

I'm not a bot

Friedrich Air Conditioning manufacturing company based in Uptown San Antonio, Texas ===== Friedrich Air Conditioning is privately held American company that manufacture commercial-grade room air conditioners and specialty cooling products for residential and light commercial applications. The company was founded by Ed Friedrich as a manufacturer of handcrafted furniture and other goods. ----- Friedrich Company History ===== The company was established in 1883, however, they started working on refrigeration equipment in the 1940s, and began manufacturing air conditioning units in 1952. ----- Friedrich's Product Lines ===== The company is credited with several innovations including introducing first refrigerated display case for food retailers. Friedrich currently manufacture window, thru-the-wall, portable and ductless air conditioners, as well as dehumidifiers. Friedrich Unveils Its Latest Air Conditioner Design, Featuring New Technology and Reduced Sizes The latest air conditioner design from Friedrich has arrived, boasting an all-new design and several exciting updates. The new line also introduces Friedrich's Library Quiet technology, which boasts a silent operation level of 42 dB. One of the key features of this new line is the use of inverter compressors running on R32 refrigerant. This technology is now standard across the entire Kühl and Kühl Q lines, providing improved efficiency and performance. Additionally, Friedrich has introduced its "Soft-Start" technology, which allows for energy-efficient compressor startups. Several BTU sizes have been cut from the model line, with the Kühl Q now available in only 8,000 or 10,000 BTU variants. However, this doesn't mean that users will be limited to smaller units, as new single speed variants of the Kühl and Kühl Q are available in sizes between 8-36,000 BTU. Another exciting update is the introduction of Floating Air Ductless Split Systems, which offer both single and multi-zone capabilities. ZoneAire models also provide de-humidification and heating options, with a dual zone design that can cool up to 40% quicker than other portable systems. Dehumidifiers are available in both 35 and 50 pint versions, while FreshAire MERV 13 Filters offer protection for particles down to 1 micron in size. This ensures that air is cleaner and healthier to breathe in. The QuietMaster line has also been updated, with new designs and features being added. These units were manufactured from 1976 to 2010 and featured a range of configurations, including standard, deluxe, programmable, TwinTemp, and heavy-duty models. Hazardgard units are designed for severe duty applications and offer advanced corrosion protection, permanent split capacitors, and environmentally sealed controls. They also feature reciprocating compressors and other heavy-duty features. The Q-Star portable room air conditioner was introduced in 1990 and featured a slide-out chassis. Although it has been discontinued, the legacy lives on with the "Q" chassis Kühl models that replaced it in 2012. Lastly, the TwinTemp configuration is available in both QuietMaster and Q-Star designs, providing both heating and cooling settings in one unit. This was replaced by electric heat and heat pump Kühl/Kühl Q models starting in 2010. Overall, Friedrich's latest air conditioner design offers a range of exciting updates and features that are sure to impress users. With its new technology, reduced sizes, and improved efficiency, this line is set to revolutionize the air conditioning industry. Friedrich Air Conditioning was founded by Ed Friedrich in the 1950s, with the company's early product lines including window/thru-the-wall units and room air conditioners. In 1991, the WallMaster series was introduced, which is still produced today for use in apartment complexes. The company has undergone changes over the years, including a transition to Mexican labor in the late 2000s and the sale of the company to Corinthian Capital in 2007. Friedrich Air Conditioning has also developed various product lines, such as the Chill Premier Smart Window Air Conditioners and the KÜHL line of air conditioners. The company's history is marked by its commitment to innovation and customer satisfaction. Today, Friedrich Air Conditioning continues to be a major player in the HVAC industry, with a wide range of products and services available for both residential and commercial customers. Friedrich has a strong presence in the US market, with service centers located throughout the country. The company's products are known for their quality and reliability, making them a popular choice among consumers. In addition to its product offerings, Friedrich Air Conditioning is also committed to giving back to its customers through various promotions and giveaways. In 2023, the company partnered with Southern Refrigeration Corporation (SRC) to give away one FREE air conditioner at each of SRC's 11 branches. Friedrich's commitment to customer satisfaction and community involvement has earned it a reputation as a trusted and reliable brand in the HVAC industry. With its rich history and dedication to innovation, Friedrich Air Conditioning continues to be a leader in the market. Now's your chance to win big! To enter the Boone Prime Plus grill giveaway from Green Mountain Grills, simply purchase a single-zone system and you'll receive one entry. But that's not all - buy a two-zone system and you'll get double the chances with TWO entries! And, in another exciting promotion, Klein and SRC have partnered up to give away an awesome prize pack: TWO remote control coolers! To enter this drawing, just spend \$50 or more on Klein products between now and April 30th. For every \$50 you splurge, you'll get one entry into the random draw. These coolers aren't just any ordinary fridges - they're fully remote controllable with three speeds, complete with built-in high-quality speakers and an MP3/AUX input for your music needs. Need some help figuring out which direction to take your project? Our friendly team is here to guide you every step of the way. Whether you're looking for a new water heater or just need some advice, we've got you covered! Browse our fantastic selection of residential water heaters, including tankless, gas tank, and hybrid electric models, all designed to provide continuous hot water whenever you need it. Say goodbye to cold showers and hello to the luxury of long, hot soaks - explore our range today!
