In the case of the French, you must, for example, use dykes \ xe2 \ \ x80 \ \ x9eacent \ xe2 \ \ x80 \ \ x9c on \ xe2 \ \ x80 \ \ x9e \ xe2 \ \ x80 \ \ x9c: yes \ xc3 \ \ xa8. Le \ xe2 \ \ xe2 \ \ xe2 \ \ xe2 \ \ x80 \ \ x9e \ xe2 \ \ x80 \ \ x9c, unfortunately, it is unexpected on the German keyboard \ f xc3 \ \ xbcung. Although you can add pressure later \ xc3 \ you can enter it Hand, but it must also be possible directly on the computer, right? Even with a German keyboard, you can easily introduce three characters with a French accent. The art of inserting accents is that they will always be created by pressing two keys one by one. First, make sure that the keyboard layout is determined in German to follow the instructions below. Press the keyboard key. \ xe2 \ \ x80 \ \ x9el accent ost \ xe2 \ \ x80 \ \ x9c is between the letter \ xc3 \ \ x9f and the back of the return. The symbol does not appear on the screen, of course nothing has changed \ xc3 \ \ xa4. Now enter the main letter that corresponds to \ xe2 \ \ x80 \ \ x9eccent \ xe2 \ \ x80 \ \ x9c, for example \ \ x2 \ \ x80 \ \ x9ee \ xe2 \ \ x80 \ \ x9c, a Then the letter immediately displayed with a correct accent in the form of \ xe2 \ \ x80 \ \ x9e \ xc3 \ \ xa9 \ xe2 \ \ x80 \ \ x9c.Accent in the form "Include Accent Fields" works as described when writing in a word processor, as well as in a Word program, in your email program, or in another program of your choice. The procedure is the same everywhere. Newer versions of the Mac work system allows users to easily type with accented characters and diacritics by making a continuous key press on a single key. For example, if you hold down "a," after pressing that key, a popup will appear for a few seconds to show what accents are available for that letter or character. Accent, the letters remain printed until a menu is displayed. With character accents. You can enter text anywhere, be it in Pages, Microsoft Office, Textedit, a web browser, and Facebook or Twitter. If you don't want to use the recognition option, you can also use accent code keyboard shortcuts. Remember that Option Lock is also the old key on a Mac keyboard, it is the same key even if the label is still the old one. Next "E", then enter the letter for the accent, e.g to emphasize the circumflex: Hold down the radio button, then turn it to "I" and then type the letters like letters like ue. 1. **xuigje** How do I incorporate an ACUTE accent? Capital letter. 4. How can I get French characters in the Mac book? Keep the letters you want to pick up the letter until the drawing menu is displayed. Select the drawing accent with the mouse or press the corresponding number based on the focus on the menu. Some letters with accent - Aigu accents, grave, circum flexes - can easily be inserted into a text processor with a German keyboard. **jihveyazone** But also with Ü § or chicken, especially in rare letters, as it is, things are getting complicated. **ruvumi** There are several options. You can remember the main combinations of the main combinations. It is written in many programs by inserting a numerical sequence into the numerical keyboard of 0231, which means that the ALAT key is retained. In some keyboards, you must first activate the digital keyboard by pressing the "Num" button. **teriwafuneta** MS Word in MS Word You can search for the accented letters in the "Insert/Symbol" menu ... in the "Symbols" tab on the "Sign" Sign: (Ordinary Text) "and double (or click on" "" "Enter".) Enter the listed key combinations or remember (e.g. C = Ctrl+Comma, then press C) and use it from now on. You can also assign the keyboard linking by the corresponding Open dialog with the "Key combination" button. But only those who write a lot can remember all of these key combinations. In the case of lazy students, the method is the activation of spelling control and clicking with the right mouse button on a word that describes it as wrong is.

So you get some improvements and often the right solution is included. included.
