

I'm not a bot

I've been eyeing Fashion Nova jeans for ages, and after watching countless YouTube hauls, I finally decided to give them a try. Most reviews rave about these jeans, so I was excited to see if they'd work for me too. With my body type being more curvy than hourglass or pear-shaped, I'm always on the lookout for high-waisted jeans that flatter my figure. The sizing chart had me worried - most jeans are designed for women with smaller waists and wider hips. But since I have a bigger bust, thicker waist, and not-so-large butt, I hoped to find a pair that would fit me nicely. My measurements are 36-33-39.5, which is quite different from the typical hourglass or pear shape. I considered visiting Old Navy to try on jeans before buying, but COVID19 had other plans. I decided to buy two pairs of Classic High Waist Skinny Jeans in size 11 and size 13 to test their fit. The sizing for these jeans was a bit confusing - a size 11 would be a 30-inch waist and 41-inch hip, while a size 13 would be a 31-inch waist and 42-inch hip. Fashion Nova shipping took about 7 days, and I received the jeans in a polybag via UPS. Using a discount code saved me some money - the two jeans were \$34.99 each, and with a 30% off code from their website, I paid only \$48.99 for both plus \$4.99 shipping. Unfortunately, the fit was not as expected. The size 11's were extremely uncomfortable on my waist, making it hard to button up and causing a muffin top overflow. On the other hand, the size 13's felt decently loose on my legs but still had a tight waist. Standing and walking in them was comfortable, but sitting down caused some discomfort due to my stomach pooch. The biggest letdown for me was how these jeans accentuated my stomach pooch and made it look even more noticeable than usual. And, to make matters worse, my butt looked squarish instead of round, which is not what I'm used to in high-waisted jeans. If you have a similar body type or stomach pooch like me, be warned: these jeans might not be the best choice for you, you can conceal some things but not your waist measurement when buying Fashion Nova jeans. I want to be honest with you guys, I like the way my jeans looked from the side and that's why I bought them. However, if I had gotten a size 15 instead of a size 13, I probably would have been more comfortable with my waistline since it is around 3 inches smaller than mine. But on the other hand, a saggy jean butt is not cute for me. To know your size in Fashion Nova jeans you need to measure yourself first and foremost, take note of both your waist and hips. Measuring yourself correctly is the most important thing here, just because you are a size 12 in one pair of jeans doesn't mean you'll be in another since every store has its own sizing. I recommend investing in a measuring tape so that you can always know your correct measurements. Now, look at how the jeans sit on the model and compare it to your body. If the jeans are high waisted, measure from a high waist perspective. Choose a jean size based on your waist measurement and not just any random number. I did this and it worked out for me because my hip size was an inch or two bigger than mine. I am going to be honest with you guys and say that if you don't have a pear shape body type or hourglass figure then these jeans might not fit you right, especially if you have a pooch belly like me. My measurements are all around 30 inches but if my waist was 3 inches smaller I probably would have been more comfortable. The fabric of the jeans also matters here, the super stretchy one worked great for me but if it was sturdier then maybe not so much. The size I got had a size 30 inch and 31 inch waist which is why I thought they would fit me well because my hip size was an inch or two bigger than mine. My last tip for you guys is to look at the high rise jeans from Target Universal Thread brand, they are comfortable and will make your butt look good. Also don't forget to check out Old Navy jeans too since alot of youtubers say they are comfortable and fit well. Overall I would recommend buying other things from Fashion Nova like pants, tops and dresses instead of their jeans because in my opinion those are a better buy. Ever wondered what size you should be in Fashion Nova? Here's a simplified guide to help you navigate their sizing. # Tops & Dresses Most Fashion Nova tops and dresses run small, so consider sizing up if you're between sizes. Use the model figure as a guideline for your fit. # Bottoms (Jeans) For most jeans & dresses, sizes may vary depending on cut & style. # Plus Sizes Fashion Nova offers plus sizes from 1X to XXL. Bust measurements range from 31-41 inches (78-104 cm). Waist measurements range from 24-33 inches (60-85 cm), and hip measurements range from 33-44 inches (83-111 cm). # Shoes To ensure a perfect fit, follow these tips: Additional Tips for Perfect Fit in Fashion Nova Clothing: To find your correct size in Fashion Nova jeans, start by measuring both feet separately, as they are not the same length. Take note of the biggest measurement and determine your boot size using the conversion charts provided for men or women. When drawing a thin line around the outside of your entire foot on a piece of paper, hold the pen perpendicular to the ground and measure the length from the length of your foot. This will give you your foot length, which is essential in finding your boot size. Additionally, measuring horizontally across the widest part of your foot will provide you with your foot width. Using the measurements obtained from both feet, look at the size charts for men or women on the Fashion Nova website. The waist, bust, and hips sections will give you a better understanding of which size to purchase. Make sure to refer to these charts every time you shop, as sizes can vary between brands and individual items. It's also crucial to note that size charts can differ significantly from brand to brand. Therefore, it's always best to take your own measurements before making an online purchase to ensure a perfect fit. ===== Finding Your Perfect Jeans Fit with Fashion Nova's Size Chart ===== When it comes to finding the ideal jeans size, trying different styles may be necessary due to variations in fit between brands. Fashion Nova offers a convenient solution with their jean size chart, which allows you to determine your perfect fit by comparing your measurements. Using the correct measurements can lead to a more confident and comfortable wearing experience. However, it is essential to note that everyone's body type differs, and while the size chart serves as an excellent starting point, some adjustments may be necessary to achieve the desired fit. Relaxed or tight fits are two common preferences when choosing jeans. A relaxed fit typically requires sizing up, whereas a tighter fit necessitates sizing down. By understanding your preferred fit style, you can ensure that your chosen jeans will look and feel great. Fashion Nova's size chart is an indispensable tool in finding the right jeans for every body type. The chart takes into consideration measurements such as waist circumference, hip measurement, and inseam length to provide a precise fit. However, it is crucial to keep in mind that different brands may have slightly varying size charts. Before making a purchase online, it is advisable to check the specific size chart for the brand you are buying from, along with the fabric content and stretchiness of the jeans. Trying out multiple styles and sizes will also increase your chances of finding the perfect pair that flatters your figure and makes you feel confident. Ultimately, determining the ideal jeans fit requires knowledge of one's body shape and size. Understanding these factors allows you to identify your personal style preferences, such as casual or dressy, and choose a denim type that suits your needs - stretchy or rigid. Jeans selection requires several considerations, including fit, style, and denim quality. To find the perfect pair, try multiple sizes to determine your ideal body type fit. Different styles, such as skinny or wide-leg jeans, can create distinct looks. The denim's wash and treatment can also impact appearance. Proper care is essential to extend the lifespan of your jeans. Wash them inside out in cold water, avoid using a dryer, and handle them gently. By following these guidelines, you can find comfortable and stylish jeans. Understanding body measurements and utilizing the Fashion Nova size chart are key to finding a good fit. The number on the tag does not necessarily indicate the correct size. Instead, focus on finding clothes that make you feel confident and comfortable. Fashion should be enjoyable, so don't get discouraged if it takes some trial and error to find the perfect jeans. With Fashion Nova's diverse selection of styles and sizes, you can discover something that makes you look and feel great. To determine your ideal size in Fashion Nova jeans, measure yourself and compare your measurements to their sizing chart. Fashion Nova jeans are known for their stretchy fit, but they tend to run small, so it is recommended to refer to the size chart and consider sizing up. Fashion Nova's sizing can be puzzling for many customers, but understanding their size chart can make your shopping experience more rewarding. ===== Despite offering trendy pieces at affordable prices, Fashion Nova's sizing system needs improvement. To help you choose the right fit effortlessly, we've broken down their size chart into easy-to-follow categories. Understanding Fashion Nova Sizing: Measurements and Fits To get started, it's essential to understand how their sizes are measured and matched with actual measurements. Here are some key takeaways: * Bust, Waist, and Hip Measurements * Size Conversion and Comparison * International Size Conversion * Converting Fashion Nova Sizes Comparing with Other Brands Fashion Nova's sizing system can be quite challenging, with many customers reporting inconsistent measurements across different products and categories. To avoid any potential issues, it's highly recommended to refer to the size guide for each individual product before making a purchase. The men's section at Fashion Nova tends to run smaller than expected, so sizing up is often necessary to achieve a perfect fit. I personally experienced this issue when ordering a pair of jeans and a Cuban-collared shirt, which required me to return both items and order them in a larger size. Fashion Nova's shoe collection is particularly trendy, but unfortunately, the heels tend to run half a size small compared to their regular footwear. This was an issue for my girlfriend, who wears a US 6 size in shoes, when she ordered the same size heels at Fashion Nova. On a positive note, Fashion Nova offers surprisingly good quality footwear overall, even if it doesn't always fit perfectly. The brand's affordable dresses were also a key factor in its popularity, with prices that hadn't been seen since Shein disrupted the market several years ago. To help customers find the perfect size, Fashion Nova provides detailed measurements on each product page. This makes the process of selecting the right dress much easier and more efficient. Fashion Nova does offer plus-size clothing, but it's still essential to size up to get a perfect fit. The brand boasts an impressive range of options for plus-size women, making it a great destination for those looking for figure-flattering styles and diverse collections. While Fashion Nova has made significant strides in improving its sizing system, there's still room for improvement. For now, customers will need to size up when buying dresses and jeans to ensure the best possible fit. ===== Here's the paraphrased text of the article: **Understanding Fashion Nova's Size Charts** Fashion Nova offers size charts for various categories, including tops and outerwear, men's clothing, kids' clothing, and more. Each chart is specific to a particular type of garment or item. **Tops and Outerwear for Women** For women's tops and outerwear, refer to the chart below. * Bust (In): 32-33" | 81-84 cm * Waist (In): 24-25" | 61-64 cm * Hips (In): 35-36" | 89-91 cm **Men's Clothing** For men, Fashion Nova offers separate charts for different types of clothing: * **T-Shirts and Hoodies***: Bust (In): 32-33" | 81-84 cm; Waist (In): 24-25" | 61-64 cm * **Jeans and Pants***: Waist (In): 28-29" | 71-74 cm; Hips (In): 39-40" | 99-102 cm * **Jackets and Outerwear***: Bust (In): 32-33" | 81-84 cm; Waist (In): 24-25" | 61-64 cm * **Kids' Clothing** For kids, Fashion Nova offers a separate chart for various types of clothing: * Age (Years): 2-3 years * Height (In): 36" | 91 cm * Weight (Lb): 30 lb | 14 kg * Bust (In): 20-21" | 51-53 cm **Frequently Asked Questions** * Do Fashion Nova items run true to size? Yes, but some styles may run slightly small. Consider sizing up if you're between sizes. * How do I measure myself for these charts?
