BLOCK PRODUCERS

TELOS BLOCK PRODUCER REPORT MARCH 2024

With detailed information and in-depth analysis, we illustrate our commitment to transparency, sustainability and sustainable growth.

www.telos.net

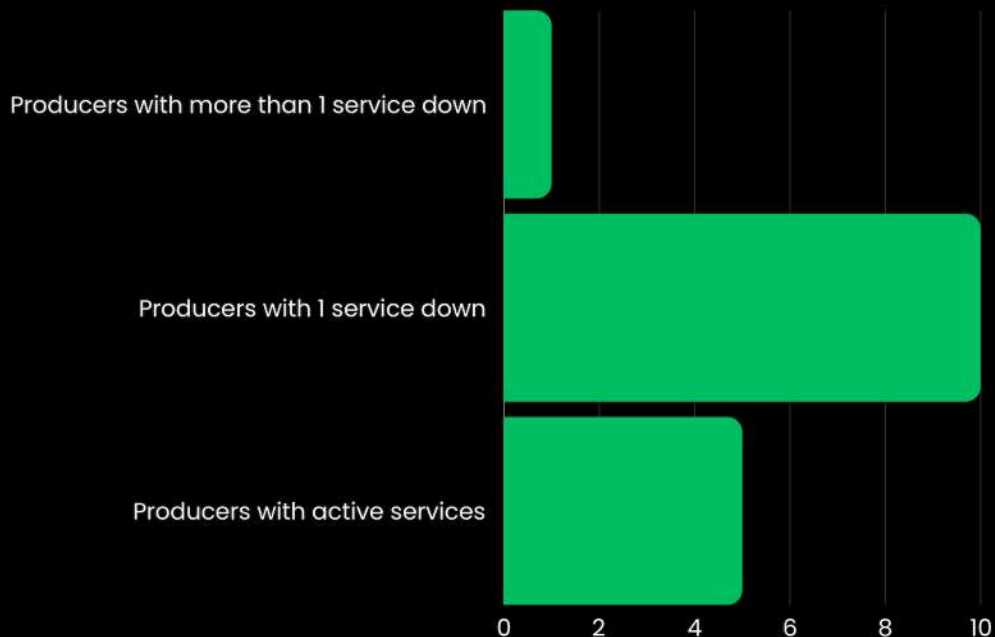

<https://t.me/TelosBPMonitoring>

MONTHLY ACHIEVEMENTS

In March 2024, the Telos network has once again demonstrated its commitment to quality and efficiency, maintaining a level of collaboration and support between block producers that is expected to continue or even exceed in the future. Despite changes in pricing and ranking of block producers, the Telos community remains focused on security and optimal network performance. The Telos Foundation, known for its impeccable record of zero downtime and hosting the world's fastest Ethereum virtual machine, continues to lead enterprise adoption in Web3 technology and decentralized solutions. With over 1.2 million accounts and hundreds of partners and dApps, Telos is positioned as a network of networks (Layer 0) that enables Zero Knowledge technology for ultimate scalability and privacy across all industries and applications.

NOTICE

The Telos network continues its expansion and strengthening with the implementation of the TEDP4 proposal, which has recently been approved. This strategic plan is a significant step in establishing Telos as a prominent blockchain in the cryptocurrency space. With Telos Zero, the network seeks to reach a new phase of development focused on scalability and limitless interoperability, which could revolutionize the way users interact with blockchain technology. The pillars of this advancement are mass user adoption and the ability to scale indefinitely, ensuring that the network can grow and adapt to future demands. In addition, changes are being introduced to the network economy, improvements to governance processes and a more open and transparent organizational structure, reflecting a commitment to innovation and responsibility. These developments promise to improve the user experience and strengthen Telos' position in the cryptocurrency market.

For block producers

Hello block producers, we are discovering that the BP.json files used to access your resources are out of date. In most cases, it is not the bp.json itself, but the URL pointing to the bp.json. There is also another file that may be wrong, called chains.json, when accessed via the scripts designed to extract it, some reports return empty. We are doing the checks following this standard:

<https://github.com/eosrio/bp-info-standard>

Regards,

Daniel marcelo

**Monitoring of block
producers**
Systems Engineer

Project Summary

To: Block producers

Start date: November 1, 2022

Address: Venezuela

All companies widely use monthly / annual reports to document projects, transaction flow, team performance, so for this important reason we carried out this project which we have been working on for 18 months to carry out this monthly report. Starting the first month as a pilot project, with few verifications such as (block producers outside the testnet, number of blocks lost and CPU performance) The second month was training for the verification and control of new processes carried out by each block producer. Realizing that there was still a lot to verify. so we start a new phase

this last month, we achieved the automation of almost 80% of the additional services. .

Using scripts created in python, running on a linux server. and stored in a database, all this data is collected and verified separately. then the next step is to make the graphs and averages of the behavior of each block producer per month, which are reflected in a final report

All this work is done with the as carefully as possible and We want to do the Telos The blockchain network works better every day. We collect information through our latest automation and also by checking networks manually every day.

Regards.

Systems Engineer
