# NATIONALS REPORT

#### **President's Notes**

By Dave Lundegard

On August 24th and 25th more than 75 cars competed across all classes in the first combination USA Nationals. The independent racing results of all three tracks were then consolidated and produced the overall winners.

The 2019 Combination Nationals also produced two new USA records\*

\*IN- Ron Hesskamp set a new USA record in Class 9A at 142.364 MPH.

\*CA- Bob Jacquez broke his own USA record in Class 4 at 143.802 MPH.

Similarly all three tracks conducted their own independent business meetings and their results will be combined as well. I would anticipate an upcoming membership vote to approve and conclude the 2019 business meetings.

The 2019 tether car World Championships will be held in Brisbane, Australia, and will begin on October 16th. At this point it appears as though we have a small delegation of Americans attending the event. We look forward to the camaraderie and running our best as team USA.

#### **Secretarial Notes**

By J. Phil McDonald

The AMRCA's first Combination Nationals is in the books! Congratulations to all the class winners. There were 57 cars competing in 13 classes. New records were set in AMRCA Classes 4 and 9A! All reports seem that everyone enjoyed the

new format. The final results can be found elsewhere in this newsletter.

Each track held it's own AMRCA annual business meeting. Those meetings have been compiled into one that you can find elsewhere in this issue of Model Race Car News. The one common thread throughout the three meetings is that we retain the current AMRCA officers for another term.

On a sad note, I called Ted Maciag for several days before and after the Nationals with no response. I had Ted's highschool classmate, who lives in Florida, call the Brevard County Sheriff's office to ask for a wellness check only to find out that Ted had passed away at home on August 24th. In accordance with Ted's wishes, I made a trip to his home and collected all of his race cars. Those cars will be offered to AMRCA members in a later issue of the newsletter with the proceeds going to the AMRCA.

Our membership now stands at 118. The PayPal button on the AMRCA web page is working well with several members renewing their membership using PayPal. Just remember to mark your PayPal payment as a gift so as to allow the AMRCA to receive the full amount of the payment and not suffer any fees.

Now it's on to figuring out who should receive trophies for this year's Nationals. So long as there were at least three entries in a class, the top three will receive a trophy from the AMRCA. What with shipping, this will take a little while so please be patient and surprised when your 2019 AMRCA award arrives in the mail.

On behalf of the AMRCA, it's officers and membership, Thank You for participating in this year's Combination Nationals. Thanks go out to the organizers at each track. It's a big job, but it was fun!

Keep your speed up!

#### **Mighty Mite Corner**

By Steve Morse

The results are in from the last race, the tri-track Nationals, and there was some excitement.

In Class 7C The .19 vintage was hotly contested with Bill Siry winning and Steve Morse excited to see his new prototype complete a run and end up in second place. Jay Procenko made his Martin Flash go faster than ever and gain the third spot. Jay is the man to watch

Class 6 D is proving to be a high speed class with some top veteran racers spurring each other on. Charlie Murphy raised the record speed to 145 in practice, spurring Steve Morse to squeeze an unofficial speed of 147.

Nick Tucci, with his Stuart Hamill prepared gear box was finally back at the track and he continues to raise the speed of his racer. Watch out for the dentist. He has several records under his belt.

I am thinking of recommending that we focus on the popular classes this year and maybe select different classes for next year. Let me know what you think.

#### 2019 COMBINED AMRCA ANNUAL BUSINESS MEETING

The AMRCA. annual business meeting was held on Saturday, August 24th and August 25th at each of the three sanctioned tracks. New York's meeting started on August 24th at 5:46 P.M. Est. Anderson's meeting started at August 24th at 5:30 P.M. Est. California's meeting was held on August 25th at the conclusion of racing.

The minutes of the 2018 AMRCA annual business meeting, held September 29th, 2018, at Whittier Narrows, California, were read at each of the tracks. Those minutes were approved as read at each of the three tracks.

The 2019 AMRCA financial report dated August 16th, 2019, was read at each track and approved. That report showed a current checking account balance for the organization of \$6085.26. The complete financial report is on the next page.

#### **OLD BUSINESS:**

#### **New York:**

- 1. Track Safety. The AMRCA 2015 business meeting recommended that all USA tracks install double safety fence, one course standard cyclone fence and a second course of smaller mesh wire and install an auto-broom shut-off mechanism. It is believed that New York and California have complied and that Anderson may be complete or is in progress. Someone mentioned that the latest FEMA rules state that a car is disqualified in its run if a manual broom is used to shut it off.
- **2. Electric Classes.** A discussion was held concerning the Electric classes as to why Speed Records and inspection criteria have not been finalized and included into the latest rulebook. It was agreed that we ask AMRCA for clarification.

