I'm not a robot

The Last Podcast on the Left takes listeners on a thrilling ride through the darker side of human nature, exploring subjects like true crime, cryptid encounters, cults, and more. Hosted by Marcus Parks, Ed Larson, and Henry Zebrowski, this podcast is a hilarious yet haunting descent into the abyss. Marcus brings his "demented academic" approach to unraveling the disturbing data behind these dark topics. Ed, meanwhile, serves as a grounding force for his roommate Henry's eccentric mind, providing a much-needed reality check from time to time. Henry, a self-proclaimed conspiracy theorist and lover of alternate personas, enthusiastically dives into the world of neurotic axe murderers and bizarre ufologists. For fans, there are plenty of ways to indulge in The Last Podcast on the Left's unique brand of dark humor and expertise. Patreon supporters can enjoy exclusive content, including live streams, interviews with true crime and paranormal figures, and behind-the-scenes footage. VIP ticket holders get to attend intimate post-show Q&A sessions and participate in group photos. The podcast has been touring the US, Europe, and the UK, performing their unique blend of comedy, paranoia, and true-crime storytelling. Catch them live at a venue near you! In addition to their stage shows, The Last Podcast on the Left offers two live recordings available for purchase – one filmed in Chicago and another in New Orleans. These aren't your average podcast live shows; they're an experience that promises "ooky-spooky rip-roarin' content." Joining the team is a talented group of individuals, including Michelle, who's worked behind the scenes since 2017, Ol' Lou, who brings earthy vibes and music to the mix, Rob Okey, the audio engineer and in-house editor with a background in TV production and plumbing, and Ian Brannan, the podcast and video editor. The Last Podcast on the Left has carved out its own niche in the world of true-crime and paranormal podcasts. With their unique blend of humor and expertise, they're sure to leave listeners both entertained and unsettled.While playing street hockey when they were about 9, I found out he's still not sorry. James does video editing and live streaming for LPN. He recently moved to Los Angeles from his hometown of New York City for work, weather, and hoping to meet ALF. Maddie has been with LPN since 2018 and handles artwork and socials for the network all the way from NYC. When she's not doing that, she's most likely on her porch, reading a philosophy book and smoking cigarettes. Her interests include parallel parking, people-watching, and Zoloft. April is an In-House Editor for LPN! She hails from West Virginia, her interests include UFOs, Sailor Moon, and the magical properties of cats—of which there are many. Kelly is the production assistant and executive assistant at LPN. She enjoys listening to emo bands since middle school, Pokémon Go, and figuring out where Michiana is. Eric is a nice Michigan boy who once slapped Henry’s bare ass on air while running a media conglomerate’s west coast livestream studio. In 2023 he crawled out from the entertainment industry to handle livestreaming & video production for LPN. Spanking is more effective than LinkedIn. Joel is a researcher and co-producer for Last Podcast on the Left and Side Stories. They have been into the occult and macabre since birth, and started getting paid for it in 2019. They love sludge metal, Lego, and Star Trek. Madeline is the Director of Operations, in house photographer and friendly poltergeist for LPN. She spent many formative childhood years living in a haunted house which sparked her interest in paranormal activity. Kelsie is an assistant at LPN. She's native to the wastelands of Vault 12 with a background in communications, design, and competitive multitasking. When she's not trying to buy Georgie’s love with treats, she enjoys strategy games, pinball, and watching Jeopardy. ========== ========== The podcast delves into intriguing stories with memorable characters and cases throughout its history. Episodes like LPOTL #189, #190, #191's 9/11 Series stand out for their in-depth exploration of one of the most somber events in modern history. The hosts tackle this topic with sensitivity while maintaining their signature blend of informative content and engaging storytelling. The podcast also explores cults, including Scientology, Peoples Temple, and Aum Shinrikyo. These series offer a nuanced look at the complex and often dark nature of these groups. For instance, LPOTL #397's "Heaven’s Gate Part I – A Cabo or a Wabo" delves into the origins and beliefs of this infamous cult, which led to the tragic mass suicide of 39 members in 1997. Other episodes, such as LPOTL Best of Cannibalism and LPOTL #489's "The Children of Thunder Part I – That’s Not Gritz!", showcase the podcast's ability to tackle a wide range of topics, from true crime to paranormal cases. The hosts' dedication to research and storytelling shines through in each episode, making for an engaging listen. A fan favorite is Episode 200, which marks the beginning of