Guest • 559 days ago # + 0 - im so angry It is undoubtedly frustrating when any website experiences technical difficulties, especially when it impedes access to important resources or disrupts our daily routines. In this case, the CollegeBoard website being down is understandably frustrating for students relying on it for various academic reasons. However, it is important to take a step back and consider the bigger picture. While watching Fortnite videos may be an enjoyable pastime, prioritizing educational goals should take precedence. The CollegeBoard website is a crucial platform for students to access resources, study materials, exam schedules, and college planning tools that are invaluable for their academic and future professional success. In light of this, it is vital to understand that the primary purpose of the website is to cater to educational needs rather than act as an entertainment hub. Nonetheless, it is understandable to feel frustrated when unable to access the platform, as it disrupts your normal routine. It is worth remembering that technical issues are an inevitable part of any digital platform, and they are typically resolved promptly. Utilizing alternative study materials in the meantime, such as textbooks, online libraries, or study apps, can help alleviate frustration and ensure you maintain your academic progress. Ultimately, while it is frustrating when the CollegeBoard website is down, it is essential to recognize the countless resources the platform offers to support students in their educational endeavors. By focusing on your academic goals and exploring alternative study materials, you can ensure that the temporary inconvenience does not hinder your progress in the long run. Problem with this comment? Guest • 1174 days ago # + 0 - ★ ☆ ☆ ☆ Won't load, hard to find off of the main website, and extremely frustrating all around. Many times it'll attempt to 'remember' where you left off, but will always bring you back to a class or assignment that you completed a while ago, not to mention that the whole sign-in system was changed. Now you have to 'authenticate' your account by sending yourself an email with a pin, however, this pin never works and you cannot bypass this by any means, even if you have your previous password(which itself had multiple prerequisites to make). This means you have to send yourself multiple emails, where after about 5 emails, it lets you bypass the security system, no questions asked, and finally lets you log in with your username and password. And all that is if the website even loads. Many times, it'll end up in a weird 'website limbo' where it only loads the header and footer of the website but doesn't have the sign-in or anything like that. Really annoying when you have a timed assignment in class, but you can't get to it before a good chunk of your time runs out... and that's not even getting into the whole mess of standardized testing Problem with this comment?