#### **Anderson:**

**Tail Skids.** It was reported that carbide tail skids were no longer used.

#### California:

None reported.

#### **NEW BUSINESS:**

#### **New York:**

- 1. Nationals Format. Everyone agreed that they prefer the traditional format where the Nationals race is held at one location. Collaboration, friendship, problem solving, and a greater sense of competition are all enhanced at the unified National meet. It was suggested that the Combination Race format also had appeal and that possibly a Spring and/or Fall competition could be worked into the Annual calendar besides the traditional National meet. It was also suggested that AMRCA alternate combination and traditional Nationals formats in alternating years.
- **2. Electric Classes.** Discussion of Walt Wilson's proposal to add Open wheel classes to the Electric cars was met with approval. Doug Phillips asked why the Open wheel cars could not be added with a more simplified rule stating that E1, E2 and E3 have two divisions: Closed Wheel and Open Wheel. This suggestion was also met with approval. Charlie Murphy raised a question; How exactly do you measure an electric car trackside to be sure the wattage and

other parameters are policed correctly?

It was suggested that AMRCA technical or rules committees study this.

- 3. Class IV Manufactured Proto, B-Grade. Charlie Murphy protested strongly and gave an excruciatingly long list of reasons why the Rossi engine should be split off from Class IV into it's own sub-class and that tighter enforcement of the "reproduction pan casting" allowance so that pan-handle mounts (versus bridle lugs) are not allowed in the casting. Nick Tucci II commented that it seemed ironic that Class IV was originally created primarily to protect the McCoy and Hornet cars and engines from the Dooling cars and engines and that his grandfather, back in the '70's, would beat Dooling powered Arrows with his Rossi powered Arrow. All agreed that there should be a place for the Rossi but that it should not be allowed to ravish the McCoys and Hornets as it is today.
- **4.** Class 7D, Mites, Stock. Nick Tucci II reported that, based on the past 10 years of racing results, it appears that the cable in use for Class 7D is incorrect. The .047 inch (Green) cable specified in the rulebook for 7D should be changed to .035 inch (White). 6D cable remains at (Green).

#### **Anderson:**

**Nationals Format.** It was noted by all in attendance that the new format of a "Combination Nationals" was well liked. A motion to continue with the new format for 2020 was made by Lowell Shirey and seconded by Walt Wilson. Motion approved by voice vote.

**2. Electric Classes.** A proposal for electric classes was presented by Walt Wilson. That proposal was e-mailed to New York and Whittier Narrows. Walt Wilson made a motion to accept the proposal as presented, seconded by Bob Oge.

#### California:

- 1. **Newsletters.** Printed newsletters are expensive and should be optional via e-mail. Anyone with an E-mail address can get the newsletter and print their own in color unless they want a hard copy in black and white. The traditional printed news letter is the single largest expense of the AMRCA at almost \$ 1,500.00 per year!
- **2. Entry level electric cars.** The launch of the LSR E-1 car at the Sabbatini collecto was minimized due to the construction delays at the Whittier Narrows track. We hope to Reboot in 2020 at Sabbatini's with more participation.
- **3. Electric car discussion.** Marvin Justus proposed that we adopt Walt Wilson's proposal on separating the open wheel electric cars from the world class cars. A discussion ensued into the merits of separating the two styles of cars, although a vote was not taken, there was substantial agreement to Walt's proposal.

There was no verbal opposition to the proposal.

**4.** Advanced level electric cars. With the super-fast speeds recently obtained in the Electric class (224 mph) and we anticipate speeds even faster, we must first embrace safety as we enter into uncharted territory. We propose the AMRCA should appoint a committee to establish safety rules for the super high speed electrics that are on our horizon. The study should include but not be limited to the pan, pan handle and tire compound.

(Continued on the next page)

(Continued from the previous page)

**5.** World Meet 2022: The VMRCA has been asked to hold the world meet in 2022. The time frame is too short and we would consider hosting the event in 2025, however we would need to set up a committee to explore the possibilities.

# **ELECTION OF AMRCA OFFICERs 2020: New York:**

No one from New York volunteered to run for AMRCA office. It was agreed that existing officers should stay in place for an additional year.

Anderson: No

nominations presented.

