# Starbooth BY S+ARCK®

A photo booth focused on the future!

## ID photos for official documents

- Photos that are ICAO-compliant (International Civil Aviation Organization) thanks to the exclusive "ID-Photomaton®" patent. Software accredited by the Home Office.
- WYSIWYG technology (What You See Is What You Get): the user can see the photo on screen exactly how it will be printed.

## Compatible with the Ephoto service

For online applications for driving licences and residence permits.

## Accessibility

Transfer bars for people with disabilities (optional).

## Cool designer seat

The translucent seat with LED lighting creates a comfortable atmosphere and has room for 1 or 2 people. The seat is in a fixed position; the camera automatically adjusts to the user.

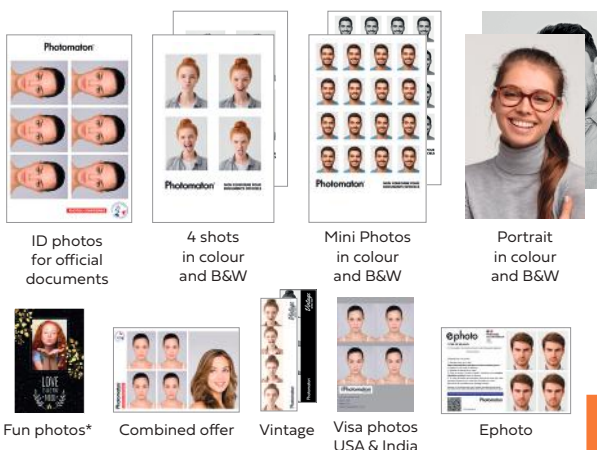

## Inside, the 17" touch screen makes browsing easy

An intuitive interface with sound assistance available in several languages for a quick photo experience.

## 32" exterior screen with dynamic and customisable display

Image rotation and videos advertise both ID photos and fun photos. A few clicks are all you need to update the display.
