“ **The Guardian Appliance Is Powerful. Their Team Is Skilled, They Solved Our Problem.**

Nozomi has provided a high level of customer service and expertise throughout our procurement and implementation process. Their sales, engineering, and support teams are excellent and their product is best in class.

[Sr. Program Manager, Manufacturing Industry ›](#)

“ **Nozomi Guardian Is Literally Window To The Wire.**

Equipment was installed according to plan and after some site configuration, it was set to learn. I was amazed that 15 minutes later the things we were learning about our network – not all of it was good!

Energy & Utilities

“ This Product Keeps Its Promises.

The learning phase lasted one month, and the well-designed interface makes it pretty simple. Now, Guardian gives us precise alerts, with almost no false positives. Real events are clearly visible with the risk level indicator, making it easy to decide when and how to react.

[System Administrator >](#)

“ Excellent Application & Excellent Support.

Nozomi were excellent from the product itself, right through to the support and expertise provided during the engagement. The product detected 100% of the malicious packet captures which we used to test the product, ranging across multiple attack scenarios.

[Security Operations Manager >](#)

“ Nozomi - Your ICS Cyber Security Partners.

Their product offering is intuitive, easy to configure and cost-effective to deploy. Dealing with their Tech Support and Engineering resources has been a first-class experience – they are very hands-on, and have been receptive to our many product enhancement requests.

Manufacturing

“ Exceeded Expectations. Deeper Visibility Than Expected.

We place an emphasis that every vendor we engage with understands we are not a set up for a “cookie cutter” type of solution. I honestly expected this to be a problem for most if not all vendors. And I was correct, with Nozomi being the sole exception. Not only has their solution done as advertised, and then some.

[Senior Industrial Security Manager >](#)

“ Once You Try Nozomi And Its Rich Feature Set You Cannot Imagine Operating Without It!

We put Nozomi head to head against other similar products and the Nozomi platform was able to pick out and properly categorize more L2 devices than any other tool in the market place at the time of test.

[Security Analyst >](#)

“ Great Solutions For ICS.

The solution still has many features that manage the OT environment, such as inventory and vulnerability analysis capabilities. An extra point for the solution is the communication flow map of the neural network, containing information of great relevance for an incident response.

[IT Analyst >](#)

Services

“ Good For Both Operational Insights And Visibility Over Security Breaches.

A robust solution that gives us all the insights we need about our OT network security. Visibility over the OT network and the automatically illustrated topology diagram, it shows us devices even we aren't aware of and their corresponding connectivities and communications. It is also easy to deploy and configure.

[Technical Director >](#)

“ A Great Help To Understand Your OT Networks.

Excellent support on new features, APIs, bug fixing. Easy deployment. Good catalogue to choose the right model from. The key factors that drove decision-making: breadth of services, product functionality and performance, strong services expertise.

[ICS Cyber Security Analyst >](#)

“ Great Cyber Security Solution With Lots Of Features Focused On Industrial Networks.

One of the best solutions for industrial networks security. Outstanding feature for the network visualization in real time of traffic and protocols for a fast response in urgent situations. Frequency of product use: weekly.

[Programmer >](#)

Other Industries

Innovative, Easy To Implement And Even Easier To Maintain.

I like the ability to see all of appliances at a glance. Guardian is feature rich and Nozomi offers many different solutions for all aspects of our OT environment and they are quick to implement any features and requests that we have as well.

[Systems Specialist >](#)

Your Network Infrastructure Is Now Secure.

The discovery of the network infrastructure in large enterprises enables rapid intervention by seeing the needs of efficiency, security and development. Real-time monitoring of the topology structure accelerates cost and incident troubleshooting. Inventory listings are easily accessed.

Nozomi Networks

The Leading Solution for OT and IoT Security and Visibility

Nozomi Networks is the leader in OT and IoT security and visibility. We accelerate digital transformation by unifying cybersecurity visibility for the largest critical infrastructure, energy, manufacturing, mining, transportation, building automation and other OT sites around the world. Our innovation and research make it possible to tackle escalating cyber risks through exceptional network visibility, threat detection and operational insight.
