

DEF3NSE™ FOR CROWDSOURCED CYBERSECURITY

Smaller organizations and critical infrastructure operations need real-time help with cyber threats at 1/10th the cost of outsourced managed services.

FOUR18's DEF3NSE™ platform delivers breakthrough savings in the time and cost of cyber threat detection & response through an on-demand decentralized workforce with real-time AI brain.

IT teams and decentralized cyber security resources send threats and alerts to DEF3NSE™ for real-time analysis & controlled collaboration between triage analysts, target teams and SMEs.

Analysts investigate and respond in real-time for incentives, collaborating directly with targets and global SMEs.

Ongoing Gamified Global Live Threat Hunt

Real-Time Decentralized Alerts

Decentralized & Incentive-driven model taps talent and responders globally

Applied AI up-levels analysts' skills with collective intelligence

"Zero-trust" information sharing model operationalizes secure collaboration (peers, IT teams & SME community)

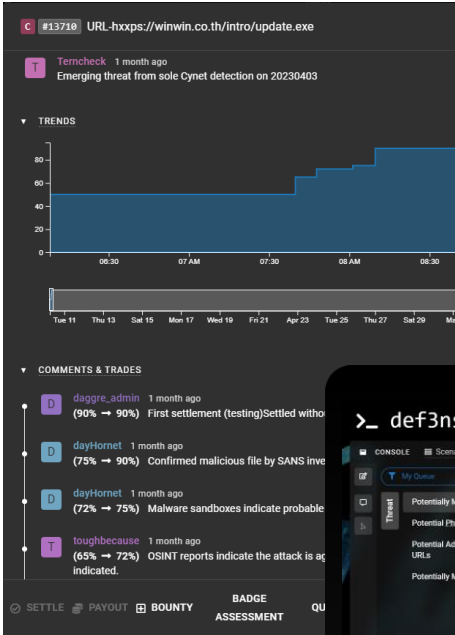

DEF3NSE Operationalizes Decentralized Cyber Defense at Scale

Submit Threat

Apply Visibility & SLA Rules

Instantly Disseminate

1 Real-World trending threats & alerts ingested.

2 Real-time controlled sharing & collaboration.

Case Notes for #13718 Potentially Malicious URL - hxxps://winwin.co.th/intro/update.exe

Filter

Title	Author
1 IOCs from SANS - Internet Storm Center Report of Malware Analysis	@32 dayHornet
SANS Internet Storm Center reports confirmed malicious code - Confirmation of efile.com compromise by malware. Users download a persistent fake browser update.	@32 dayHornet
MalwareBazaar Report - Reports 5 Yara Signatures including obfuscation. Appears malicious and am progressing with investigation.	@32 dayHornet

3 Intuitive threat hunting & reporting.
