Clean oil makes a difference. As a technician, you know how crucial it is, but also how much hassle comes with changing it. That's why we've developed the RunQuick Oil Change System, which lets you switch your vacuum pump's oil in under 20 seconds without powering down or losing vacuum. You'll also have a clear view of your oil condition through our large oil reservoir and can even store an extra container for on-site use - no mess, quick change, fast vacuum. That's what our VP67 is all about.
