Monthly calculation

Block producers on the Telos network play a crucial role in maintaining and operating its blockchain. They function as nodes that validate and record transactions, ensuring the integrity and continuity of the chain.

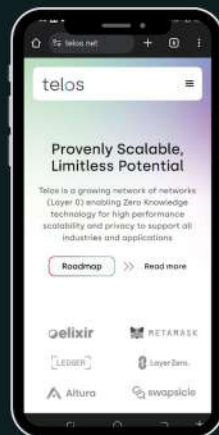

Content Marketing

The Telos Foundation, together with these producers, has proposed innovative economic plans that include significant changes to the network's operating clauses. Furthermore, the Blockchain-as-a-Service concept, offered by Telos, allows companies and institutions to use blockchain technology without costly investments in their own technological development.

For block producers

Hello block producers, we are discovering that the BP.json files used to access your resources are out of date. In most cases, it is not the bp.json itself, but the URL pointing to the bp.json. There is also another file that may be wrong, called chains.json, when accessed via the scripts designed to extract it, some reports return empty. We are doing the checks following this standard:

<https://github.com/eosrio/bp-info-standard>

Regards,

Daniel marcelo

**Monitoring of block
producers**
Systems Engineer

Project Summary

To: Block producers

Start date: November 1, 2022

Address: Venezuela

All companies widely use monthly / annual reports to document projects, transaction flow, team performance, so for this important reason we carried out this project which we have been working on for 20 months to carry out this monthly report. Starting the first month as a pilot project, with few verifications such as (block producers outside the testnet, number of blocks lost and CPU performance) The second month was training for the verification and control of new processes carried out by each block producer. Realizing that there was still a lot to verify. so we start a new phase

this last month, we achieved the automation of almost 80% of the additional services. .

Using scripts created in python, running on a linux server. and stored in a database, all this data is collected and verified separately. then the next step is to make the graphs and averages of the behavior of each block producer per month, which are reflected in a final report

All this work is done with the as carefully as possible and We want to do the Telos The blockchain network works better every day. We collect information through our latest automation and also by checking networks manually every day.

Regards.

Systems Engineer
