# TELOS BLOCK PRODUCER REPORTS

**Presented by:**  
Systems Engineer  
Daniel Marcelo

## MONTHLY ACHIEVEMENTS

This year has been very positive for the network, since most of the blockchain block producers have met quality standards and have offered an efficient and reliable service. Only a small percentage of 5% have had problems maintaining their services, but we hope they can resolve them soon. We want to thank everyone who has contributed to the continued production of blocks and the security of the network. We are on the right path to being the best blockchain network in the world.

# BPS OUT OF NETWORK

Find the multisignatures described here in the telegram multisignature channel

## MONITORED DAILY

Monitored every day automatically and manually

## WARNING

We give a 5 day notice, if the block producer does not fix the problem, we create a kick MSIG

## SERVICES DOWN

Does not apply

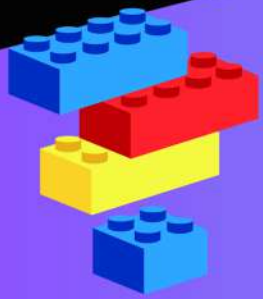

## OFF TESTNET

Staying out of the test network for more than 7 days

Please go to the multisignature group on telegram and sign

# LOST BLOCKS PER MONTH

We keep a count of lost blocks per month from each Block Producer

TOP 5 of Bps with more number of lost blocks

## Mainnet

1

creativblock (creativblock) 1328

2

Telos Kitchen (teloskitchen) 1320

3

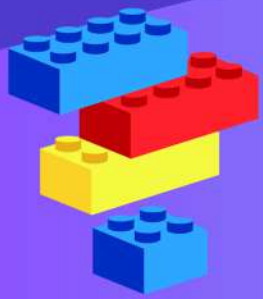

Cryptolions 1320

4

TheTeloscope (theteloscope) 326

5

Sentnl (sentnlagents) 312

# LOST BLOCKS PER MONTH

We keep a count of lost blocks per month from each Block Producer

**TOP 5 of Bps with more number of lost blocks**

## Testnet

**1**

TelosKorea (teloskorea11) 1320

**2**

South Africa (southafrica1) 372

**3**

Persian Telos(persiantelos) 288

**4**

EOSAmsterdam (amsterdam) 121

**5**

# PERFORMANCE

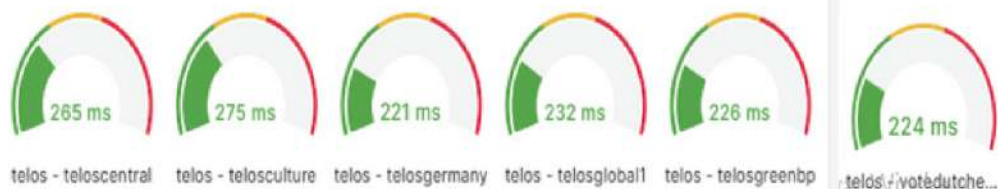

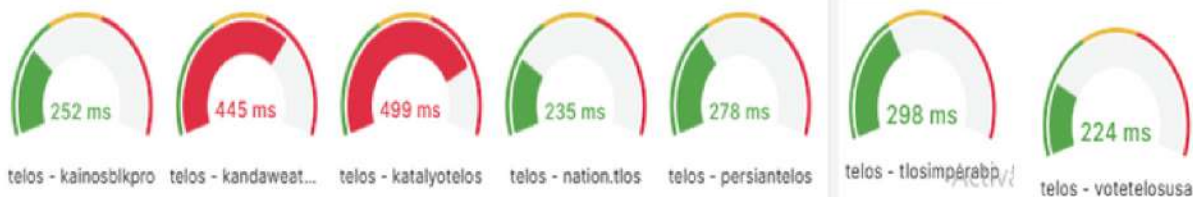

## CPU

It is checked if the performance of the CPU is less than or greater than 500 microseconds, and a graph of the monthly speed of each Bp is kept.

# CPU PERFORMANCE SUMMARY

Visualize the CPU performance of each block producer

## For block producers

Hello block producers, we are discovering that the BP.json files used to access your resources are out of date. In most cases, it is not the bp.json itself, but the URL pointing to the bp.json. There is also another file that may be wrong, called chains.json, when accessed via the scripts designed to extract it, some reports return empty. We are doing the checks following this standard:

**<https://github.com/eosrio/bp-info-standard>**

Regards,

*Daniel marcelo*

**Monitoring of block  
producers**  
**Systems Engineer**

# Project Summary

**To: Block producers**

**Start date: November 1, 2022**

**Address: Venezuela**

All companies widely use monthly / annual reports to document projects, transaction flow, team performance, so for this important reason we carried out this project which we have been working on for 13 months to carry out this monthly report. Starting the first month as a pilot project, with few verifications such as (block producers outside the testnet, number of blocks lost and CPU performance) The second month was training for the verification and control of new processes carried out by each block producer. Realizing that there was still a lot to verify. so we start a new phase

this last month, we achieved the automation of almost 80% of the additional services. .

Using scripts created in python, running on a linux server. and stored in a database, all this data is collected and verified separately. then the next step is to make the graphs and averages of the behavior of each block producer per month, which are reflected in a final report

All this work is done with the as carefully as possible and We want to do the Telos The blockchain network works better every day. We collect information through our latest automation and also by checking networks manually every day.

**Regards.**