a series on H.H. Holmes, America’s first serial killer. This series offers a detailed look into Holmes's early life, his infamous "Murder Castle" during the 1893 Chicago World’s Fair, and the numerous lives he took under various scams and fraudulent activities. The podcast's approach to sensitive topics is always marked by respect and gravity, yet still provides the informative content listeners expect. With a wide range of topics covered, there's something for everyone on The Last Podcast on the Left.These theme. One thing is for sure – their in-depth reserch and discussions provide a unique mix of humor and horror, making these episodes immensely enjoyable. Some of the most outstanding episodes are those diving into the cases of notorious serial killers. For instance, the episodes on Pee Wee Gaskins and Henry Lee Lucas had me hooked due to their detailed analysis and shocking revelations. The hosts do not hold back in presenting explit information, as well as the psychological contex, which adds to the intrigue and authenticity of the content. When it comes to dark and horrifying moments, episodes about Edgewood and Hollow Earth stand out for me. These episodes unravel disturbing truths that are hard to comprehend but essential to explore. Their take on the world of magick, including Left Hand Path, Right Hand Path, and Chaos Magick, is both fascinating and eerie. I also appreciate their coverage of conspiracy theories and thought-provoking topics, like Hollow Moon and the 9/11 The Day episode. Although the latter is not a light-hearted or funny one, the hosts present an emotionally charged and deeply moving portrayal of the tragedi. It may be a difficult listen, but it’s an important episode. In summary, the best Last Podcast on the Left episodes manage to capture the essence of true crime, dark and paranormal topics, while still maintaining a perfect balance between creepy and comedic. I’ve listened to several episodes of the Last Podcast on the Left, and I must say the creators have done an excellent job at creating entertaining, informative, and engaging episodes. Let me guide you through some episodes that provide in-depth analysis of trials, cults, serial killers, and true crime news: The Freeway Killer (Randy Kraft) – One of my favorite episodes, this story covers the horrifying actions of Randy Kraft, known as The Freeway Killer. This serial killer terrorized the highways of Southern California in the 1970s, and the hosts provide in-depth coverage of his crimes, victims, and eventual capture. Related: Best Story Podcasts Albert Fish – In this episode, the twisted tale of Albert Fish, also known as The Werewolf of Wysteria, is explored. Fish was a notorious child murderer, cannibal, and sadist who confessed to at least five heinous killings during his time. The host’s research and presentation of this chilling case keep me captivated throughout the entire episode. Cults – The Last Podcast on the Left has covered multiple cults in their episodes. Some of my personal favorites include the Jonestown Massacre, Heaven’s Gate, and the Aum Shinrikyo doomsday cult. These episodes delve into the background of each cult, their leaders, followers, and the tragic events that ultimately led to their downfall. Serial Killers – Last Podcast on the Left has discussed numerous serial killers, including famous ones like Jeffrey Dahmer, Ted Bundy, and John Wayne Gacy. In each episode, the hosts take a detailed look at the killers’ backgrounds, motives, methods, and capture, providing a gripping experience for listeners. True Crime News – Occasionally, the podcast covers current true crime news stories, keeping listeners informed about the latest developments in the world of crime. These episodes usually revolve around ongoing investigations, controversial trials, and breakthroughs in cold cases. In these episodes, I find the hosts’ commitment to thorough research and attention to detail admirable. Additionally, their ability to maintain a confident, knowledgeable, and clear tone throughout each episode makes the content easily accessible and enjoyable for all listeners. As I’ve been listening to Last PodcastThe Left's Foray into the Fascinating Realm of Side Stories ========== I've ventured into the captivating world of Side Stories, which offer a respite from the main show's narrative, delving into tales of conspiracy theories, unusual experiences, and enigmatic events. In this exploration, I'll highlight some notable Side Stories that have piqued my interest. One episode shed light on the enigmatic Men in Black, an organization often discussed within UFO and conspiracy circles. The podcast examined encounters with these mysterious figures, speculations about their identities, and potential purposes. As a listener, I gained a deeper comprehension of various Men in Black lore and theories. Another intriguing Side Story focused on the elusive Sasquatch, also known as Bigfoot. Through the hosts' engaging storytelling and thorough research, I felt as though I was embarking on a captivating journey to uncover the truth about this legendary creature. The discussion delved beyond the typical narrative, encompassing sightings, unusual evidence, and how these stories have influenced popular culture. Conspiracy theories are also a prevalent theme in Side Stories. For instance, the hosts probed well-known theories involving the government, ancient history, and paranormal events. By providing a balanced analysis, they offered a skeptic's perspective on the plausibility of these ideas while still considering them. These episodes tackled subjects often relegated to the periphery, granting them a platform for thoughtful discussion. In summary, the Side Stories of Last Podcast on the Left provide an informative and entertaining exploration into topics such as Men in Black, Sasquatch, and conspiracy theories. If you're seeking a new perspective on the strange and mysterious, I highly recommend exploring these episodes.The Last Podcast on the Left examins various subjects includng cults and religions through their informatve yet entertaning episodes. They discus some of the darkest corneres of humanity with objectivity and balance. ========== The podcast covers a wide range of topics, from notorious cult leaders to religious beliefs. Some episodes are not suitable for all audiences due to graphic descriptions. However, those who explore them can gain valuable insights into the human psyche. The hosts' approach to discussing sensitive subjects is noteworthy. They delve into the origins and practices of Mormonism and the Church of Jesus Christ of Latter-day Saints with an insightful and objective view. Similarly, they tackle the controversy surrounding Scientology, analyzing its secretive nature and aggressive legal tactics without letting personal bias cloud their narrative. Another episode that caught my attention was about Richard Chase, also known as the Vampire of Sacramento. The hosts provide a balanced approach, presenting the gruesome details while understanding the societal and psychological factors that contributed to his crimes. This is reflected in other episodes that explore creepypastas, such as Episode 541, "Creepypasta XIX – The Law of the Jungle."the last podcast on the left is very good if you like horror and true crime i have listened to some of their episodes and they are fascinating ========== I found that the podcast has something for everyone when it comes to horror and the paranormal. I have explored some interesting and gripping true crime episodes of the Last Podcast on the Left that both captivate and inform listeners. One episode that caught my attention is about Randy Kraft, also known as "The Freeway Killer." The hosts' research and presentation are very good. ========== Another story that I think is very good is about Andrew Cunanan. The podcast series on Cunanan offers insights into his life and the gruesome murders that led to his eventual suicide. The episodes narrate how Cunanan embarked on a killing spree that garnered much attention, particularly his murder of fashion designer Gianni Versace. ========== Lastly, I want to mention the infamous cult leader and murderer Charles Manson. The podcast's episodes on Manson are insightful and engaging, providing an in-depth analysis of his life, crimes, and fascinatingly twisted beliefs. As they peel back the layers of Manson's persona, the hosts explore his childhood and its correlation to his descent into a life of crime. ========== I also like how the hosts interact with their audience and include listener stories in their episodes. These segments not only provide fresh perspectives on true crimes and paranormal phenomena but also foster a strong sense of community among LPOTL fans. The listeners' stories often showcase intriguing personal encounters with the unexplained, ranging from ghost sightings to UFO encounters. ========== The hosts - Ben Kissel, Marcus Parks, and Henry Zebrowski - analyze these stories with their unique blend of humor, skepticism, and empathy, making for engaging conversation and memorable moments. They also do very good episodes on "hardcore history" topics that take listeners on a journey through lesser-known historical events. ==========The Last Podcast on the Left is not just a podcast, but an immersive experience that delves into the darker side of history. With its unique blend of storytelling and multimedia elements, it creates an atmosphere that draws listeners in. The hosts' fascination with their subjects is infectious, making listeners question everything they thought they knew. ========== ========== The Last Podcast on the Left has mastered the art of exploring dark and taboo subjects with humor, relevance, and exceptional production quality. They tackle topics such as one-night stands, conspiracy theories, and true crime stories with ease, often delving deep into these subjects in multi-part series that keep listeners engaged. From discussing the "out of this world" sexual preferences of aliens to examining the life of notorious serial killer Jodi Arias, the show's hosts weave a narrative that is both entertaining and thought-provoking. Their episodes range from revisiting