brief description of current problem:
