I'm not a robot

1 Get the right amount of stone. You can get stone by mining stone blocks and then smelting cobblestone into stone. Stone can be found from Y-level 0 and above, and you can mine it with a wooden pickaxe or better. Alternatively, use a silk touch enchanted pickaxe to mine stone directly without it turning into cobblestone. You can also find stone blocks in chests in villages.2 Make a stonecutter. To make one, combine an iron ingot and three stones in a crafting table. In Bedrock Edition, you can use stone variants like granite, diorite, and andesite to make a stonecutter. Stonecutters can also generate naturally in Stone Mason houses in villages.3 Turn the stone into chiseled stone bricks. Place eight stones left into the stonecutter's leftmost slot, then select the chiseled stone brick option from the menu. Take the chiseled stone that appears on the rightmost slot and put it in your inventory.1 Get four gold ingots. To make a netherite ingot, you'll need four gold ingots. Gold ore can be found by mining to Y-level 0-32 pre-1.18 and levels -64-32 in 1.18 and above. You can also find gold ingots in chests in various structures.2 Get ten obsidian. Obsidian can be mined with a diamond or netherite pickaxe. It can be found where water meets lava source blocks, or you can make it by pouring a bucket of water over lava. Obsidian can also naturally generate as part of ruined portals, woodland mansions, and the pillars on the main end island.3 Make a Nether portal. To create one, place two obsidian blocks horizontally next to each other on the ground, then add placeholder blocks like dirt on either end. Place three obsidian blocks on top of the placeholders, followed by another placeholder block at the top. Finish the portal frame with two more obsidian blocks at the top. Finally, light the bottom obsidian block with flint and steel.4 Find four ancient debris. Ancient debris can be found by mining in the Nether and broken with a diamond pickaxe or better. It attempts to generate twice in a chunk, once from levels 8-22 and again from levels 8-119.To gain access to the Nether, players must first locate Y-level 15 and excavate a long tunnel. They can then mine off in various branches, creating beds that explode when attempted to be slept in, providing an efficient means of clearing areas without substantial risk.While utilizing this method, it is essential to don adequate armor, stock up on consumables like food or healing potions, as the process exposes individuals to considerable damage. In addition, excavating ancient debris in bastion chests can uncover nether gold ore, facilitating the production of gold ingots and, subsequently, netherite ingots.Thanks to all authors for creating a page that has been read 28,451 times. "This was a good article! There was only one small issue; it was a little outdated. However, I fixed it, and it works well in older versions and now in any version!"..." more Share your story This Minecraft tutorial explains how to craft a lodestone with screenshots and step-by-step instructions. In Minecraft, a lodestone is a decoration block that was added in the Nether Update (Minecraft 1.16). Let's explore how to make a lodestone. Supported Platforms A lodestone is available in the following versions of Minecraft: PlatformSupported (Version*) Java Edition (PC/Mac)Yes (1.16) Pocket Edition (PE)Yes (1.16.0) Xbox 360No Xbox OneYes (1.16.0) PS3No PS4Yes (1.16.0) Wii UNo Nintendo SwitchYes (1.16.0) Windows 10 EditionYes (1.16.0) Education EditionYes (1.17.30) * The version that it was added or removed, if applicable. NOTE: Pocket Edition (PE), Xbox One, PS4, Nintendo Switch, and Windows 10 Edition are now called Bedrock Edition. We will continue to show them individually for version history. Where to find a Lodestone in Creative Mode Required Materials to make a Lodestone In Minecraft, these are the materials you can use to craft a lodestone: How to craft a Lodestone in Survival Mode 1. Open the Crafting Menu First, open your crafting table so that you have the 3x3 crafting grid that looks like this: 2. Add Items to make a Lodestone In the crafting menu, you should see a crafting area that is made up of a 3x3 crafting grid. To make a lodestone, place 8 chiseled stone bricks and 1 netherite ingot in the 3x3 crafting grid. When making a lodestone, it is important that the chiseled stone blocks and netherite ingot are placed in the exact pattern as the image below. In the first row, there should be 3 chiseled stone bricks. In the second row, there should be 1 chiseled stone bricks in the first box, 1 netherite ingot in the second box, and 1 chiseled stone bricks in the third box. In the third row, there should be 3 chiseled stone bricks. This is the Minecraft crafting recipe for a lodestone. Now that you have filled the crafting area with the correct pattern, the lodestone will appear in the box to the right. 3. Move the Lodestone to Inventory Once you have crafted a lodestone, you need to move the new item to your inventory. Congratulations, you have made a lodestone in Minecraft! Item ID and Name Give Command for Lodestone Videos Watch this video to learn how the Lodestone Compass and Lodestone work in Minecraft (Nether Update) and never get lost in the Overworld, Nether, or End! This works in both Java Edition and Bedrock Edition (PE, Win10, Xbox One, PS4, Nintendo Switch). Subscribe Things to Do with a Lodestone Here are some activities that you can do with a lodestone in Minecraft: Start by crafting eight chiseled stone bricks and one netherite ingot. On your crafting table, place the netherite ingot in the center and surround it with chiseled stone bricks. Drag the lodestone from the crating table into your inventory. This article explains how to make a lodestone in Minecraft (any version) and how to gather and craft the required materials. It also explains what the lodestone is for in Minecraft. The lodestone is a block you can craft in Minecraft using eight chiseled stone bricks and one netherite ingot. Youll need to start by making a crafting table and a furnace if you dont already have them and obtain someTo prepare for your journey to the Nether, you'll need charcoal for the furnace and basic equipment such as a pickaxe, torches, and armor. To craft a lodestone, open your crafting table interface, place a netherite ingot in the center box, surround it with chiseled stone bricks, and drag the resulting block to your inventory.A lodestone is essential for changing how your compass works in Minecraft. It's crafted from eight stone bricks, which can be made from cobblestone and one netherite ingot. Netherite ingots are harder to obtain and require gold, so you'll need to mine for them as well. With a lodestone, you can place it anywhere and break it with a pickaxe to move it elsewhere.To activate a lodestone, interact with it using a compass. After doing so, the compass will always point towards the lodestone in the future. To get a lodestone compass, craft a compass and a lodestone, equip your compass, and use it on the lodestone. The compass's name will change to "Lodestone Compass." When you move away from the lodestone, it will always point toward it.To obtain netherite ingots, build a portal and enter the Nether. Locate ancient debris in the lower levels of the Nether and mine it with coal as fuel. Remove the resulting scraps, open your crafting table interface, and place four nether scraps and four gold ingots in the pattern. Move the netherite ingot from your crafting table to your inventory.Additionally, you'll need chiseled stone bricks to make a lodestone, which are crafted from cobblestone. With these materials and basic equipment, you're ready for your journey to the Nether.also need a furnace with some fuel and a crafting table. Heres how to make chiseled stone bricks in Minecraft: you can start by mining cobblestone, then place that along with a fuel source in your furnace to smelt it. Once it cools down, move the resulting stone to your inventory. Next, open up your crafting table, and arrange four of those stones into a 2x2 pattern on the table. This should give you stone bricks. To make chiseled stone bricks, place three of these brick pieces in the middle row of the crafting table interface, then move them to your inventory. Now, place stone brick slabs in the top and middle rows of the center column of the crafting table interface, and finally, move those chiseled stone bricks to your inventory as well.You wont be able to craft saddles, so instead, you can find or acquire them by exploring places with chests like dungeons or castles, looting the chests, or locating a village leatherworker who will trade a saddle for emeralds. If that doesnt work out, you could try fishing and attempt to catch one.To make a map in Minecraft, simply combine a compass with eight pages of paper. You can also find maps as you explore your world by discovering treasure chests or running into a cartographer who will trade one for about eight emeralds.There isn't a crafting recipe to make smooth stones; instead, you'll need to smelt cobblestones to get regular stones and then smelt those again to create smooth stones. Smooth stones are lighter in color with a visible outline.In another dimension, a Lodestone compass behaves erratically, much like a regular compass outside the Overworld. The achievement "Country Lode, Take Me Home" references John Denver's song "Take Me Home, Country Roads." The side texture of the Lodestone block and its crazy compass are notable features. In Minecraft, exploring is enjoyable, but returning to base can be challenging, especially when lost. Using a compass or coordinates can help, but a Lodestone offers a unique solution. To craft one, you'll need 8 Chiseled stone bricks and 1 Netherite ingot, which requires combining Netherite scraps with gold ingots or finding them in bastion chests. Once you have the resources, open the crafting table, place the Netherite ingot in the center, and surround it with Chiseled stone bricks to create a Lodestone. You can also find Lodestones in bridge bastion remnant chests, which is a more efficient way to obtain them. When used with a compass, a Lodestone allows the compass to point to its location instead of the world spawn point, making it useful for navigating to bases or specific locations in maps and mini-games. This combo works in various dimensions, providing a reliable way to find your way around in Minecraft.Lodestone update in Minecraft brings significant changes to this highly sought-after block. As of the latest snapshot 25w02a, the recipe has been simplified to one iron ingot surrounded by chiseled stone blocks, making it more accessible to players. However, the question remains - is a lodestone worth its netherite ingot price tag?While some players may use it for building purposes, others may be drawn to its unique properties, such as allowing attuned compasses to point towards specific locations, including the End dimensions. The addition of this feature has opened up new possibilities for navigation and exploration.Although the lodestone's current interactions are limited, its potential for creative applications in redstone-based projects is vast. Nevertheless, players can now enjoy marking their favorite spots without needing to write down coordinates, making it a convenient tool for travel.Looking for unique ways to play Minecraft or connect with fellow players? The Lodestone is an essential tool for explorers who love discovering new biomes in Minecraft. This handy item helps you navigate through diverse environments and vast lands within the game. You can easily find or craft it to use across all three dimensions as you explore.Here's everything you need to know about the Lodestone:**Crafting a Lodestone**To make a lodestone, gather these resources: 8 chiseled stone bricks and 1 Netherite Ingot. First, craft chiseled stone bricks using the recipe (check out the image from Mojang Studios). If you don't have them, mine infested blocks with Silk Touch to get them, or use a stonecutter to refine stone into chiseled stone bricks. For the Netherite Ingot, combine 4 Netherite scraps and 4 Gold Ingots in your crafting bench (it's a shapeless recipe). Alternatively, refine a Block of Netherite.**Assembling Your Lodestone**Open the crafting table and place the Netherite Ingot in the center. Surround it with 8 chiseled stone bricks, then select the Lodestone from the crafting table to complete the build.**Using the Lodestone Compass**Lodestones are perfect for navigation! Use them as waypoints on your map by placing a lodestone and interacting with it using a compass. This transforms your regular compass into a custom one that always points toward the block it was generated from. You can place multiple lodestones across your world to navigate to important locations or points of interest.**Easter Egg: Uncover the Lodestone's Secret**Craft your first lodestone and interact with it to unlock an advancement a hilarious Easter egg awaits you! This works in all game modes, provided achievements are unlocked. Crafting a lodestone also rewards you with "Country Lode," an achievement.A new feature has been added to the game, and it's called a "Home" advancement. The name is a playful reference to the famous song 'Take Me Home, Country Roads' by John Denver. Additionally, you may want to read about Minecraft Creaking and Pale Garden now available in Bedrock beta and preview. For more news and updates on Minecraft, check out our latest articles.