previous subjects with new research to delving into lesser-known topics like Mormonism. Their unique approach has earned them a dedicated fan base, and their extensive back catalog is worth exploring. For newcomers, the podcast offers a diverse selection of episodes, including "Maybe the question isn't 'How did one man convince 38 people to commit suicide?' but rather, what was it about this world that made these people so God damned eager to leave it?" and "My question is, did any one of these people ever consider doing the Dew? That sums it up right there." The hosts' ability to balance humor with respect for their subjects makes The Last Podcast on the Left a standout in the true crime comedy genre.The final arbiter of state justice. Who are these people? What sort of food do they eat with their kids? What makes them tick? Is it the result of a good union job? The questions abound. # Statistically speaking, you know someone who subscribes to the idea that the Earth is flat. It should be plain crazy, but, as the guys point out, it’s actually growing in popularity. By a lot. For something that should be an open and shut case, Ben, Henry, and Marcus give it more air than it deserves. Which, as it should, is entertaining as all get out. # In an era before social media, private security around mega celebrities wasn’t as tight as it might otherwise be today. Pair that with John’s revelation that he might face just such a gruesome end and you’ve got the fodder for a well researched look at the death of New York’s favorite (probably) Beatle. Assassin Mark David Chapman was coming up for parole again, so this story is perennially relevant. # It would be patently difficult to have a show that covers crazy without talking about Roswell. Aliens tend to factor in, often, in these stories. And the boys indulge the Roswell story, many times, on Last Podcast on the Left for good reason. A best of compilation is a great place to dip your toe into the conspiratorial waters. # Kicking off the mini midweek episodes, Ben and Henry eulogize the late night AM legend Art Bell. If you’re of a certain age, your grandma would recount wild tales of Chupacabra, the occult, and other inappropriate musings ripped straight from the man himself. Art pulled back the covers on a subset of culture that had, heretofore, been largely marginalized. Now they’re congressmen. Thanks Art. # Jonestown. You don’t even have to know exactly what transpired to know the word. It’s in the zeitgeist. The same way little kids know how to make car noises before they know what a car is. That’s the level to which Jonestown is seared into our societal DNA. It took the guys 300 episodes to get to Jonestown, but by the time they did, this five piece series was devastating. Take a whole Saturday to binge this one. # This is a big one. L. Ron Hubbard. It would be nigh impossible to find a larger organization founded on more outlandish lies than what L. Ron Hubbard built. In the first of a four part series Last Podcast on the Left looks at the early life of Scientology’s founder and finds that there are some deep seeded sympathies for what made him tick. His methods, effective. His motivations, questionable. Another example of the uncomfortable nature of the show making us look in the mirror and laughing at what we see. # One of the strangest murder cases of the 20th century would have to find a home on The Last Podcast on the Left. It has all the trappings of bizarre death that is the bread and butter of this show. How the guys were able to tread new ground, make it funny, and stretch it out over a three part series is some masterful broadcasting. It makes for some compelling listening. Eddie Spaghetti would be proud. # You don’t have to be a conspiracy theory enthusiast to enjoy LOPTL. It’s not remotely necessary. But if you want to pull extra layers and threads of empathy out of these episodes… to feel better about laughing about these subjects, it helps to understand something about what makes these mental aberrations take hold. The story of Bill Cooper is just such an illuminating story.Last Podcast on the Left: A Dark Look into Compelling True Stories ========== LPOTL takes the audience through various gruesome crimes to create an engaging experience. Chris Buman's story is a case in point. The series delves into LPOTL, where the team examines the life and death of this cult leader. David Berg, the master manipulator behind the Children of God, is another topic explored by LPOTL. A closer look at how his influence affected many people is presented in an episode from 2020. Science has come a long way since it thought separating brain hemispheres was a solution to certain antisocial behaviors. To understand why such a procedure gained popularity, it's worth examining the past. The guys bring their own spin to this topic by injecting some humor into the discussion. The electric chair is an infamous piece of American jurisprudence. It represents a dark period in history where society thought progress lay in its use. This leads to the creation of a monster, which LPOTL explores in