To generate a car sales contract, you only need to complete the form below. The form consists of 4 simple steps where you will need to enter the necessary data for generating the Sales and Delivery Contract. Additionally, you can optionally select the generation of the Tax Registration Request, Tax Registration Certificate, and Vehicle Registration Certificate. After completing all the data, you will need to make a payment of 25 lei, after which your contract will be generated automatically and you will be able to download it. Optionally, you can also select the generation of requests for removal from the fiscal records, tax registration, and vehicle registration, which will each be charged 5 lei. Immediately after generation, both the contract and documents (if applicable) will be transmitted automatically to the seller's email address as well as the buyer's email address, provided that they have been entered in the form! To offer the best experience, we use technologies such as cookies to store and/or access information about your device. Consent for these technologies will allow us to process data such as navigation behavior or unique IDs on this site. Refusal or withdrawal of consent may negatively affect certain characteristics and functions. A car sale contract must include detailed information about the vehicle, such as: * Make and model * Vehicle identification number (VIN) * Engine capacity * Maximum weight allowed for trailers/semitrailers * Registration/license plate number * Expiration date of technical inspection report (ITP) * Booklet identification number * Year of manufacture * Euro standard When selling a car in Romania, a standardized contract is required. If you're buying from a private individual, the seller will provide a receipt instead. The contract must be printed in 5 copies, all of which are considered original and must be signed with a pen. To validate the contract, it must be stamped by the local tax office or municipality where the vehicle is registered. Without this stamp, the contract has no value. The 5 contracts serve several purposes: * 1 copy remains at the tax office * 1 copy stays with the seller * 1 copy goes to the fiscal authority (organul fiscal) * 1 copy stays with the buyer * 1 copy goes to the police for registration To complete the contract, start by filling in the following sections: * The person selling the vehicle (vanzator) will provide their own information and details about the vehicle. * The buyer's information should be completed as well. * The object of the contract - this section should be filled out with details from the vehicle's registration booklet. The middle section of the contract should include: * Vehicle make, model, VIN, engine capacity, maximum weight allowed for trailers/semitrailers, registration/license plate number, and expiration date of technical inspection report (ITP) * Booklet identification number * Year of manufacture * Euro standard * Date acquired: when the vehicle was registered with the seller * Conformity certificate: a document that proves the vehicle meets certain standards The final section of the contract should include: * The price paid in lei. If the sale is over 45,000 lei, payment must be made through bank transfer, not cash. Note that the buyer must register the vehicle within 30 days after the sale. Dobândirea Contractul Dobândirea Auto PDFDescarcă Gratuit: Documentul cu acte necesare inmatriculare auto 2024 trebuie prezentat la poliție în maxim 30 de zile după achiziția vehiculului, indiferent de tipul de autobuz.
