It was created by David Baszucki and Erik Cassel in 2004, and released to the public in 2006. As of February 2025, the platform has reported an average of 85.3 million daily active users. According to the company, their monthly player base includes half of all American children under the age of 16. The platform hosts millions of user-created games (officially referred to as "experiences"), all created using a dialect of the programming language Lua and the platform's game engine, Roblox Studio. While Roblox is free-to-play, it features in-game purchases done through its virtual currency known as Robux, and game developers on the platform are able to create items that cost Robux. Furthermore, the platform hosts a large virtual economy centered around those items and Robux. Using the platform's "Developer Exchange" program, creators on the platform are able to exchange their earned Robux for real-world currency. The platform has also been used to host virtual concerts and events, as well as advertisements. While Roblox has been off small-scale in playability and as a company, it began to grow rapidly in second half of the 2010s. This growth was largely due to the pandemic. By 2020, Roblox had been played over 100 million times, and although Roblox is not a mobile game, it has been downloaded over 100 million times. Roblox is also a platform for extremist materials and adult content, which has led to criticism for its allegedly lax moderation of children and microtransactions. The platform has been restricted or completely blocked in several countries, including China, Turkey, and Jordan. Roblox is an online game platform and game creation system built around user-generated content and games,[1][2] officially referred to as "experiences".[3] Games can be created by any user through the platform's game engine, Roblox Studio,[4] and then shared to and played by other players.[11] The games featured on Roblox vary in genre, from role-playing games to ones centered around escaping prison, among others.[5] The platform is made to appeal to a family-friendly audience, and has been described as a massively multiplayer online game (MMO).[6] While Roblox is free-to-play, it features a virtual currency known as "Robux" that can be purchased with real-world money. Robux can be used to purchase virtual items that the player can use on their virtual character (or "avatar") on the platform, or access experiences that require payment.[11] As with games, avatar items on Roblox are mainly user-generated,[7] though most items on the platform were made by Roblox themselves for most of the platform's history.[8] Through the platform's "Developer Exchange" program, creators on the platform are able to exchange their earned Robux to real-world money.[9] In addition, Roblox features a monthly service called "Roblox Premium", with its subscribers gaining access to more features on the platform and a monthly stipend of Robux.[11] Logo of the virtual currency, Robux. Roblox features a large virtual economy centered around Robux, its virtual currency.[10][11] The currency allows users to buy, sell, and create virtual items.[7] Roblox also has a service called "Roblox Premium", a monthly stipend that gives early on Roblox (with an amount of Robux) to its subscribers, and also allows users to purchase items, and access the item trading system.[11][2] Similarly, games, many items and virtual items are generated.[8][9] Roblox developers are able to create virtual items that give early on Roblox (with an amount of Robux) to its subscribers, and also allows users to purchase items, and access the item trading system.[11][2] Similarly, games, many items and virtual items are generated.[8][9] Roblox developers are able to create virtual items that