detail. Black Metal and its connection to real-life crimes are another topic covered by LPOTL. The series examines the roots of this genre in Norse myths and delves into its darker aspects. The Men in Black is often just a fictional concept, but there's truth behind it. The guys dig up some interesting facts about this mysterious organization. Dr. Henry Jones Jr.'s character from the Indiana Jones trilogy makes for an intriguing discussion point. However, the Order of the Solar Temple is where LPOTL starts to explore more serious themes. The show has been entertaining listeners with its unique mix of humor and horror since 2011. Spanning over 600 episodes, it's covered countless crimes, cults, and unexplained events. The best episodes from LPOTL include fan favorites and popular ones, as well as some of the creators' personal recommendations.For a captivating blend that's both intriguing and chilling, delve into these true crime stories. Be prepared, though - you may never sleep soundly again. The origins of Jeffrey Dahmer, a cannibalistic serial killer, are explored in depth. This episode is the first of a three-part series, offering a glimpse into the life that shaped a future serial killer, from his unusual behavior at school to his disturbing habit of playing with animal bones, leaving no doubt that Jeffrey was never a normal child. Another episode revisits the Heaven's Gate cult, where 39 members took their own lives in 1997, believing a comet would lead them to salvation. The hosts revisit this tragic event, exploring the Hale-Bopp theology and its evolution, raising questions about what drove the group to such desperation. A 1971 plot by Manson followers to break him out of jail is also examined, involving a far-fetched scheme to raid a Western Surplus store for guns and supplies. Furthermore, an episode explores shocking stories of alien abductions for intergalactic breeding experiments, presenting a mix of skepticism and curiosity. The founding of Mormonism is also delved into, covering Joseph Smith's early days, his claims of discovering golden plates, and the divine revelations involving God, Jesus, and the angel Moroni. Lastly, the 14th-century Black Death outbreak is relived in a series of episodes, vividly explaining the plague's origins, spread, and symptoms, and exploring its apocalyptic scale and existential terror. ==========The series delves into a dark period in Mexican history, exploring the crimes and rituals of a 1980s cult leader. ========== Episode 430: Adolfo Constanzo Part I - Room of the Dead ========== The series explores the life of Adolfo Constanzo, a Mexican cult leader who was responsible for several narco-satanist killings in the 1980s. His followers practiced ritual magic and human sacrifice, as well as offering criminal services as mercenary hitmen. ========== Release Date: June 29, 2018 Duration: 1 Hour, 16 minutes ========== The series also examines the mysterious men who claim to be involved in UFO sightings and alleged threats. The story takes viewers on a journey from the initial whispers of these encounters in the 1950s to recent hair-raising incidents. ========== Episode 323: The Men in Black Part I - You Fed the Tulpa ========== Another episode delves into the strange occurrences that have been reported at Alaska's alleged "Alaska Triangle," where unexplained disappearances are common. This series explores the mysterious vortexes, time travel tales, and mythical creatures associated with this phenomenon. ========== Release Date: January 12, 2024 Duration: 1 Hour, 31 minutes ========== The third episode examines a notorious serial killer couple, Fred and Rose West, whose brutal crimes shocked the nation. This series delves into their twisted relationship and the horrific acts they committed in the 1960s and 1970s. ========== Episode 506: Fred and Rose West Part I - A Match Made in Hell ========== A fourth episode investigates the mysterious Skinwalker Ranch, a place shrouded in paranormal legends. This series explores the bizarre sightings, unexplained events, and alleged encounters that have taken place there. ========== Release Date: February 16, 2019 Duration: 1 Hour, 33 minutes ========== Lastly, an episode uncovers the dark world of necrophilia, exploring its depths and the people involved in such crimes.Looking forward to seein everyone at the meeting tomorow to discuss our strategies, where we'll see some people talk about creepy tales of those who have sex with the dead. As horrifying as that sounds, Ben and his friends will break down these stories in a way that terrifies while throwing in some sense of humor to calm the tension. From serial killers like Dahmer to cult leaders and paranormal hotspots, they look into some of humanity's darkest hours. While often difficult to digest, their open dissections of evil provide food for thought. So, if you're craving a mix of laughs and chills or can't look away from the horrific, queue up these episodes for a memorably scary yet entertaining immersion into the dark side. Just don’t listen before bed—nightmares seem inevitable. ==========
