Dragon quest 11 casino guide

Dragon Quest 11's Legendary Quest is a notoriously difficult side quest that requires significant time and effort to complete. Unlike traditional casinos where the house always wins, Dragon Quest 11's roulette table offers unpredictable results due to its RNG-based mechanics. To begin the quest, players must find Richie at the Octagonia Casino and convince him to part with his figurine of Vinco by winning a jackpot at the roulette tables. However, landing a jackpot is a challenging task that involves numerous unlikely occurrences. The process requires players to pick a number, have the ball land on it, and then stop at the specific number aligned with the jackpot arrow. While some players may attempt to bet on multiple numbers, this approach has limited success due to the RNG's unbalanced nature. Notably, two numbers - 12 and 14 - are heavily favored, resulting in a disproportionately high chance of winning when betting on these numbers. Players can significantly increase their chances by placing wagers on these numbers, but they must also be prepared for potentially lengthy periods of waiting due to the unpredictable nature of the RNG. Ultimately, the quest's reliance on RNG and its unbalanced mechanics make it a challenging experience that requires patience and persistence from players. To win at the casino in Dragon Quest 11, place bets on certain numbers and hope for the best, reloading earlier saves if things don't go as planned. This process can be repeated until a win is achieved, with the time it takes being uncertain. Once the jackpot is won, claim the figurine from Richie and enjoy the victory. The tokens earned can be exchanged for items like the Gringham Whip or Baumren's Bell. It's possible to win multiple times, allowing for the purchase of more items. Dragon Quest 11 has two casinos, which offer amazing items and prizes that can aid in gameplay. However, there is a risk of losing coins, but using the right tricks can help win exotic prizes without losing everything. The first casino is located in Puerto Valor, accessible after gaining the ability to sail, while the second is in Octagonia, found on the third visit. These casinos can be risky, but with the right approach, it's possible to get rich quickly and acquire rare items. Don't get discouraged if you lose big, just save your game before spending tokens in Dragon Quest 11 casino and reload when needed. To succeed, remember three key things: be patient, have luck on your side, and keep a steady supply of money. According to our guide, it's wise to spend between 2000-4000 coins, allowing you to buy enough tokens to play comfortably. There are three main types of casino games: poker, roulette, and slots. Poker is best for experienced players who can card count, but for others, it's a waste of time. Roulette is another option, offering the chance to win big with just a few bets. However, it can get dull and tiresome quickly. Slots are the most popular choice due to their ease of use and high winning potential. The Puerto Valor casino has limited worthwhile items, but the Jade bunny suit and Platinum Power sword are worth the effort. The list of prizes includes: - Platinum Powersword (100000) - Lightning Lance (75000) - Platinum Sword (50000) - Spangled Dress (25000) - Elevating Vest (10000) - Arriviste's Vest (10000) - The staff of Sentencing (7500) - Infernails (7500) - Yggdrasil leaf (5000) - White Shield (5000) - Mercury's bandana (2500) - Down the Rabbithole (500) Octagonia Casino is an easy win spot, but that's about it. In comparison to Puerto Valor casino, Octagonia casino offers a unique experience. When the casino is filled with monsters, the prizes are of poor quality. However, once the monsters are removed, the difficulty of winning increases, and the quality of items improves. To maximize rewards, it's essential to kill all the monsters and then enter the VIP room with the Love Potion. The prize list before defeating monsters includes items like Love Potion, Medicinal Herb, and Magic Water, while the final prize list features more valuable items such as Sage's Elixir, Bow Tie, and Gringham Whip. To win more in the Dragon Quest 11 casino, it's crucial to have motivation, luck, and patience. Starting with 200 tokens and playing poker can be a good initial strategy, as the double-up feature is often rigged in favor of the player. Once 2000-3000 tokens are accumulated, saving the game before proceeding further is recommended. Slot machines offer the best chance of getting rich, particularly when using the metal mode and other advantages. Playing on the 10-token slots with 2000-3000 tokens can lead to significant winnings, and it's possible to earn over 100k in just a few hours. In roulette, wagering on a single number increases the chances of winning, and switching tables to bet on a single number can be an effective strategy. By following these tricks and tips, players can increase their chances of winning exotic prizes and getting rich quickly in the Dragon Quest 11 casino. In Dragon Quest XI: Echoes of an Elusive Age, the Casino mini-game is a recurring feature that offers excellent prizes. With a 75% chance of winning, you'll want to spend time in the casino to unlock powerful gear or unique items like the bunny suit costume for Jade. Winning requires some luck, but there are tips and tricks to improve your chances. There are two casinos with distinct prizes: Puerto Valor Casino and another one located elsewhere. To get started, save your game before entering a casino and ensure you have a sufficient threshold of tokens (500 is a good starting point). You can earn these by exchanging gold for tokens. The three main games available are Poker, Roulette, and Slots. Poker offers steady wins but with lower payouts; Slots is the most reliable way to win, and Roulette allows for instant riches if you're willing to take risks. When you have a decent token threshold, focus on the high-bidding slime slot machines, which can trigger metal mode and lead to massive token gains. For Roulette, try betting heavily on single-digit numbers when you have over 20,000 tokens. This strategy can instantly reward you with top-tier casino prizes. Now, let's take a look at the available prizes in Puerto Valor Casino: * Down the Rabbithole (500 Tokens) * Mercury's Bandana (2500 Tokens) * White Shield (5000 Tokens) * Yggdrasil Leaf (5000 Tokens) * Infernails (7500 Tokens) * Staff of Sentencing (7500 Tokens) * Arriviste's Vest (10000 Tokens) * Elevating Vest (10000 Tokens) * Spangled Dress (25000 Tokens) * Platinum Sword (50000 Tokens) * Lightning Lance (75000 Tokens) Powersword (100000 Tokens) Octagonia CasinoThe odds in your favor are what you'll find at the Octagonia Casino. The prizes on display appear to be lucrative but hold little value until the casino's dark past is cleansed of monsters. Upon visiting the VIP room with the Love Potion, the real prize list will be revealed. However, any winnings acquired during monster ownership will be forfeited upon removal of these creatures.Prize List (During Monster Ownership) • Love Potion (500 Tokens) • Medicinal Herb (25000 Tokens) • Cypress Stick (50000 Tokens) • Horse Manure (100000 Tokens) • Boxer Shorts (500000 Tokens) • Magic Water (1000000 Tokens)Prize List (After Monster Removal) • Love Potion (100 Tokens) • Sage's Elixir (1000 Tokens) • Bow Tie (3000 Tokens) • Your Very Own Aegis of Illusions (5000 Tokens) • Molten Globules (20000 Tokens) • Cheat Sheet (30000 Tokens) • Imp Knife (60000 Tokens) • Scandalous Swimsuit (70000 Tokens) • Fire Ball (80000 Tokens) • Twinkling Tuxedo (200000 Tokens) • Shimmering Dress (200000 Tokens) • Happy Hat (300000 Tokens) • Gringham Whip (7500000 Tokens)