#### California:

**Nominations.** Lee Roy James nominated renewal of all 2019 officers which was unanimously approved.

President: Dave Lundegard Vice President: Marvin Justus

Secretary/Treasurer: JPhil McDonald.

#### All meetings adjourned.

Respectfully submitted:

J. Phil McDonald, AMRCA National Secretary

October 5-6

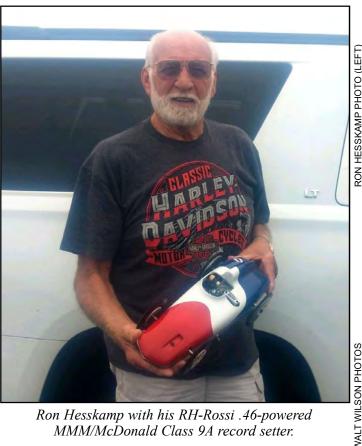

International Meet Brisbane, Australia

October 15 -20 (World Meet)

#### **AMRCA 2019 Combined Nationals** Anderson, Indiana

By Walt Wilson

The weather was unseasonably cool and pleasant. Ron Hesskamp set another record in Class 9A. After reworking the Rossi .46, he's run the MMM/McDonald only twice and set a record with each run.

Ron Hesskamp with his RH-Rossi .46-powered MMM/McDonald Class 9A record setter.

Lee Foldenauer with his Nelson-powered Class 3C Patriot/Ellis.

Phil Mcdonald, Ron Hesskamp Lee Foldenauer, Mike Baldwin, and Walt Wilson performed well in the other classes and placed well nationally. Phil McDonald deserves a THANK YOU for running the show and keeping things moving along. Lowell Shirey deserves a really big THANK YOU for spending the weekend handling the cables and horsing. Ron Hesskamp also deserves a THANK YOU for pushing several racers' cars off, some of them for many laps.

The Combined Nationals were well received and the members present voted unanimously to do it again next year. Otherwise, it was much like any other monthly race at Anderson.

Phil McDonald ran the show and still found time to turn 192.076 with his Picco Testa Rossa powered M2.

Walt Wilson with his electric-powered "Kiss Special". It managed to turn 129 riding on ground-down tires, hubs, and tail skid. It needed throttle programming adjustments.

### AMRCA 2019 Combined Nationals Seaford, New York

#### By Roland Bendel

It was perfect race weather in New York for the USA Nationals and a great opportunity for me to catch up with the Seaford team since our return to New York earlier this year. We missed being with the rest of the team, however, from Whittier and Anderson, hopefully next time!

Roland Bendel with his very fast WMCR 10cc Picco Testarossa-powered RoBe car took first place.

Some of the cars run at the New York Nationals.

(right) Nick Tucci and Bill Siry prepping Bill's NovaRossi powered Perekhodov 3.5 cc car

Charlie Murphy readies his OPS powered mite for push-off.

Roger Phillips readies his Carbon Fiber Vector for another run.

## AMRCA 2019 Nationals Whittier Narrows, California

Frank Fisher's Class 3A OPS-powered Fryco Mk 4

Dave Lundegard demonstrates his unique pushing style as Jim Okel assists.

Steve O'Donnell displays the award he received for his contributions to the club during 2019.

Bob Jacquez with his AMRCA Class 4 record-setting Rossi-powered Railton.

Stuart Hamill and cars he ran.

Racers enjoy the feast prepared by Dan Bridges

#### John Ellis Memorial Race Mite Gran Prix New York, Number 1 September 14, Seaford, New York

Diane Ellis and John's brothers, Bill (front) and Louie enjoy the festivities at the John Ellis Memorial Race at Seaford, NY, on September 14.

A rare sight at race tracks these days, Charlie Murphy's Dooling-powered Bordon (front) and McCoy teardrops.

(Below) A lineup of cars John Ellis built that were run at the Memorial. Three Kuebler/Ellis Eagle-powered Class 3A cars, a Kueble/Ellis Ellis- powered Class 10B (second from left), and a Kuebler/Ellis Dooling .29 powered Class 7B car. He was a prolific builder of quality cars and engines.

# Ted Maciag

11/25/1939 -- 08/24/2019

Long time tether car enthusiast, Ted Maciag passed away at home in Sharpes, Florida on August 24th, 2019.

