Some examples include "Rock", "Role", "Room", "Rule", and "Run". Other words like "Learn more" can be used to provide additional information about these common words. Words that Start with R Common Words (S) Safe Same Save Say Scene Science Scientist Score School Sea Season Seat Second Section Security See Seek Seem Sell Send Senior Sense Series Serious Serve Service Set Seven Several Sex Sexual Shake Share She Shoot Short Shot Should Shoulder Show Side Sign Significant Similar Simple Simply Since Sing Single Sister Sit Site Situation Six Size Skill Skin Small Smile So Social Society Soldier Some Somebody Someone Sometimes Something Son Song Soon Sort Sound Source South Southern Space Speak Special Specific Speech Spend Sport Spring Staff Stage Stand Standard Star Start State Statement Station Stay Step Still Stock Stop Stone Story Student Study Stuff Style Strategy Street Strong Structure Subject Success Successful Such Suddenly Suffer Suggest Summer Support Sure Surface Systemthe entity mentioned in the initial text has undergone a transformation, adapting to new circumstances and embracing change, whilst maintaining its fundamental nature, and ensuring continued accountability and transparency. ===== The entity's core values and principles have remained intact, as it navigates complex situations and strives for excellence, acknowledging past mistakes and learning from them, with a commitment to improvement and growth. ===== The adaptation of the entity has led to increased efficiency and effectiveness, allowing it to address emerging challenges and capitalize on new opportunities, while upholding its reputation and maintaining trust among stakeholders. ===== Looking forthoward to seing everyone at the meetin tomorrow and discusin our strategis. I am verey exsited about it. ===== I can see that you need help with a creative paraphrasing of the article's text, specifically using one of three rewriting methods: ADD SPELLING ERRORS (SE), WRITE AS A NON-NATIVE ENGLISH SPEAKER (NNES), or INCREASE BURSTINESS (IB). I'll randomly select one of these methods and apply it to your original text. After reviewing the probabilities, I've selected the "ADD SPELLING ERRORS (SE)" method for this example. Here's the rewritten text: Looking forthoward to seing everyone at the meetin tomorrow and discusin our strategis. I am verey exsited about it. This text maintains a clear meaning from the original while introducing occasional spelling mistakes that subtly alter the text without compromising readability.the text you provided seems to be a list of words and phrases that sound similar, with some being related to bikes and others not. The term "cent" is often used as a synonym for the number one, but its usage varies greatly across different contexts and languages. In English, it can be used to represent the unit of currency or to indicate a specific amount. ===== In mathematics, a cent is used to represent a hundredth of a unit of currency in some countries, such as the United States dollar. However, this usage may vary among languages and regions. Rewritten text here =====The realm of words converges, a tapestry woven from threads of language, as we delve into the top 10000 most common English vocabulary. A cursory glance reveals a symphony of 'c' sounds; custom, custody, curves, and cutting, intertwined with their variants - customers, cuteness, cuts. As we meander through the alphabet, we arrive at the 'Czech' territory, where 'cyber', 'cycle', and 'customs' converge. The digital realm beckons with 'cv', 'cvs', and 'cw', while the world of words whispers sweet nothings about 'cut' and its variants - cute, cutting. In this vast expanse of language, we find commonalities that transcend borders - 'cycle', 'cyber', and 'customs'. The allure of the unknown beckons, as we venture forth into the realm of the unfamiliar. ===== Looking forward to seein everyone at the meeting tomorrow and discussin our strategies, it's a great opportunity for us to conect with each other and discus some impotant issues. The team has been working hard and I think we have alot of new ideas to share. Our companys success is rely on our ability to work together and support each other. So lets make shure to take some time to chat and get to no what's on everyone's mind. The meeting will be held at the office, and I've arrangd for some refreshments to be servd. There will also be a few prizes for the best ideas presented. I think it'll be a fun and productive meetin, and I'm exsited to see you all there. The term "beastality" is often associated with bestiality, a colloquial and pejorative term for sexual activity between humans and animals. However, the word itself has a distinct history and multiple meanings. A 19th-century dictionary defined "beastial" as relating to or characteristic of beasts or savage animals, which led some to interpret it as a synonym for bestiality. Nonetheless, this etymological link is not direct. In modern English, "beastly" means gruesome, savage, or hideous, often employed in descriptions of scenery, characters, or actions. This usage has no apparent connection to the aforementioned term. A novel approach to strategic discussion is unfolding, and it's time to capitalize on this momentum. Looking forward to seeing everyone at the meeting tomorrow and discussing our overall direction. ===== I am very excited to attend the concert tonight with my friends. The city was bustling with activity, but I can focus on music. The streets were filled with cars and buses, creating a symphony of honks and engine noises. I am looking forward to seein everyone at the meeting tomorrow and discussin our strategies. =====one hundred million 100000000 spelled in english words is the number expressed by using our numbers to words calculator to describe a quantity of one hundred million units. The value written out in full as "one hundred million" can be described with english words - 1,00,00,00,000. ===== The GitHub repository contains a list of the top 10,000 most common English words, sorted by frequency, based on data from Google's Machine Translation Team. The Google Research team has been utilizing word n-gram models for various R&D projects such as machine translation, speech recognition, and spelling correction. ===== While these models are usually estimated using corpora containing at most a few billion words, the team scaled up their training corpus by one order of magnitude multiple times, resulting in a massive dataset of 1 trillion words from public web pages. This enormous amount of data will benefit the entire research community, advancing the state-of-the-art and focusing research on large-scale data-driven approaches. ===== The dataset includes 1,024,908,267,229 words of running text and publishes counts for all 1,176,470,663 five-word sequences that appear at least 40 times. After removing words that appear less than 200 times, there are 13,588,391 unique words in the list. Some variations of the dataset exist, including with and without profanity. ===== The team was surprised to find that "cyprus" ranks 4,993 on the list, directly following the word "emails". This finding is interesting, as reported via a link from this article. The repository contains the top 10,000 most common English words in order of frequency, based on n-gram frequency analysis of Google's Trillion Word Corpus. =====we have been harnessing the vast power of Google's datacenters and distributed processing infrastructure to process larger and larger training corpora, resulting in a massive dataset of one trillion words from public Web pages. we believe that access to such massive amounts of data will advance the state of the art, focus research in promising directions, and allow all research groups to play together. our dataset is derived from peter norvig's compilation of the 1/3 million most frequent english words, but we limited this file to the 10,000 most common words and removed appended frequency counts. special thanks go out to koseki for de-duplicating the list, as well as those who created two additional lists with swear words removed, based on us english list categories: short (1-4 characters), medium (5-8 characters), long (9+ characters). this repo is useful as a corpus for typing training programs. it's worth noting that the 7,000 most common english lemmas account for approximately 90% of usage, making a 10,000 word training corpus sufficient for practical applications. to use this list as a training corpus in amphetamine, simply paste the contents into the "Lesson Generator" tab with specific settings, and you'll be ready to train.
