Check where you keep the spare tire, jack, and lug wrench in your vehicle. Then, follow these steps: Park on a flat surface, engage the parking brake, and turn on hazard lights. Loosen lug nuts but don't remove them yet. Lift the car with the jack until the flat tire is off the ground. Remove lug nuts and flat tire, replace with spare tire. Tighten lug nuts by hand, then lower car using jack. Finally, use a torque wrench to tighten lug nuts properly. To pair your mobile phone, turn on Bluetooth and make it discoverable. Press the "Nav" button on your BMW's iDrive controller. Go to "Communication" and select "Mobile devices." Choose "New device" and wait for your phone to appear on the list. Select your phone and enter the pairing code displayed on the iDrive screen into your phone. Once paired, you can access phone features through the iDrive system. Regular car maintenance is essential. Check your maintenance instructions to see how often your car needs servicing and what needs to be done. Major periodic service should be done every 2 years or after 30,000 kilometers. The lock might be set to child safety mode so it won't open from inside. To unset the child safety lock, check your car's manual as it differs per brand and type. If your car radio doesn't turn on, there's no power reaching it. Check that the red wire is connected to contact power supply and yellow wire to constant power supply. To find the VIN number, consult your car's manual as its location varies per brand and type. The BMW X3 (2008) manual should have this information. 1 mile equals 1.609344 kilometers, or 1 kilometer equals 0.62137119 miles. Change brake fluid every two years for optimal performance.