Ted had been in declining health for some time and passed away just 61 days short of his 80th birthday. Ted was born in California in 1939 to William and Elvira Maciag. He spent many years in El Paso before moving to California where he worked in the RV industry, worked for Garold Frymire, and worked in the space industry. After retiring Ted moved to Clearwater, Florida, for a number of years and then ultimately settled in Sharpes, Florida. Ted was the founding General Secretary of WMCR, served as AMRCA President six times and produced Model Race Car News for a number of years.

Ted had raced tether cars on the El Paso track, Whittier Narrows, Anderson, and Cedar Creek track on Long Island as well as Sweden, Germany, Poland, Russia, France and Italy.

The AMRCA has lost a true friend!

## First Combined Mite Grand Prix a Roaring Success

By Steve Morse

Ten cars, six racers, and three more watchers made for a fun and competitive event. More to come.

Stuart Hamill beat his father's 10 year old class record by nearly 10 MPH in Class 6A with 107.829. Steve Morse upped his last record by nearly five mph in the 6D .29 class at 148.954

Sandwiches and ice cream kept everybody happy, especially the orange-covered Dreamsicles.

There was a big entry of seven people in Class 7C running .19 cars with vintage motors. JayProcenko won and would have broken the record, if the clock had not temporarily failed to show his speed! Others that followed him were: Frank Fisher with another Martin Flash, Stuart Hamill with a Hornet-powered Hornet car, and Steve Morse with his M&H proto.

Rich Democh had motor problems in his newly pre-

pared .29 vintage car. He will be back to see it go.

Charlie Hamill not only managed the timing but also had top time in the Class 6B and ran in two more classes. He did an amazing job in keeping track of all the competitors. We will try to run by class in our next meet, to make it easier for Charlie

Bob Jaquez, Marvin Justus, and Glen Dye were present and helped out but didn't run.

Nick Tucci's group in Seaford NY were impressive with two Mite classes. Charlie Murphy and Nick ran Class 6D cars and George Fellows ran in Class 7D with a vintage .29, just getting beat by Stuart for a second place.

Hats, T-shirts, and decals enhanced the fun. We might get some more T-shirts for those that want them, let me know.

Thanks again for your enthusiasm.

#### The Last Word

By Walt Wilson

My "Kiss Special" electric car has stirred up quite a bit of interest among the racers who have seen it at Anderson. Several said they were going to build similar cars and some asked if plans were available for mine (Not currently).

The car uses mostly R/C car components with only a few custom parts made by expert machinists.

The most frustrating part was the automatic timer/throttle control. You can't just go to a hobby shop and buy one that works for tether cars. I initially purchased an electric Control Line airplane timer from an on-line hobby shop which was a piece of junk. Even Boeing engineers couldn't figure out how to program it.

I have one designed by an engineer friend that worked perfectly the first time on the track. Before the Nationals, I made a minor change to the ESC programming (yes, you have to program the ESC, too) as recommended by one of the experienced electric racers but accidently changed another setting which didn't work out very well. We've since researched and resolved the problem.

You can't just plug-in an electric tether car and launch it. If it's powerful enough to run competitively, that would be a recipe for disaster. Creating and programming a robotic timer and throttle control for electric tether cars can be a difficult process if you're not an electrical engineer or don't know someone who can figure it out. A radio controlled throttle would be simpler, safer, and much more readily available for potential electric tether car enthusiasts. The existing AMRCA electric car rule addendum prohibits the use of radio controls. If we are to attract

new racers into our sport, this needs to be changed to allow 2.4 GHz radio throttle controls on electric cars, if desired. Modern radios are all on 2.4 GHz and don't interfere with each other. Receivers can be really tiny and shouldn't present a space issue in most electric cars.

Other changes need to be made to the existing rules, too, but I've already addressed that with a proposal that was generally well received and will be voted on. Another change that has been recommended was to classify power by voltage rather than watts. Then, you could simply count the battery cells to determine legality.

#### **Newsletter Distribution**

It has been noted that some members may choose to forego the printed and mailed copy of this newsletter and receive it by e-mail.

It should also be noted that it is necessary to print a minimum number of newsletter pages to receive a quantity discount. Without this discount, the cost per page would increase significantly.

If members who would prefer to receive the newsletter by e-mail will send me their name and e-mail address at: rallyx@charter.net and to Phil McDonald at; jphil944@hotmail.com, I'll send them that way and Phil, who maintains the mailing labels, will remove them from future printed newsletter distribution. Most newsletters are quite large files and may be rejected by some e-mail providers.

Currently, all newsletters I have published are available, in full color, on our AMRCA.com web site and at https://www.facebook.com/groups/amrca, our Facebook page, soon after publication.
